Asian Values And Human Rights A Confucian Communitarian Perspective:

Asian Values and Human Rights William Theodore De Bary, 2000 *Asian Values and Human Rights* William Theodore De Bary, Wm. Theodore de Bary, 2000-03-01 Since the horrific Tiananmen Square massacre in 1989 the debate on human rights in China has raged on with increasing volume and shifting context but little real progress In this provocative book one of our most learned scholars of China moves beyond the political shouting match informing and contextualizing this debate from a Confucian and a historical perspective Asian Values is a concept advanced by some authoritarian regimes to differentiate an Asian model of development supposedly based on Confucianism from a Western model identified with individualism liberal democracy and human rights Highlighting the philosophical development of Confucianism as well as the Chinese historical experience with community organization constitutionalism education and women's rights Wm Theodore de Bary argues that while the Confucian sense of personhood differs in some respects from Western libertarian concepts of the individual it is not incompatible with human rights but could rather enhance them De Bary also demonstrates that Confucian communitarianism has historically resisted state domination and that human rights in China could be furthered by a genuine Confucian communitarianism that incorporates elements of Western civil society With clarity and elegance Asian Values and Human Rights broadens our perspective on the Chinese human rights debate

Human Rights and Asian Values Eva Pförtl, 2008

Confucian Democracy in East Asia Sungmoon Kim, 2014-02-28 Confucian Democracy in East Asia explores the unique Confucian reasoning that still exists in much of East Asian culture

Confucian Constitutionalism in East Asia Bui Ngoc Son, 2016-02-12 Western liberal constitutionalism has expanded recently with in East Asia the constitutional systems of Japan South Korea and Taiwan based on Western principles and with even the socialist polities of China and Vietnam having some regard to such principles Despite the alleged universal applicability of Western constitutionalism however the success of any constitutional system depends in part on the cultural values customs and traditions of the country into which the constitutional system is planted This book explains how the values customs and traditions of East Asian countries are Confucian and discusses how this is relevant to constitutional practice in the region The book outlines how constitutionalism has developed in East Asia over a long period considers different scholarly work on the ease or difficulty of integrating Western constitutionalism into countries with a Confucian outlook and examines the prospects for such integration going forward Throughout the book covers detailed aspects of Confucianism and the workings of constitutions in practice

Cultural Politics and Asian Values Michael D. Barr, 2012-11-12 Cultural Politics and Asian Values looks at the political cultural and religious background of East and Southeast Asian societies and those of the West with a view to seeing how they are affecting contemporary national and international politics democratization the international human rights discourse NGOs and globalization The book surveys the political history and pre history of the Asian values debate taking it up to the era of Megawati Sukarnoputri Chen Shui bian and Kim Dae jung In chapters on Confucianism Buddhism Islam

Christianity and liberalism Barr explores the histories and conceptual essences of the world religions involved in or affected by the debate *Asian Discourses of Rule of Law* Randall P. Peerenboom,2004 Rule of law one of the pillars of the modern world has emerged in Western liberal democracies This book considers how rule of law is viewed and implemented in the different cultural economic and political context of Asia **Confucianism, A Habit of the Heart** Philip J.

Ivanhoe,Sungmoon Kim,2016-02-01 Employs Robert Bellah s notion of civil religion to explore East Asia s Confucian revival Can Confucianism be regarded as a civil religion for East Asia This book explores this question bringing the insights of Robert Bellah to a consideration of various expressions of the contemporary Confucian revival Bellah identified American civil religion as a religious dimension of life that can be found throughout US culture but one without any formal institutional structure Rather this civil form of religion provides the ethical principles that command reverence and by which a nation judges itself Extending Bellah s work contributors from both the social sciences and the humanities conceive of East Asia s Confucian revival as a habit of the heart an underlying belief system that guides a society and examine how Confucianism might function as a civil religion in China Korea and Japan They discuss what aspects of Confucian tradition and thought are being embraced some of the social movements political factors and opportunities connected with the revival of the tradition and why Confucianism has not traveled much beyond East Asia The late Robert Bellah s reflection on the possibility for a global civil religion concludes the volume *Handbook of Moral Development* Melanie Killen,Professor of Human Development and Psychology Melanie Killen,Judith G. Smetana,Judith Smetana,2005-07-06 The psychological study of moral development has expanded greatly both in terms of the diversity of theoretical perspectives that are represented in the field as well as in the range of topics that have been studied This Handbook of Moral Development represents the diversity and multidisciplinary influences on current theorizing about the psychological study of moral development and the range and broad scope of topics being considered by scholars in the field **'Justification by Grace Alone' Facing Confucian**

