The Politics of Species Raymond Corbey, Annette Lanjouw, 2013-09-05 The assumption that humans are cognitively and morally superior to other animals is fundamental to social democracies and legal systems worldwide It legitimises treating members of other animal species as inferior to humans The last few decades have seen a growing awareness of this issue as evidence continues to show that individuals of many other species have rich mental emotional and social lives Bringing together leading experts from a range of disciplines this volume identifies the key barriers to a definition of moral respect that includes nonhuman animals It sets out to increase concern empathy and inclusiveness by developing strategies that can be used to protect other animals from exploitation in the wild and from suffering in captivity The chapters link scientific data with normative and philosophical reflections offering unique insight into controversial issues around the ethical political and legal status of other species **Becoming Animal** Nato Thompson, 2005-06-17 Contemporary artists investigate the

boundaries between animal and human in a world of transgenics and dissolving distinctions with 65 color images of new works In an age when scientists say they can no longer specify the exact difference between human and animal living and dead many contemporary artists have chosen to use animals in their work as the ultimate other as metaphor as reflection The attempt to discover what is animal not surprisingly leads to a greater understanding of what it means to be human In *Becoming Animal* 12 internationally known artists investigate the shifting boundaries between animal and human Their explorations may be a barometer of things to come The works included in *Becoming Animal* which accompanies an exhibit at MASS MoCA range from the aviary and cabinet of curiosities of Mark Dion to the gun toting bird collages of Michael Oatman Nicolas Lampert's machine animal collages and Jane Alexander's corpse like humanoids suggest a new landscape of alienation Rachel Berwick's investigation of the last Galapagos tortoise from the island of Pinto and Brian Conley's humanized mating call of the Tungara frog question the divide between human and animal communication Patricia Piccinini imagines a bodyguard for a bird on the edge of extinction and Ann Sofi Siden recreates the bedroom and paranoia of psychologist Alice Fabian Natalie Jeremijenko presents another installment in her ongoing Ooz reverse engineering the zoo and Kathy High's installation of trans animals remembers lab rats who have given their lives for science Sam Easterson's videos allow us to see from the viewpoint of an aardvark a tarantula a tumbleweed Motohiko Odani's films show a surrealistic genetically modified bestiary *Becoming Animal* documents these works with eye popping full color images taking us on a visual journey through an unknown world **Agricultural Library Notes** ,1938 Wisconsin Library Bulletin ,1931

The Ecology of Invasions by Animals and Plants Charles S. Elton,2020-03-10 Elton sought to articulate more explicitly his vision of an entire field of invasion science The 1958 book aimed at an educated lay audience was almost wholly descriptive dominated by striking examples of the nature and scope of particular invasions beginning with the seven examples detailed in Chapter 1 From the materials in the proof copy and other sources we can imagine a new edition would also have targeted biologists and been somewhat more technical and prescriptive In autobiographical notes he penned near the end of his life Elton wrote regarding EIAP This whole subject has deep significance for the study of plant and animal communities and their balance or unbalance 19 and indeed many of the reprints and notes refer to interactions among species and community wide effects *Library of Congress Subject Headings: P-Z* Library of Congress.
