

DUAL DIAGNOSIS TREATMENT

Dual diagnosis treatment is a type of integrated treatment that addresses the co-occurrence of **substance abuse** or addiction and **mental health disorders** in an individual. This approach recognizes that these conditions often occur together and that they can be interrelated, and thus, require simultaneous treatment to achieve long-term recovery. Dual diagnosis treatment typically involves a multidisciplinary team of healthcare professionals who work together to develop a personalized treatment plan for the individual, which may include medications, therapy, support groups, and other interventions aimed at promoting physical, emotional, and psychological well-being. The ultimate goal of dual diagnosis treatment is to help individuals achieve and maintain sobriety and improve their overall quality of life.
