Asias Borderless Economy The Emergence Of Subregional Zones:

Asia's Borderless Economy Edward K. Y. Chen, C. H. Kwan, 1997 A study of the economic zones of Asia and their future in the region's growth The contributors examine the changing global and regional economic environment then look at each economic zone and review the prospects of the Asian economies in the context of their economic zones **Asia's**

Borderless Economy Edward K. Y. Chen, C. H. Kwan, 1997-01-01 Understanding the increasing significance of trade and investment within and between the economic zones of Asia *Asia's Borderless Economy* Edward K. Y. Chen, C. H.

Kwan, 1997 Special Economic Zones in Asian Market Economies Connie Carter, Andrew Harding, 2010-09-13 Special Economic Zones SEZs have proliferated rapidly during the past decade and are set to multiply in the next embracing not only Asia and Europe but also Africa and the Americas This book is the first to examine the Asian experience of SEZs in China India Malaysia and the Philippines SEZs are usually clearly defined geographic areas in which national provincial or local governments use policy tools such as tax holidays improved infrastructure less onerous or differentiated regulations and incentives other than those generally available in the rest of the country to attract and promote private usually foreign investment from enterprises which commit to create employment and to export their products or services and generating foreign currency for the host country SEZs have been especially successful in bringing about economic development in Asia especially in China This book examines the origins nature and status of special economic zones in Asia together with the current trends connected with them and the challenges they currently face Although the World Trade Organisation cast doubts in 1995 on the future of special economic zones as a viable policy tool in the development agenda special economic zones continue to be used and favoured as a way of encouraging foreign investment and economic development with for example India trying to emulate China reincorporating special economic zones into its development policy This book provides regional case studies of SEZs in Asian market economies to analyse the extent to which these zones serve the changing needs of Asian development Subregional Growth Zones in Greater China and ASEAN Allen Ku Chor Chong, 1997

Regionalism and Subregionalism in East Asia Glenn Drover, Graham Johnson, Julia Lai Po-Wah Tao, 2001 In this book the authors highlight the influence of China in the region of East Asia and the significance of sub regions within it particularly the sub region formed or imagined by Taiwan Hong Kong and their links with south China In Part One they analyse development by reference to the neo governance of globalisation and regionalisation as well as the interplay of cultural and ethical values within East Asia In Part II they turn to the dynamics of sub regional development and the role of China The picture which emerges is complex and graphic nuanced and intricate East Asia is a focal point for the contestation of forces framed by globalisation regionalisation subregionalisation state and cultural values a changing morphology in which openness is associated with export led growth and economic integration It is a region in which change is at once welcomed and distrusted a region where states are not merely powerful but authoritarian one in which business is assumed to lead

politics and where old rivalries are typically transcended by desires to create new economic opportunities **Sub-Regional Economic Cooperation in the Asian Pacific** Siu-Lun Joseph Lee, 2017-01-27 This dissertation Sub regional Economic Cooperation in the Asian Pacific a Case Study of the South China Economic Zone by Siu lun Joseph Lee was obtained from The University of Hong Kong Pokfulam Hong Kong and is being sold pursuant to Creative Commons Attribution 3.0 Hong Kong License The content of this dissertation has not been altered in any way We have altered the formatting in order to facilitate the ease of printing and reading of the dissertation All rights not granted by the above license are retained by the author DOI 10.5353/th_b3121331 **Paths to the Emerging State in Asia and Africa** Keijiro Otsuka, Kaoru Sugihara, 2019-01-16 This book is open access under a CC BY-NC-ND license This book addresses the issue of how a country which was incorporated into the world economy as a periphery could make a transition to the emerging state capable of undertaking the task of economic development and industrialization It offers historical and contemporary case studies of transition as well as the international background under which such a transition was successfully made or delayed by combining the approaches of economic history and development economics Its aim is to identify relevant historical contexts that is the initial conditions and internal and external forces which governed the transition It also aims to understand what current low income developing countries require for their transition Three economic driving forces for the transition are identified They are 1 labor intensive industrialization which offers ample employment opportunities for labor force 2 international trade which facilitates efficient international division of labor and 3 agricultural development which improves food security by increasing supply of staple foods The book presents a bold account of each driver for the transition