Self-Cultivation Arne Redse,2015-09-29 Chinese contexts as influenced by the religious moral philosophy of New Confucianism are characterized by the idea of becoming a sage through self cultivation For Christian theology with its emphasis on God s grace rather than on self cultivation Confucian teaching in this matter may appear as a problem Chinese Christian theology may ask How can the Christian doctrine of justification by grace alone be contextualized in Chinese contexts which are characterized by the contradicting idea of self cultivation Another question may be equally interesting for Christian theology in all contexts Which insights can be attained from an attempt at contextualizing the Christian doctrine of justification to contexts influenced by New Confucianism In this book professor Arne Redse contributes to answering these questions *The Passage West* Giacomo Marramao,2014-04-22 In this ambitious work Giacomo Marramao proposes a radical reconceptualization of the world system in our era of declining state sovereignty He argues that globalization cannot be reduced to mere economics or summarized by phrases such as the end of history or the westernization of the world

Instead we find ourselves embarking on a passage to a new post nation state age destined to transform all civilizations and to disrupt Western geopolitical dominance To confront the challenges of this interregnum one must think in terms of a new and radical universalism a universalism of difference able to revitalize politics and to demythologize identity Building on the great interwar discussion between Spengler Junger Schmitt and Heidegger Marramao s new work engages with Habermas Derrida and post colonialism Arguing against the classic Western pretension to universal norms of democracy and reason he develops instead the idea of a universal politics of difference

Human Rights: Universality and Diversity Eva Brems, 2021-10-18 Human rights are by definition universal Yet in a world characterized by enormous diversity there is no consensus about the implications of the universality of human rights In several regions of the world human rights conceptions are promoted that challenge the mainstream largely Western dominated discourse on this subject This volume offers an analysis of context specific human rights discourses from East Asia Sub-Saharan Africa and the Muslim World Rather than interpreting these as threats to universality the author examines how and to what extent the claims that are advanced can and should be accommodated in order to further the universality of human rights A theory of inclusive universality is developed and its implications are translated into legal techniques On the one hand there are flexibility techniques allowing for contextual diversity in the interpretation and application of human rights norms On the other hand giving credit to non Western views also implies that there should be room for transformation of those human rights norms

Conceptualising Comparative Politics Anthony Petros Spanakos, Francisco Panizza, 2015-07-16 Comparative politics often involves testing of hypotheses using new methodological approaches without giving sufficient attention to the concepts which are fundamental to hypotheses particularly the ability of these concepts to travel Proper operationalising requires deep reflection on the concept not simply establishing how it should be measured

Conceptualising Comparative Politics the flagship book of Routledge's series of the same name breaks new ground by emphasising the role of thoroughly thinking through concepts and deep familiarity with the case that inform the conceptual reflection In this thought provoking book established academics as well as emerging scholars in the field collect and invite scholarship in the tradition of conceptual comparative politics The book posits that concepts may be used comparatively as lenses building blocks and scripts and contributors show how these conceptual tools can be employed in original comparative

research Importantly contributors to Conceptualising Comparative Politics do not simply use concepts in one of these three ways but they apply them with careful consideration of empirical variation The chapters included in this volume address some of the most contentious issues in comparative politics populism state capacity governance institutions elections secularism among others from various geographic regions and model how scholars doing comparative politics might approach such subjects Concepts make possible scholarly conversations including creative confrontations across paradigms Conceptualising Comparative Politics will challenge you to think of how to engage in conceptual comparative inquiry and how to use various methodologically sound techniques to understand and explain comparative politics

Governance for Harmony in Asia and Beyond Julia Tao,Anthony B. L. Cheung,Martin Painter,Chenyang Li,2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated
