Rights and Asian Values Amartya Kumar Sen, 2003 *International Environmental Law and Asian Values* Roda

Mushkat, 2004 Following decades of vigorous economic expansion Asia is confronting the environmental consequences of unfettered development This poses a challenge because of the strong bias of prevailing cultural systems in the region toward the goal of lifting standards of living over achieving ecological sustainability This book juxtaposes international environmental norms and practices with relevant Asian policies and their applications in key areas Roda Mushkat examines the fundamental principle of public participation in environmental law making as well as the rights approach against the emergence of democratic and human rights norms in the region The complex relationship between trade and the environment is also discussed in light of the strong regional emphasis on economic growth trade liberalization and the aversion to conditionalities Given regionalization processes in Asia Pacific and elsewhere this work seeks to establish to what extent such processes have led to the regionalization of international environmental law *International Environmental Law and Asian Values* concludes that although some gaps can be identified between international imperatives and regional responses Asian values have not proved to be an insurmountable barrier to the spread of international environmental legal ideas On the whole the region is responding to impulses emanating from the global arena rather than resisting them consciously The analysis and conclusions of this comprehensive and original work will be of considerable interest to scholars of international law and relations environmental policy comparative culture economic development and social change

political dynamics and legacies of colonialism *Defensive Relativism* Frederick Cowell, 2022-10-25 Defensive Relativism describes how governments around the world use cultural relativism in legal argument to oppose international human rights law Defensive relativist arguments appear in international courts at the committees established by human rights treaties and at the United Nations Human Rights Council The aim of defensive relativist arguments is to exempt a state from having to apply international human rights law or to stop international human rights law evolving because it would interfere with cultural traditions the state deems important It is an everyday occurrence in international human rights law and defensive relativist arguments can be used by various types of states The end goal of defensive relativism is to allow a state to appear human rights compliant while at the same time not implementing international human rights law Drawing on a range of materials such as state reports on the Convention on the Elimination of All Forms of Discrimination Against Women CEDAW and cases from the European Court of Human Rights involving freedom of religion this book provides a definitive survey of defensive relativism Crucially Frederick Cowell argues defensive relativism is not about alternative practices of human rights law or debates about the origins or legitimacy of human rights as a concept Defensive relativism is instead a variety of tactical argument used by states to justify ignoring international human rights law Yet as Cowell concludes defensive relativism can't be removed from the law as it is a reflection of unresolved tensions about the nature of what it means for rights to be universal Nationalism in Asia Jeff Kingston, 2016-04-07 Using a comparative interdisciplinary approach Nationalism in Asia analyzes currents of nationalism in five contemporary Asian societies China India Indonesia Japan and South Korea Explores the ways in which nationalism is expressed embraced challenged and resisted in contemporary China India Indonesia Japan and South Korea using a comparative interdisciplinary approach Provides an important trans national and trans regional analysis by looking at five countries that span Northeast Southeast and South Asia Features comparative analysis of identity politics democracy economic policy nation branding sports shared trauma memory and culture wars territorial disputes national security and minorities Offers an accessible thematic narrative written for non specialists including a detailed and up to date bibliography Gives readers an in depth understanding of the ramifications of nationalism in these countries for the future of Asia
