Thomas Lane,Artis Pabriks,Aldis Purs,David J. Smith,2013-11-05 Since the end of the Cold War there has been an increased interest in the Baltics The Baltic States brings together three titles Estonia Latvia and Lithuania to provide a comprehensive and analytical guide integrating history political science economic development and contemporary events into one account Since gaining their independence each country has developed at its own pace with its own agenda and facing its own obstacles The authors examine the tensions accompanying a post communist return to Europe after the long years of separation and how each country has responded to the demands of becoming a modern European state Estonia was the first of the former Soviet republics to enter membership negotiations with the European Union in 1988 and is a potential candidate for the next round of EU expansion in 2004 Lithuania and Latvia have also expressed their desire for future membership of NATO and the EU **Estonia** David Smith,2013-12-16 In 1998 Estonia became the first of the former Soviet republics to enter membership negotiations with the European Union Since then it has been hailed as the model pupil

amongst the current applicants This study traces the remarkable reforms that have propelled Estonia from the USSR to the threshold of the EU in less than a decade The work also explores the tensions inherent in the concept of a postcommunist return to Europe Since 1991 membership of western transnational organizations has been consistently portrayed as the best guarantee of Estonia s independence Yet the membership criteria imposed by these organizations have frequently conflicted with the nationalist priority of restoring a sovereign Estonian nation state At the same time Estonia s geopolitically sensitive location poses a dilemma for the West thereby ensuring that the country will remain the litmus test not just of Russia s intentions towards Europe but of the New Europe as a whole

The New Fiscal Sociology Isaac William Martin,Ajay K. Mehrotra,Monica Prasad,2009-07-13 This volume presents sixteen essays by comparative historical scholars who offer a survey of the new fiscal sociology

The Research Process Myrtle S. Bolner,Gayle A. Poirier,2002 Many of the assignments you receive as part of your experience in higher education will require you to use the library for research To do this you must become familiar with its collections and services You may be familiar

with your high school or public library You will find however that the college or university library is more complex and often larger than the library with which you may be familiar It probably provides a greater variety of services and it may use a different scheme for classifying its materials Over the last two decades technology has drastically changed the way we think of libraries For many the traditional notion of libraries as storehouses for books has been replaced by the image of a virtual library that is a library in which all the information is available electronically In this image if a building exists at all it is only to house computers and to provide a laboratory in which librarians acting as information specialists are engaged in creating information in digital format Neither the traditional notion of a library as a storehouse for books nor the image of a virtual library is entirely true today However there is a certain amount of validity in each of these images The library you are using probably no longer has a card catalog In most academic libraries the card catalog has been replaced by an online catalog Many libraries have canceled paper subscriptions to indexes and abstracts replacing them with electronic versions Although libraries have gotten rid of their card catalogs in favor of online catalogs and subscribe to online databases and other resources in electronic format they continue to retain and purchase materials in traditional formats paper microfiche microfilm video cassette and the like And while it is true that technology has improved the ways we retrieve information it has also added levels of complexity College and university libraries offer a variety of

World Government by Stealth G. Arnold, 1997-08-06 Since its creation the UN has been beset by the big power rivalries of the Cold War which too often made it ineffective Despite this it has two major achievements to its credit The first is to have made itself the spokesman and champion of the Third World or South the world's dispossessed and marginalised The second always to undertake tasks in international peacekeeping so that it has gradually come to be seen as indispensable if we are to attain any form of world government
