Animals In Education:

Animals in Education Joanne Dade, 1988-01-01 How Animals Help Students Learn Nancy R. Gee, Aubrey H. Fine, Peggy McCardle, 2017-03-27 How Animals Help Students Learn summarizes what we know about the impact of animals in education and synthesizes the thinking of prominent leaders in research and practice. It is a much needed resource for mental health and education professionals interested in incorporating animals in school based environments, one that evaluates the efficacy of existing programs and helps move the field toward evidence based practice. Experts from around the world provide concrete examples of how animals have been successfully incorporated into classroom settings to achieve the highest level of benefit while also ensuring the health and welfare of the students and animals involved. **Animals in Literary Education** John Drew, 2025-09-24 This book examines the complicated place of animals in literary analysis and education and shows how an ethically engaged approach to animals representation could be pursued to challenge anthropocentrism and cultivate multispecies empathy. Other species are represented in the literary education canon including farmed animals. Yet the animals are typically anthropomorphized to guide students toward humanist readings and away from consideration of animals experiences or subjectivities. This reproduces the idea that animals are mere objects meant to be exploited for human purposes even metaphorical and educational ones. John Drew develops the term anthropo allegory to capture and critique the process through which students are taught to read animal literary representations exclusively as symbolic analogues for humans and human themes. The concept serves as an analytical lens for critically interrogating significant texts taught across educational levels and exposing the deeply engrained educational anthropocentrism that silences animal issues even when animals are represented. Crucially, Drew identifies texts and pedagogical strategies that can help cultivate a literary educational animal ethic that simultaneously encourages analytical rigour and multispecies concern. *Animals and Science Education* Michael P. Mueller, Deborah J. Tippins, Arthur J. Stewart, 2017-06-15 This book discusses how we can inspire today's youth to engage in challenging and productive discussions around the past, present and future role of animals in science education. Animals play a large role in the sciences and science education and yet they remain one of the least visible topics in the educational literature. This book is intended to cultivate research topics, conversations and dispositions for the ethical use of animals in science and education. This book explores the vital role of animals within science education: specimens, protected species and other associated issues with regards to the role of animals in science. Topics explored include ethical curriculum and pedagogical dimensions involving invertebrates, engineering solutions that contribute to ecosystems, the experiences of animals under our care, aesthetic and contemplative practices alongside science, school based ethical dialogue, nature study for promoting inquiry and sustainability, the challenge of whether animals need to be used for science, whatsoever, reconceptualizing museum specimens, cultivating socioscientific issues and epistemic practice, cultural integrity and citizen science, the care and nurturance of gender.

balanced curriculum choices for science education and theoretical conversations around cultivating critical thinking skills and ethical dispositions The diverse authors in this book take on the logic of domination and symbolic violence embodied within the scientific enterprise that has systematically subjugated animals and nature and emboldened the anthropocentric and exploitative expressions for the future role of animals At a time when animals are getting excluded from classrooms too dangerous too many allergies too dirty this book is an important counterpoint Interacting with animals helps students develop empathy learn to care for living things engage with content We need more animals in the science curriculum not less David Sobel Senior Faculty Education Department Antioch University New England **Animals in Education** Lisa Ann Hepner,1994 **Animals in Environmental Education** Teresa Lloro-Bidart,Valerie S. Banschbach,2019-01-04 This book explores interdisciplinary approaches to animal focused curriculum and pedagogy in environmental education with an emphasis on integrating methods from the arts humanities and natural and social sciences Each chapter whether addressing curriculum pedagogy or both engages with the extant literature in environmental education and other relevant fields to consider how interdisciplinary curricular and pedagogical practices shed new light on our understandings of and ethical moral obligations to animals Embracing theories like intersectionality posthumanism Indigenous cosmologies and significant life experiences and considering topics such as equine training meat consumption and production urban human animal relationships and zoos and aquariums the chapters collectively contribute to the field by foregrounding the lives of animals The volume purposefully steps forward from the historical marginalization of animals in educational research and practice

Animal Rights Education Kai Horsthemke,2018-09-27 This book explores how the ethical treatment and status of other than human animals influence pedagogy teaching and learning in general aiming to fill what has been a gap in the philosophy of education It examines key trends in this regard including environmental education humane education posthumanist education ecopedagogy critical animal pedagogy critical animal studies animal standpoint theory and vegan education The book discusses animal minds and interests and how animals have been accommodated in moral theory Further it investigates whether anti racist and anti sexist education logically entail anti speciesist education and closes by proposing animal rights education as a viable and sound alternative a pedagogy that does justice not only to animals in general and as species but also to individual animals If animal rights education is philosophically and educationally meaningful then it can arguably offer a powerful pedagogical tool and facilitate lasting pro animal changes **Education for Animal Welfare** Edward N. Eadie,2011-04-08 This book deals with the role of education in improving animal welfare and reducing animal suffering inflicted by humans It embraces situations in which humans have direct control over animals or interfere directly with them but it considers also indirect animal suffering resulting from human activities Education is regarded in the broad sense of creating awareness and facilitating change First consideration is given to a number of specific themes in which education can make an important contribution towards reducing animal suffering and subsequently an examination is made of a

number of interrelated contexts in which education can address the various themes The considered educational themes are animal suffering and sentience that have both scientific and moral aspects human discrimination against animals known as speciesism and the need for attitudinal change by humans role and existing limitations of legislation in providing protection to animals matter of enforcement of animal protection legislation achievement of reform to improve animal protection by legislative and other means training of professionals carers and users involved with animals to provide better protection the scope for science to contribute to improved animal protection animal protection as a regional and international issue

Undisciplined Animals Pär Segerdahl, 2011-05-25 Animal studies is not a discipline of its own but emerged simultaneously within many disciplines such as sociology geography biology art history education research philosophy anthropology film studies political science and gender research Animal studies stands for a transformed way of doing scholarly work always through the lens of the human animal relationship If anything keeps the field together it is the productive incoherence that it creates wherever it challenges human centred modes of work What does it mean to do animal studies Due to the essential undisciplinarity of the field a traditional textbook approach could not answer the question *Undisciplined Animals* is a series of confessions this is how I and my basic outlook changed through the efforts of unruly animals neither of us happily adapting to human centred perspectives The hope is that readers will recognize the same productive tensions in their own work that the book will help them use these tensions and not hide them as breaches of disciplinary rules *Undisciplined Animals* is a collection of invitations to animal studies addressed to emerging scholars in a variety of fields who want to see how animal studies can vitalize work in their disciplines The chapters are intersected by short interludes that describe an experience a notion or a thought that secretly drives the author's work These interludes reveal animal studies to transgress not only disciplinary borders but also borders between the academic and the personal The Educational Significance of Human and

Non-Human Animal Interactions Suzanne Rice, A. G. Rud, 2014-01-14 The lives of animals and humans are deeply intertwined and mutually influencing In recent years there has been a growing appreciation of ways in which the interactions of human animals and non human animals matter educationally This book seeks to contribute to the ongoing conversation about animals and education

Ethical and Moral Issues Relating to Animals Janice C. Swanson, 1992 **Animals as Experiencing Entities** Michael J. Glover, Les Mitchell, 2024-03-04 This volume explores the experiences of those with little or no power usually although not exclusively animals The theme of animals as experiencing entities is what links the chapters and characterises the volume Broadly each author in this volume contributes in one of two ways The first group in Section 1 theoretically engages animal subjectivity animal experiences and ways in which these are to some extent accessible and knowable to humans The second group of authors in Section 2 offer narrative accounts about specific animals or groups of animals and explore to some extent their subjective historical experiences In summary the first section diversely theorises about animal experiences while the second section's authors assume animals subjective experiences and construct narratives

that take into account how animals might have subjectively experienced historical phenomena **Animals in School Programs** Victoria. Education Department. Science Centre,1985 Common School Education and Teachers World ,1891

climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals
