Annual List of Books Added to the Public Library of Cincinnati Public Library of Cincinnati and Hamilton County,1890 Ulrich's Periodicals Directory ,1989 Whitaker's Books in Print ,1998 *Thinking Through Twentieth-Century Architecture* Nicholas Ray,2023-02-08 Shortlisted for the Architectural Book Awards 2024 *Thinking Through Twentieth Century Architecture* connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been

specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one strand of thinking or style of architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions It pursues the history of European and American architecture chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students "The" Athenaeum ,1840

Guido,Stephanie Pilat,Angela Person,2020-01-28 Like America itself the architecture of the United States is an amalgam an imitation or an importation of foreign forms adapted to the natural or engineered landscape of the New World So can there be an American School of architecture The most legitimate claim to the title emerged in the 1950s and 1960s at the Gibbs College of Architecture at the University of Oklahoma where under the leadership of Bruce Goff Herb Greene Mendel Glickman and others an authentically American approach to design found its purest expression teachable in its coherence and logic Followers of this first truly American school eschewed the forms most in fashion in American architectural education at the time those such as the French Beaux Arts or German Bauhaus Schools in favor of the vernacular and the organic The result was a style distinctly experimental resourceful and contextual challenging not only established architectural norms in form and function but also traditional approaches to instructing and inspiring young architects Edited by Luca Guido Stephanie Pilat and Angela Person this volume explores the fraught history of this distinctively American movement born on the Oklahoma prairie Renegades features essays by leading scholars and includes a wide range of images including rare never before published sketches and models Together these essays and illustrations map the contours of an American architecture that combines this country s landscape and technology through experimentation and invention assembling the diversity of the United States into structures of true beauty Renegades for the first time fully captures the essence and conveys the importance of the American School of architecture **Books and Reading** Noah Porter,1883
