

Drug Use In Pregnancy

Frank J. Ayd

Drug Use In Pregnancy:

Drug Use in Pregnancy: Mother and Child I.J. Chasnoff, 1986-08-31 Abstract A reference text for medical and paramedical personnel involved in the care of pregnant women and their children presents 13 detailed reviews on various aspects of the topic prepared by experts in their respective fields Topics include the pharmacological basis of perinatal drug addiction and its recognition and treatment obstetric aspects of drug use in pregnancy presentation and application of a comprehensive model for therapy the consequences of intrauterine exposure to opiate and other drugs the effects of marijuana alcohol and psychotropic drug abuse methodological issues in investigating pregnancy drug abuse immunological function and AIDS in drug exposed infants and legal issues Literature references are appended to each of the papers Drugs in Pregnancy and Lactation Gerald G. Briggs, Roger K. Freeman, Sumner J. Yaffe, 2012-03-28 An A Z listing of drugs by generic name Each monograph summarizes the known and or possible effects of the drug on the fetus It also summarizes the known possible passage of the drug into the human breast milk A careful and exhaustive summarization of the world literature as it relates to drugs in pregnancy and lactation Each monograph contains six parts generic US name Pharmacologic class Risk factor Fetal risk summary Breast feeding summary References **Cocaine, Pregnancy, and the Newborn** Cynthia B. Love, 1990

Maternal & Child Health Nursing Adele Pillitteri, 2010 Growing research shows that many children from immigrant and refugee families are not doing well in school due in part to linguistic and cultural disadvantages Teaching dual language learners requires cultural sensitivity an understanding of language acquisition and intentional teaching strategies Combining research and techniques this resource helps early childhood educators support dual language learners as they develop the skills necessary for school readiness and success *The Effects of Maternal Alcohol and Drug Abuse on the Newborn* Barry Stimmel, 1982 Drug abuse and alcoholism specialists present the latest findings on the effects on the newborn of mothers use of illicit drugs during pregnancy These experts specifically address the perinatal neonatal and subsequent developmental effects **Treating Women with Substance Use Disorders During Pregnancy** Hendree E. Jones, Karol

Kaltenbach, 2013-03-28 This book provides a first in depth comprehensive and evidenced based overview of the treatment of substance use disorders in the pregnant patient It provides readers with materials that will not only aid them in identifying assessing and understanding the issues involved in treating these women but also the practical tools to implement the best practices from comprehensive care programs specializing in this sort of treatment Each chapter strikes a balance between the best scientific information available and reasoned clinical wisdom to fill in where evidence based information is unavailable all in a form that is practical and accessible It is a valuable tool for clinicians and service providers across disciplines **Drugs, Alcohol, Pregnancy and Parenting** I.J. Chasnoff, 2012-12-06 The Interfaces of Perinatal Addiction Ira J Chasnoff In the last few years problems associated with drug use in pregnancy have become endemic As cocaine has become the drug of choice for millions of Americans including pregnant women as AIDS has become more commonly

recognized in women and infants and as legal cases have begun to raise the question of fetal abuse no professional group has come forward to serve as advocate for this special population of substance abusers. Meanwhile however physicians, nurses, social service agencies and public health officials have all been faced with increasing numbers of infants showing the detrimental effects of their mothers' drug use. Although problems of substance abuse in pregnancy have received increasing attention in the medical literature since the early 1970s, there has recently been a very rapid increase in the number of articles published related to this field. The reasons for this new interest are easily understood when current statistics from the National Institute on Drug Abuse are reviewed. 1. Although patterns of abuse of alcohol, marijuana, heroin and other substances by women of childbearing age have changed very little over the last ten years, the incidence of cocaine use in this special population has been rising rapidly, a reflection of cocaine's increasing popularity among the general population of the United States. *Teenage Drug Use*, 1991. Infant Victims of Drug Abuse. United States Congress, Senate, Committee on Finance, 1991. *Treating Alcohol and Drug Abuse*. Mats Berglund, Sten Thelander, Egon Jonsson, 2006-03-06. What are the most promising strategies to treat alcohol and drug abuse? What are their medical implications? Despite the enormous resources spent on treating alcoholism and drug dependence, there is still no satisfactory evaluation of their effectiveness or of the cost of the different alternatives. Programs designed to treat substance abuse should be built on a foundation of evidence-based knowledge. Yet it is almost impossible to cope with the increasing amount of scientific literature. This book thus represents a guide through the myriads of articles. The most comprehensive scientific review of its kind, it presents the findings from more than 1,600 studies on the effectiveness of different treatments. The work also includes a summary of the methods available to intervene against harmful levels of alcohol, with most of the studies making use of the Diagnostic and Statistical Manual of Mental Disorders (DSM) system. The extensive results are arranged in detailed tables which may be searched using the accompanying CD-ROM. Also enclosed are a quality checklist and an extensive glossary explaining more than 70 terms. An invaluable tool for medical researchers, clinicians and doctors, as well as healthcare providers and insurers, allowing them to save major resources by identifying ineffective treatments and being aware of cost-effective alternatives. With a foreword by Henry R. Kranzler, University of Connecticut, USA. **Drug Use in Pregnancy**, Leo Stern, 1984.

Smoking, Drinking, and Drug Use in Young Adulthood, Jerald G. Bachman, Katherine N. Wadsworth, Patrick M. O'Malley, Lloyd D. Johnston, John E. Schulenberg, 2013-06-17. Why do some young adults substantially change their patterns of smoking, drinking or illicit drug use after graduating from high school? In this book the authors show that leaving high school and leaving home create new freedoms that are linked to increases in the use of cigarettes, alcohol, marijuana and cocaine. They also show that marriage, pregnancy and parenthood create new responsibilities that are linked to decreases in drug use. The research is based on more than 33,000 young people followed from high school through young adulthood by the nationwide Monitoring the Future project. Every two years participants reported on their drug use as well as their schooling.

employment military service living arrangements marriages pregnancies parenthood and even their divorces The unique qualities of this research large nationally representative samples follow ups extending up to 14 years beyond high school and multiple approaches to analysis and data presentation allowed the examination of several important influences simultaneously while retaining much of the rich detail encountered in the real world On the whole the results are encouraging suggesting that the potentials for change and improvement during the transition to adulthood are as important as the detrimental effects of problem behavior in adolescence This research is a must read for anyone concerned with how new freedoms and responsibilities impact adolescents young adults and the use of licit and illicit drugs

Treating Drinkers and Drug Users in the Community Tom Waller,Daphne Rumball,2008-04-15 Treating Drinkers and Drug Users in the Community is the second book in a new collection from Addiction Press Addiction Press was set up with the express purpose of communicating current ideas and evidence in this expanding field not only to researchers and practising health professionals but also to policy makers students and interested non specialists These publications are designed to address the significant challenges that addiction presents to modern society The drugs field has undergone a phase of rapid change in recent years and all the non medical treatment interventions for those with alcohol problems and dependence can be equally helpful for drug users This has opened the way for unification of alcohol and drug treatment services at a clinical level with potential for more efficient service provision and for effective interventions which can be readily adopted in a wide range of settings Modern drug and alcohol services and all professionals working with substance users will benefit from the initiatives and procedures discussed in this book Key features Describes a wide range of treatments for young people and adults with drug and alcohol dependence Integrates alcohol and drug prevention and treatment Provides an invaluable and accessible guide for many different professionals Sets out assessment criteria questionnaires and a joint treatment framework

Mothers, Babies, and Cocaine Michael Lewis,Margaret Bendersky,1995 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company

Improving Treatment for Drug-exposed Infants Stephen R. Kandall,1993 *Crack Cocaine, Crime, and Women* Sue Mahan,1996-08-23 Sue Mahan provides an up to date accessible discussion of the issues relevant to the debate on crack cocaine crime and women Following an in depth overview the book offers a broad and informed perspective on the legal lifestyle and treatment issues central to women s addiction to crack cocaine With sensitivity and compassion the author also addresses the tragic consequences of children born to addicted mothers stressing the importance for policy and resources to focus on the mutual well being of mother and child
