Annual Review of Anthropology William H. Durham, 1998-10 **Annual Review of Anthropology** Bernard J. Siegel, 1990 Annual compilation of critical articles from all areas of the discipline of anthropology Annual Review of Anthropology , 1994-10 Annual compilation of critical articles from all areas of the discipline of anthropology **Linguistics: The Cambridge Survey: Volume 4, Language: The Socio-Cultural Context** Frederick J. Newmeyer, 1988 This survey aims to provide a comprehensive introduction to current research in all branches of the field of linguistics from syntactic theory to ethnography of speaking from signed language to the mental lexicon This volume concentrates on sociolinguistics and allied fields **Bibliographie Internationale D'anthropologie Sociale Et Culturelle** International Committee for Social Science Information and Documentation, 1986-11-20 First published in 1986 Routledge is an imprint of Taylor Francis an informa company **Anthropology and Epidemiology** C. Janes, R. Stall, S.M. Gifford, 2012-12-06 Over the past two decades increasing interest has emerged in the contributions that the social sciences might make to the epidemiological study of patterns of health and disease Several reasons can be cited for this increasing interest Primary among these has been the rise of the chronic non infectious diseases as important causes of morbidity and mortality within Western populations during the 20th century Generally speaking the chronic non infectious diseases are strongly influenced by lifestyle variables which are themselves strongly influenced by social and cultural forces The understanding of the effects of the behavioral factors in say hypertension thus requires an understanding of the social and cultural factors which encourage obesity a sedentary lifestyle non compliance with anti hypertensive medications or other prescribed regimens and stress Equally there is a growing awareness that considerations of human behavior and its social and cultural determinants are important for understanding the distribution and control of infectious diseases Related to this expansion of epidemiologic interest into the behavioral realm has been the development of etiological models which focus on the psychological biological and socio cultural characteristics of hosts rather than exclusive concern with exposure to a particular agent or even behavioral risk Also during this period advances in statistical and computing techniques have made accessible the ready testing of multivariate causal models and so have encouraged the measurement of the effects of social and cultural factors on disease occurrence The American Experience with Alcohol G.M. Ames, L.A. Bennett, 2013-11-11 This volume is an important contribution to our understanding of culture and alcohol in the United States Its appearance is also a milestone in the history of alcohol studies in American anthropology Over the last six years the volume's editors initially along with Miriam Rodin have served as the coorganizers of the Alcohol and Drug Study Group of the American Anthropological Association AAA In this capacity they have organized sessions at the AAA and other meetings greatly strengthened the research network with a regular and informative newsletter and painstakingly promoted the publication of anthropological work on alcohol and drugs Appearing just as the responsibility for the Study Group is passed on to others this book is a

fitting emblem of the care and energy with which its editors have built an institutional nexus for alcohol and drug anthropology in North America The contents of this volume offer a uniquely wide sampling of the diversity of cultural patterns that make up the American experience with alcohol The collective portrait the editors have assembled extends in several dimensions through time and history across such social differentiations as gender age grade and social class and through such major social institutions as the church and the family Clearly the dominant dimension of variation in the material that follows however is ethnicity The book offers us a sampler of unprecedented richness of the different experiences with alcohol of American ethnoreligious groups The Emergence of Civilization Charles Keith

Maisels,2003-12-16 The Emergence of Civilisation is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region Charles Maisels argues that our present assumptions about state formation based on nineteenth century speculations are wrong His investigation illuminates the changes in scale complexity and hierarchy which accompany the development of civilisation The book draws conclusions about the dynamics of social change and the processes of social evolution in general applying those concepts to the rise of Greece and Rome and to the collapse of the classical Mediterranean world **Making History** Robert Borofsky,1987 Making History begins with a puzzle In 1976 the inhabitants of Pukapuka a Polynesian island in the South Pacific revived a traditional form of social organization that several authoritative Pukapukan informants claimed to have experienced previously in their youth Yet five professional anthropologists who conducted research on the island prior to 1976 do not mention it in any of their writings Had the Pukapukans invented a new tradition Or had the anthropologists collectively erred in not recording an old one In unraveling this puzzle Robert Borofsky compares two different ways of making history two different ways of constructing knowledge about the past He examines the dynamic nature of Pukapukan knowledge focusing on how Pukapukans in the process of learning and validating their traditions continually change them He also shows how anthropologists in the process of writing about such traditions for Western audiences often overstructure them emphasizing uniformity at the expense of diversity stasis at the expense of change As well as being of interest for what it reveals about Pukapukan and more generally Polynesian culture Making History helps clarify important strengths and limitations of the anthropological approach It provides valuable insights into both the anthropological construction of knowledge and the nature of anthropological understanding **Global Ecosystems** ,2009-04-22 NAPA Bulletin is a peer reviewed occasional publication of the National Association for the Practice of Anthropology dedicated to the practical problem solving and policy applications of anthropological knowledge and methods peer reviewed publication of the National Association for the Practice of Anthropology dedicated to the practical problem solving and policy applications of anthropological knowledge and methods most editions available for course adoption The Essential Edmund Leach: Culture and human nature Edmund Ronald Leach,2000-01-01 Brings together a representative selection of the writings of Edmund Leach **Monthly Catalogue,**

United States Public Documents ,1983 *Monthly Catalog of United States Government Publications* ,1981 **Gifts**

Richard Hyland,2009 Over the past two thousand years Western legal systems have had to alter some of their most basic principles in order to regulate the giving of gifts This is a study of how legal concepts from the marketplace have been reshaped to accommodate a fundamentally different type of social practice Richard Hyland examines the law of gifts in England India and the United States and in Belgium France Germany Italy and Spain Giftsalso surveys the extensive discussion about gift giving in anthropology history economics philosophy and sociology In addition Hyland offers a critique of the functionalist method in comparative law and demonstrates the benefits of an interpretive approach **Island**

Societies Patrick Vinton Kirch,1986-10-09 Concentrating their attention on the Pacific Islands the contributors to this book show how the tightly focused social and economic systems of islands offer archaeologists a series of unique opportunities for tracking and explaining prehistoric change From the 1950s onwards excavations in such islands as Fiji Palau and Hawaii revolutionised Oceanic archaeology and as the major problems of cultural origins and island sequences were resolves archaeologists came increasingly to study social change and to integrate newly acquired data on material culture with older ethnographic and ethnohistorical materials The fascinating results of this work centring on the evolution of complex Oceanic chiefdoms into something very much like classic archaic states are authoritatively surveyed here *Companion*
