Meat Simon Fairlie, 2010

Meat A Benign Extravagance is a groundbreaking exploration of the difficult environmental ethical and health issues surrounding the human consumption of animals Garnering huge praise in the UK this is a book that answers the question should we be farming animals or not Not a simple answer but one that takes all views on meat eating into account It lays out in detail the reasons why we must indeed decrease the amount of meat we eat both for the planet and for ourselves and yet explores how different forms of agriculture including livestock shape our landscape and culture At the heart of this book Simon Fairlie argues that society needs to re orient itself back to the land both physically and spiritually and explains why an agriculture that can most readily achieve this is one that includes a measure of livestock farming It is a well researched look at agricultural and environmental theory from a fabulous writer and a farmer and is sure to take off where other books on vegetarianism and veganism have fallen short in their global scope Higher Education in Ethiopia Tebeje
