September 23 2005 Trouble had appeared to be Vince Daviss middle name it had seemed like to hardly anything had gone right for him during his second time around in 2005 He had been a fugitive from justice after having escaped from a mental institution where he had been misdiagnosed and treated badly while being wrongfully confined He had straightened out that wrong as well as several other trying and sometimes daunting problems with help from his co workers and the backing of the San Diego Police Chief With the fear of arrest and re committal to an institution gone from his mind the stage had been set for him to prove to the world that what he had claimed he had experienced in 2009 wasnt something he had conjured up in an effort to get attention and that he wasnt crazy although he was beginning to doubt his own sanity at times Then his entire world collapsed and came tumbling down around him like a house of cards which would prove to be more difficult to dig his way out of than anything that had come before      Sentenced to Science Allen M. Hornblum,2015-09-10

From 1951 until 1974 Holmesburg Prison in Philadelphia was the site of thousands of experiments on prisoners conducted by researchers under the direction of University of Pennsylvania dermatologist Albert M Kligman While most of the experiments were testing cosmetics detergents and deodorants the trials also included scores of Phase I drug trials inoculations of radioactive isotopes and applications of dioxin in addition to mind control experiments for the Army and CIA These experiments often left the subject prisoners mostly African Americans in excruciating pain and had long term debilitating effects on their health This is one among many episodes of the sordid history of medical experimentation on the black population of the United States The story of the Holmesburg trials was documented by Allen Hornblum in his 1998 book Acres of Skin The more general history of African Americans as human guinea pigs has most recently been told by Harriet Washington in her 2007 book Medical Apartheid The subject is currently a topic of heated public debate in the wake of a 2006 report from an influential panel of medical experts recommending that the federal government loosen the regulations in place since the 1970s that have limited the testing of pharmaceuticals on prison inmates Sentenced to Science retells the story of the Holmesburg experiments more dramatically through the eyes of one black man Edward Butch Anthony who suffered greatly from the experiments for which he volunteered during multiple terms at the prison This is not only one

black man's highly personal account of what it was like to be an imprisoned test subject but also a sobering reminder that there were many African Americans caught in the viselike grip of a scientific research community willing to bend any code of ethics in order to accomplish its goals and a criminal justice system that sold prisoners to the highest bidder
