The Bereaved Child Alan Wolfelt, 2013-12-19 First published in 1996 One spring morning a gardener noticed an unfamiliar seedling poking through the ground near the rocky untidy edge of his garden So begins the parable that sets the tone for this inspiring heartfelt new book for caregivers to bereaved children By comparing grief counseling to gardening Dr Wolfelt frees caregivers of the traditional medical model of bereavement care which implies that grief is an illness that must be cured He suggests that caregivers instead embrace a more holistic view of the normal natural and necessary process that is grief He then explores the ways in which bereaved children can not only heal but grow through grief Healing the Bereaved Child also contains chapter after chapter of practical caregiving guidelines How a grieving child thinks feels and mourns What makes each child's grief unique How the bereaved child heals the six needs of mourning Foundations of counseling bereaved children Counseling techniques play art writing nature and many others more than 15 pages A family systems approach to counseling Support groups for bereaved kids including a 10 session model Helping grieving children at school including a crisis response team model Helping the grieving adolescent Self care for the child's bereavement caregiver A must read for child counselors hospice caregivers funeral directors school counselors and teachers clergy parents anyone who wants to offer support and companionship to children affected by the death of someone loved **Educational Leadership**, 1973

Students with Cancer National Cancer Institute (U.S.), 1980 **Children Mourning, Mourning Children** Kenneth J. Doka, 2014-01-21 Based on the Hospice Foundation of America's second annual teleconference this book explores three basic themes in children's grief Firstly it maintains that children are always developing therefore their understanding of death and their reactions to illness and loss are also multifaceted and constantly undergoing change Secondly children grieve in ways that are both different from and similar to adults While they may need different therapeutic approaches from their elders each loss is different and the grief experience will be affected by many of the same factors that affect adults Thirdly it holds that they need significant support as they grieve Talking to children about loss and illness is too important to wait until a crisis rather it is essential to provide opportunities to discuss loss in times that are not so Emotionally Laden This Book Aims To Demonstrate That Open Communication between parents and children will lead to skills and understanding that are essential to the child for coping with loss and reaffirming that death is part of the process of living **Discussing Death** Gretchen C.
