*Drugs, Lipid Metabolism, and Atherosclerosis* David Kritchevsky, 2012-12-06 This volume comprises the proceedings of the sixth International Symposium on Drugs Affecting Lipid Metabolism Since the first of these symposia in 1960 these triennial meetings have been devoted to the exploration of new ideas new data and new concepts related to lipid metabolism and atherosclerosis The sixth Meeting was particularly stimulating in this regard The concept of the protective action of HDL was thoroughly explored within the framework of its molecular biology with data on its epidemiological as well as its in vitro mechanisms of action being discussed The action of drugs on arterial and HDL metabolism was also discussed as were newer aspects of platelet aggregation especially as related to prostaglandins New ground was also broken in discussions of lipid mobilization and mechanisms of hypocholesteremia We are indebted to the many organizations who contributed generously to the support of this meeting Among the sponsors the assistance of the Lorenzini Foundation was especially helpful As in all meetings of this type the hard work of the local organizing committee was instrumental in its success We are grateful to Mrs Caroline Hyatt and Mr Ralph Hollerorth for their invaluable help in the secretariat We are also deeply indebted to Miss Jane T Kolimaga for her expert assistance in the preparation of this volume David Kritchevsky Rodolfo Paoletti William L Holmes vii Contents LIPOPROTEINS AND DRUGS Lipoprotein Metabolism New Insights from Cell Biology 3 D Steinberg Lipoprotein Metabolism in Man *Drugs, Lipid Metabolism, and Atherosclerosis* David

Drugs Affecting Lipid Metabolism VIII David Kritchevsky, 2012-12-06 The Proceedings of the Eight International Symposium on Drugs Affecting Lipid Metabolism 8th D A L M is the subject of this volume Since the first symposium in 1960 each successive meeting has broken new ground in the field of pharmacological control of lipid levels offering new and stimulating insights and exposing the audience to the state of the art The field has progressed sufficiently to permit discussion of the cellular biology of atherosclerosis The opening session was devoted to pathology macrophages lipoproteins and their receptors and cholesterol ester metabolism Because of the recent emergence of new apolipoprotein technology a workshop devoted solely to apolipoprotein methodology was introduced followed by a plenary session devoted to their metabolism and structure Another rapidly developing area of atherosclerosis research is non invasive assessment of this condition Accordingly a session was devoted to new techniques for this research modality The final plenary sessions were devoted to the roles of drugs and diet in atherosclerosis cause treatment and mechanisms of action The meeting was summarized by Dr O J Pollak one of the founding fathers of this field There were nine sessions of proffered papers whose abstracts appear in this volume In addition special workshops to be reported elsewhere were devoted to several drugs including Oiyzanol Probucol and Etofibrate **Drugs Affecting Lipid Metabolism** Alberico L. Catapano, Antonio M. Gotto Jr., Louis C. Smith, Rodolfo Paoletti, 2012-12-06 A great deal of experimental clinical and epidemiological data have been

gathered to confirm the strict and causal correlation between plasma lipoproteins and coronary heart disease. However, as usually happens in research, many more interesting issues are being studied, opening new fields of research for the future. These new advances together with the combined efforts of cell biologists and lipoprotein chemists have set the pace for an exciting period of research and clinical applications of diets and drugs affecting plasma and cell lipids. This volume, which includes the work of many of the leading world laboratories, represents an authoritative and up-to-date appraisal of the status of the art and a stimulus to future research at the laboratory and clinical level in a fascinating area of clinical and preventive medicine.
