Drugs Daydreaming And Personality A Study Of College Youth:

Drugs, Daydreaming, and Personality Bernard Segal, George J. Huba, Jerome L. Singer, 2018-02-06 Originally published in 1980 this book presents a detailed account of a series of investigations that examined the patterns of resort to drugs and alcohol use in college youth and how such substance uses are linked to personality characteristics and daydreaming patterns The Editors chose to emphasize the more private features of the personality because these had often been ignored in earlier research despite popular assumptions that there are close ties between fantasy inwardness spacey qualities all suggesting permanent changes in mental organization and substance use in youth This volume will be of interest to a wider audience than just drug and alcohol researchers because of the effort to go beyond normative patterns of substance use toward explorations of personality and consciousness **NIDA Research Monograph**, 1976 Comprehensive Handbook of Personality and Psychopathology, Adult Psychopathology Frank Andrasik, 2006-01-03 Adult Psychopathology presents an overview of the classification and diagnosis epidemiology genetic sociocultural and biological influences and research and behavioral considerations of psychopathology in adults This state of the art volume also includes the latest research on the major disorders and discusses the three most popular treatment approaches *On the Psychobiology of Personality* Robert M Stelmack, 2004-11-12 Zuckerman received his Ph D in psychology from New York University Graduate School of Arts and Science in 1954 with a specialization in clinical psychology After graduation he worked for three years as a clinical psychologist in state hospitals in Norwich Connecticut and Indianapolis Indiana While in the latter position the Institute for Psychiatric Research was opened in the same medical center where he was working as a clinical psychologist He obtained a position there with a joint appointment in the department of psychiatry This was his first interdisciplinary experience with other researchers in psychiatry biochemistry psychopharmacology and psychology His first research areas were personality assessment and the relation between parental attitudes and psychopathology During this time he developed the first real trait state test for affects starting with the Affect Adjective Check List for anxiety and then broadening it to a three factor trait state test including anxiety depression and hostility Multiple Affect Adjective Check List Later positive affect scales were added Toward the end of his years at the institute the first reports of the effects of sensory deprivation appeared and he began his own experiments in this field These experiments supported by grants from NIMH occupied him for the next 10 years during his time at Brooklyn College Adelphi University and the research labs at Albert Einstein Medical Center in Philadelphia This last job was his second interdisciplinary experience working in close collaboration with Harold Persky who added measures of hormonal changes to the sensory deprivation experiments He collaborated with Persky in studies of hormonal changes during experimentally hypnotically induced emotions During his time at Einstein he established relationships with other principal investigators in the area of sensory deprivation and they collaborated on the book Sensory Deprivation 15 years of research edited by John Zubek 1969 His chapter on theoretical constructs contained the idea of using

individual differences in optimal levels of stimulation and arousal as an explanation for some of the variations in response to sensory deprivation The first sensation seeking scale SSS had been developed in the early 1960 s based on these constructs At the time of his move to the University of Delaware in 1969 he turned his full attention to the SSS as the operational measure of the optimal level constructs This was the time of the drug and sexual revolutions on and off campuses and research relating experience in these areas to the basic trait paid off and is continuing to this day in many laboratories Two books have been written on this topic Sensation Seeking Beyond the Optimal Level of Arousal 1979 Behavioral Expressions and Biosocial Bases of Sensation Seeking 1994 Research on sensation seeking in America and countries around the world continues at an unabated level of journal articles several hundred appearing since the 1994 book on the subject At Play in the Fields of Consciousness Jefferson A. Singer, Peter Salovey, 1999-03 This collection of articles pays homage to the creativity and scientific rigor Jerome Singer has brought to the study of consciousness and play It will interest personality social clinical and developmental psychologists alike Research Issues, 1974 **Drug Abuse Among Minority Youth** National Institute on Drug Abuse, 1993 This monograph is based on the papers and discussions from a technical review on Epidemiologic Drug Abuse Research on Minority Youth Methodological Issues and Recent Research Advances held on July 17 18 1991 in Bethesda MD The technical review was sponsored by the National Institute on Drug Abuse NIDA Title page verso

The Self Psychology of Addiction and its Treatment Richard B. Ulman, Harry Paul, 2013-04-03 In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work provides new ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date *Neurobiology of Behavioral Control in Drug Abuse* National Institute on Drug Abuse. Office of Science, 1986 **Drugs, Crime, and Other Deviant Adaptations** Howard B. Kaplan, 2013-06-29 This volume brings together a sample of the best of the studies that illustrate two recent trends in research on deviant behavior The first of these trends is the investigation of deviant behavior in longitudinal perspective Panels of subjects are followed over long periods of time to establish temporal relationships be

tween deviant behavior and the antecedents and consequences of deviant behavior The second trend in contemporary research on deviance is the recognition of the association among forms of deviant behavior such as violence drug abuse and theft The recognition of the covariation among forms of deviance stimulated questions regarding the nature of the relationships among multiple forms of deviance Is one form of deviant behavior a cause or a consequence of other forms of deviant behavior What variables mediate and moderate such causal relationships Do different forms of deviant behavior have common antecedents and consequences Independent of the foregoing relationships do particular forms of deviant behavior have unique antecedents and consequences The eight original research studies that along with the introduction and overview constitute this volume are based on data drawn from among the most influential longitudinal studies in the general area of deviant behavior These studies variously consider common and pattern specific antecedents and consequences reciprocal influences and intervening and moderating variables in causal relationships among drug use crime and other forms of deviance

Daydreaming and Fantasy (Psychology Revivals) Jerome L. Singer, 2014-06-17 Daydreaming our ability to give to airy nothing a local habitation and a name remains one of the least understood aspects of human behaviour As children we explore beyond the boundaries of our experience by projecting ourselves into the mysterious worlds outside our reach As adolescents and adults we transcend

frustration by dreams of achievement or escape and use daydreaming as a way out of intolerable situations and to help survive boredom drudgery or routine In old age we turn back to happier memories as a relief from loneliness or frailty or wistfully daydream about what we would do if we had our time over again Why is it that we have the ability to alternate between fantasy and reality Is it possible to have ambition or the ability to experiment create or invent without the catalyst of fantasy Are sexual fantasies an inherent part of human behaviour Are they universal healthy destructive Is daydreaming itself destructive Or is it a force which facilitates change and which can even be harnessed to positive advantage In this provocative book originally published in 1975 the product of the previous twenty five years of research the author debates the nature and function of daydreaming in the light of his own experiments As well as investigating what is a normal fantasy life and outlining patterns and types of daydreaming he describes the role of daydreaming in schizophrenia and paranoia examines the fantasies and hallucinations induced by drugs and also the nature of altered states of consciousness in Zen and Transcendental Meditation Among the many topics covered he explains how it is possible to help children enlarge their capacity for fantasy how adults can make positive use of daydreaming and how people on the verge of disturbed behaviour are often unconscious of their own fantasies Advances in scientific methods and new experimental techniques had made it possible at this time to monitor both conscious daydreaming and sub conscious fantasies in a way not possible before Professor Singer is one of the few scientists who have conducted substantial research in this area and it is his belief that the study of daydreaming and fantasy is of great importance if we are to understand the workings of the human mind

Inhibitory Control and Drug Abuse Prevention Michael T. Bardo, Diana H. Fishbein, Richard Milich, 2011-03-30 The purpose of this book is to review our state of knowledge about the neurobehavioral and psychosocial processes involved in behavioral inhibitory processes and to provide an insight into how these basic research findings may be translated into the practice of drug abuse prevention interventions Over the last decade there has been a wealth of information indicating that substance use disorders do not simply reflect an exaggeration of reward seeking behavior but that they also represent a dysfunction of behavioral inhibitory processes that are critical in exercising self control A number of studies have determined that individuals with substance use disorders have poor inhibitory control compared to non abusing individuals In addition the fact that the adolescent period is often characterized by a lack of inhibitory control may be one important reason for the heightened vulnerability for the initiation of drug use during this time Controlled experiments utilizing neuroscience techniques in laboratory animals or neuroimaging techniques in humans have revealed that individual differences in prefrontal cortical regions may underlie at least in part these differences in inhibitory control Although a few excellent journal reviews have been published on the role of inhibitory deficits in drug abuse there has been relatively little attention paid to the potential applications of this work for drug abuse prevention The current book will provide both basic and applied researchers with an overview of this important health relevant topic Since translational research cuts across multiple

disciplines and most readers are not familiar with all of these disciplines the reading level will be geared to be accessible to graduate students as well as to faculty and researchers in the field The book will be organized around three general themes encased within introductory and concluding chapters The first theme will review basic neurobehavioral research findings on inhibition and drug abuse Chapters in this theme will emphasize laboratory studies using human volunteers or laboratory animals that document the latest research implicating a relation between inhibition and drug abuse at both the neural and behavioral levels of analysis The second theme will move the topic to at risk populations that have impulse control problems including children adolescents and young adults The third theme will concentrate on prevention science as it relates to inhibitory control Chapters in this theme will be written by experts attempting to develop and improve prevention interventions by integrating evidence based knowledge about inhibitory control processes In all of the chapters writers will be asked to speculate about innovative approaches that may be useful for the practice of prevention

Assessment Strategies for Cognitive-Behavioral Interventions Philip C. Kendall, Steven D. Hollon, 2013-09-25 Assessment Strategies for Cognitive Behavioral Interventions is a collection of original contributions provided by leaders in the field who consider the theoretical and applied assessment issues related to the expanding field of cognitive behavioral interventions Chapters in the present volume designed as a companion volume to an earlier text Cognitive Behavioral Interventions Theory Research and Procedures focus on the issues inherent in the measurement of cognitive and behavioral events and processes The book opens with an overview of recent growth in the field Attention is devoted to examining several goals of the new assessment endeavors some suggestions related to the proposed methods and certain problems inherent in cognitive behavioral assessments Separate chapters follow that deal directly with a variety of specific content areas These include a conceptualization of attributions as well as describing their measurement and speculating as to their role in both the etiology and treatment of psychological disturbance and suggestions for assessment in clinical interviews and for using psychometric instruments and discusses belief systems and irrationality Subsequent chapters focus on special populations and procedures

Predicting Adolescent Drug Abuse Dan J. Lettieri, 1975 **Individual Differences in Conscious Experience**

Robert G. Kunzendorf, Benjamin Wallace, 2000-02-15 Individual Differences in Conscious Experience is intended for readers with philosophical psychological or clinical interests in subjective experience It addresses some difficult but important issues in the study of consciousness subconsciousness and self consciousness The book s fourteen chapters are written by renowned pioneering researchers who collectively have published more than fifty books and more than one thousand journal articles The editors introductory chapter frames the book s subtext that mind brain theories embodying the constraints of individual differences in subjective experience should be given greater credence than nomothetic theories ignoring those constraints The next five chapters describe research and theory pertaining to individual differences in conscious sensations specifically individual differences in pain perception phantom limbs gustatory sensations and mental imagery Then two succeeding

chapters focus on individual differences in subconsciousness The final six chapters address individual differences in altered states of self consciousness dreams hypnotic phenomena and various clinical syndromes Series B Handbook of Research in Entrepreneurship Education Alain Fayolle, 2007-01-01 The Handbook of Research in Entrepreneurship Education is well worth reading and both editions are excellent volumes for all of us involved and interested in the debate on how to bring entrepreneurship education forward and whether to create a distinctive domain of entrepreneurship studies Domingo Ribeiro Soriano Academy of Management Learning Education a commendable source of reference for entrepreneurship education researchers and practitioners alike and would make a worthy addition to a library's collection David Douglas International Journal of Entrepreneurial Behaviour and Research In this the second volume of the Handbook of Research in Entrepreneurship Education leading international scholars highlight the unique characteristics and rich variety of research in entrepreneurship education They adopt several different perspectives focusing on key issues and significant developments in the field and highlighting emergent new insights The 35 contributors span 11 countries and three continents demonstrating not only the richness but also the complexity of the field in terms of culture geography and institutional ethical and political systems The Handbook is intended to collectively assist entrepreneurship educators in developing new programmes and pedagogical approaches that take into account the richness and diversity of these multiple perspectives Highlighting the unique characteristics of research in entrepreneurship education this Handbook will be of great interest to entrepreneurship researchers academics and students wishing to understand the unique notions of entrepreneurship education and entrepreneurial learning which are often quite distinct from current practical views The companion volume Handbook of Research in Entrepreneurship Education Volume 1 A General Perspective showcases the nature and benefits of the new wave in entrepreneurship education emerging as a result of revised academic programmes developed to reflect new forms of entrepreneurship
