for future research and teaching *Reading Globally, K-8* Barbara A. Lehman, Evelyn B. Freeman, Patricia L. Scharer, 2010-09-20 In *Reading Globally K 8* the authors make the case for why it is necessary to be globally literate and multiculturally aware in today's shrinking world and they provide the tools teachers need to incorporate appropriate reading selections into primary and secondary school classrooms. By using books from or about other countries, teachers empower students to view the world in a more positive manner, enriching and broadening their students' lives and ultimately preparing them for life in a global economy and culture. This reader-friendly resource guides teachers and reading programme coordinators in selecting quality books for their classrooms, incorporating global literature into different content areas and facilitating the discussions that follow. Practical guidance is provided on how to integrate the reading of global texts across the curriculum with specific application to language arts, social studies, science, maths and the arts. Locate and evaluate the authenticity and literary merit of potential books, avoiding those that depict stereotypes. Get started with an annotated list of children's books, samples of student work and classroom vignettes from teachers.

Inventing a Classroom Kathryn F. Whitmore, Caryl G. Crowell, 1994 What are the patterns of teaching and learning that make a classroom holistic? How do children invent oral and written language? How do they create the culture and curriculum of a classroom? How does the spirit of community and collaboration develop among children and teachers? What are the relationships between literacy, schooling and socialization as they form among the children? These are a few of the broad questions that Kathy Whitmore and Caryl Crowell answer in this absorbing portrait of Caryl's third-grade classroom, the Sunshine Room. Over the span of a school year, we watch the students in this bicultural classroom, within a bilingual working-class neighborhood, work and develop together as a community of learners. It is the story of how the Sunshine Room, like many whole language classrooms, invents itself and how, in this process, the children themselves are continually inventing oral and written language, culture and curriculum. In two separate collaborative voices, the authors carry readers through several critical events in the life of the classroom: the process through which the children and the teachers negotiate the curriculum; the creation of a theme study about the Middle Ages and a vicarious experience of the Middle East war through children's literature and discussions. On an individual level, the deep friendship between Seaira, an English-speaking child from the volunteer community, and Lolita, a bilingual Latina from the barrio, is symbolic of the bicultural experience fostered in the Sunshine Room.

Crossover Picturebooks Sandra L. Beckett, 2013-06-17 This book situates the picturebook genre within the widespread international phenomenon of crossover literature examining an international corpus of picturebooks including artists books wordless picturebooks and celebrity picturebooks that appeal to readers of all ages Focusing on contemporary picturebooks

Sandra Beckett shows that the picturebook has traditionally been seen as a children's genre but in the eyes of many authors, illustrators and publishers it is a narrative form that can address any and all age groups. Innovative graphics and formats as well as the creative often complex dialogue between text and image provide multiple levels of meaning and invite readers of all ages to consider texts that are primarily marketed as children's books. The interplay of text and image that distinguishes the picturebook from other forms of fiction and makes it a unique art form also makes it the ultimate crossover genre. Crossover picturebooks are often very complex texts that are challenging for adults as well as children. Many are characterized by difficult adult themes, genre blending, metafictional discourse, intertextuality, sophisticated graphics and complex text-image interplay. Exciting experiments with new formats and techniques as well as novel interactions with new media and technologies have made the picturebook one of the most vibrant and innovative contemporary literary genres, one that seems to know no boundaries. Crossover Picturebooks is a valuable addition to the study of a genre that is gaining increasing recognition and appreciation and contributes significantly to the field of children's literature as a whole.

Money and the Church in Medieval Europe, 1000-1200 Giles E. M. Gasper, Svein H. Gullbekk, 2016-03-09. Bringing together essays from experts in a variety of disciplines, this collection explores two of the most important facets of life within the medieval Europe: money and the church. By focusing on the interactions between these subjects, the volume addresses four key themes. Firstly, it offers new perspectives on the role of churchmen in providing conceptual frameworks from outright condemnation to sophisticated economic theory for the use and purpose of money within medieval society. Secondly, it discusses the dichotomy of money for the church and its officers: on one hand, voices emphasise the moral difficulties in engaging with money; on the other, the reality of the ubiquitous use of money in the church at all levels and in places within Christendom. Thirdly, it places in dialogue interdisciplinary perspectives and approaches and evidence from philosophy, history, literature and material culture to the issues of money and church. Lastly, the volume provides new perspectives on the role of the church in the process of monetization in the High Middle Ages. Concentrating on northern Europe from the early eleventh century to the beginning of the thirteenth century, the collection is able to explore the profound changes in the use of money and the rise of a money economy that this period and region witnessed. By adopting a multi-disciplinary approach, the collection challenges current understanding of how money was perceived, understood and used by medieval clergy in a range of different contexts. It furthermore provides wide-ranging contributions to the broader economic and ethical issues of the period, demonstrating how the church became a major force in the process of monetization.

Words about Pictures Perry Nodelman, 1990-08-01. A pioneering study of a unique narrative form, Words about Pictures examines the special qualities of picture books: books intended to educate or tell stories to young children. Drawing from a number of aesthetic and literary sources, Perry Nodelman explores the ways in which the interplay of the verbal and visual aspects of picture books conveys more narrative information and stimulation than either medium could achieve alone. Moving from baby books

alphabet books and word books to such well known children's picture books as Nancy Ekholm Burkert's *Snow White and the Seven Dwarfs* Gerald McDermott's *Arrow to the Sun* Maurice Sendak's *Where the Wild Things Are* and Chris Van Allsburg's *The Garden of Abdul Gasazi* Nodelman reveals how picture book narrative is affected by the exclusively visual information of picture book design and illustration as well as by the relationships between pictures and their complementary texts
