women's substance abuse becomes identified as a problem and what happens when they seek help. The author recognizes the centrality of gender and gender relationships and aims to go beyond the traditional view of gender that has been put forward in relation to substance abuse. She explores the complexities of gender as a process and an institution and the subtle ways it infiltrates the lives of users. On a theoretical level, Pamela Raine introduces her ideas into a field where women have traditionally been the underdogs. She offers a thorough account of women's problematic experiences with alcohol and drugs and consciously allows the voices of these women to come through. In turn, these voices are contextualized by key themes. For example, the substances created chaos in the lives of female users while complex mechanisms of social control shaped their gendered experiences of these substances. Help-seeking responses of professionals and the advantages and disadvantages of treatment are contextualized as key areas in these gendered experiences. Finally, Raine makes recommendations matching the results of her research. The reader should learn how gender influences the ways in which users co-ordinate their space, their time, their substances, community resources, and others, whether other users, relatives, families, or carers.

**Women's Drug Use in Everyday Life** Emma Eleonorasdotter, 2023-12-21. This open access book explores the increasing role of psychoactive substances in contemporary everyday life, focussing on women's use. Drawing on an ethnographic study in Sweden, it uses cultural studies and queer phenomenology to analyse the women's narratives of drug use relating to themes that encompass social, legal, cultural, embodied, and gendered perspectives on drugs in the contemporary Western world. It examines topics such as stigma, happiness, children, the body, gifts, the drug market, medication, sickness, and health, and also the orientation of themselves towards others, to social and cultural norms, to drug laws, and to the substances. It discusses how drug-related spaces and directions be analysed in terms of gender and class, and how in turn the directions of contemporary society and culture can be affected by drug use. It speaks to academics in Sociology, Criminology, Ethnology, Gender studies, Law, and History.
