The Animals Came in One by One Muriel Crommelin Brown, 19?? Rudyard Kipling Ultimate Short Story Collection: 440+ Short Stories in One Volume Rudyard Kipling, 2023-12-06 Rudyard Kipling's Ultimate Short Story Collection offers a comprehensive anthology of 440 short stories that showcase the author's remarkable versatility and mastery of the craft. Spanning genres from fantasy to realism, this collection delves into themes of imperialism, morality, and the complexities of human nature, all rendered through Kipling's distinct narrative style, rich in vivid descriptions and captivating dialogue. Set against the backdrop of the British Empire, these stories not only reflect the social and political currents of the time but also demonstrate Kipling's ability to portray diverse cultures and the intricacies of personal relationships. Rudyard Kipling, 1865-1936, a Nobel laureate in Literature, was profoundly influenced by his formative years in India and his extensive travels through British colonial territories. His experiences infused his storytelling with authenticity, as he often drew from the folklore, customs, and complexities of the societies he encountered. Kipling's extensive body of work, including celebrated titles like *The Jungle Book* and *Kim*, solidifies his reputation as a pivotal figure in English literature, capable of illuminating the human experience with both sensitivity and humor. This collection is a treasure trove for readers seeking to explore Kipling's rich narrative world. It serves as both an introduction for newcomers and a comprehensive resource for seasoned fans. Animals, Machines, and AI Erika Quinn, Holly Yanacek, 2021-11-08 Sentient animals, machines, and robots abound in German literature and culture, but there has been surprisingly limited scholarship on non-human life forms in German studies. This volume extends interdisciplinary research in emotion studies to examine non-humans and the affective relationships between humans and non-humans in modern German cultural history. In recent years, fascination with emotions, developments in robotics, and the burgeoning of animal studies in and beyond the academy have given rise to questions about the nature of humanity. Using sources from the life sciences, literature, visual art, poetry, philosophy, and photography, this collection interrogates not animal or machine emotions per se, but rather uses animals and machines as lenses through which to investigate human emotions and the affective entanglements between humans and non-humans. The COVID-19 pandemic made us more keenly aware of the importance of both animals and new technologies in our daily lives, and this volume ultimately sheds light on the centrality of non-humans in the human emotional world and the possibilities that relationships with non-humans offer for enriching that world.