Renaissance of Asia Pradumna Bickram Rana, 2012 A recent study by the Asian Development Bank notes that by 2050 Asia's per capita income would rise six fold to reach Europe's levels today one of many indications of Asia's re emergence By then Asia's share of global GDP would have doubled and it would have regained the dominant economic position it once held some 300 years ago before the industrial revolution What is less well known is that during the previous eras of globalization Asia was also regionally integrated and globally connected During the 19th and the first half of the 20th centuries Asia was divided and fragmented This unique book argues that led by the economic dynamism and re encountering between China and India we are witnessing the Renaissance of Asia As in the bygone eras Asia is integrating within itself and the global economy is intensifying now driven by market oriented production networks and economic policies Asia is starting to be re centered as trade and investment relations between South Asia and East Asia surge Asia's rise is a restoration of the past not a revolution This book is a must read for anyone interested in the economic development of Asia *Emerging States and Economies* Takashi Shiraishi, Tetsushi Sonobe, 2018-11-19 This open access book asks why and how some of the developing countries have emerged under a set of similar global conditions what led individual countries to choose the particular paths that led to their emergence and what challenges confront them If we are to understand the nature of major risks and uncertainties in

the world we must look squarely at the political and economic dynamics of emerging states such as China India Brazil Russia and ASEAN countries Their rapid economic development has changed the distribution of wealth and power in the world Yet many of them have middle income status To global governance issues they tend to adopt approaches that differ from those of advanced industrialized democracies At home rapid economic growth and social changes put pressure on their institutions to change This volume traces the historical trajectories of two major emerging states China and India and two city states Hong Kong and Singapore It also analyzes cross country data to find the general patterns of economic development and sociopolitical change in relation to globalization and to the middle income trap

Subregional International Economic Integration Shuanglu Liang,2023-09-27 This work uses international economics and space economics theory to study the regional economic integration of China s border areas with the increasing integration of China s border areas and to realize the theory and countermeasures of economic development across border areas As China s economy pivots towards neighboring developing countries in Southeast Asia new economic rhythms come into being this book seeks to explore the practicalities thereof in a text that will interest economic researchers researchers of China s economy and scholars of international relations

Asia's Turning Point Ivan Tselichtchev,Philippe Debroux,2012-11-26 Asia was probably the biggest economic sensation of the post war decades The breathtaking success of Japan was followed by a remarkable rise of four tigers then ASEAN founder states and then China The Asian miracle became a commonly accepted definition of this success In the late 1970s and especially 80s it became clear that the balance of power in the world had changed Politicians businessmen scholars began to talk about the new Asia Pacific age and Asian economic model different from and maybe even superior to Western capitalism However in 1997 98 the Asian economic crisis came and made the region a sick man Six years before that Japan the regional powerhouse entered more than a decade long period of stagnation The miracle was over However the crisis was overcome within a surprisingly short period of time Naturally the question arises What now What is going on in the region after the miracle and after the crisis What is today s face of Asian capitalism and how should we view its performance Readers interested in regional developments will find a lot of literature about miracle decades and crisis years However few analysts have addressed the challenging questions addressed in this book The authors vividly show that Asian capitalism is undergoing a radical structural transformation These changes are directly affecting its key institutions governments companies labor relations etc As a result Asian economic systems are becoming much closer to the Western style especially Anglo Saxon capitalism though the region retains some important specific features especially regarding business culture This book is a must for business people worldwide for all those who study the region in colleges and business schools for people engaged in various international activities and finally for all those who want learn more about our world at the dawn of the new century

Economic and Social Development in Pacific Asia Chris Dixon,David W. Smith,2002-09-26 There can be no doubt that Japan remains unchallenged as the economic giant of the Pacific However the

economies of East and South East Asia are increasingly becoming integrated into a broad Pacific Asia region which contains most of the world's fastest growing economies. In *Economic and Social Development in Pacific Asia*, a group of world authorities set the area in its global context and examine the economic emergence of the region. In so doing they illustrate that despite superficial similarities there have been many more differences and it is not possible to offer a model of Asian development. The authors also challenge the perceived wisdom that this dynamic growth is the result of laissez faire market led economies. They argue that on the contrary there has been a great deal of government intervention and this growth is actually a result of a policy of guiding the market. Globalization, Development And Security In Asia (In 4 Volumes)

,2014-04-28 Asian countries are undergoing rapid political economic and social transformations meanwhile there is a growing demand for knowing more about Asia. This Major Reference Set is designed to help general readers as well as specialists to have a good grasp of the latest developments in Asia in the key areas of economic growth trade energy environment foreign policy and security. With 4 volumes this set covers all major dimensions of Asia's political economy. Contributors include both scholars and practitioners who provide first hand description and analysis of fundamental issues in Asia. Peace and political stability are of ultimate importance with Asia at the forefront of wealth creation in the global economy. Volume 1 unpacks and examines the foreign policy strategies of key states and the role of regional institutions in responding to the security demands of an Asian century. Volume 2 studies the strong economic integration through trade and cross border investment that has been essential to Asia. The region's future prosperity depends on it being able to remain open and outward looking. As Asia grows larger and richer more concerted efforts are required to surmount regional rivalry and to further strengthen the regional architecture of economic cooperation. Volume 3 looks at the emerging economies thirst for energy that creates huge competition around which domestic regional and international political economy unfolds. Climate change and aspiration for sustainable development further complicate the challenge. Volume 4 offers a comprehensive coverage of subjects on environment and sustainable development in Asia with case studies of selected and representative countries that are at different stages of economic development and facing different environment related problems and challenges in the twenty first century. This interdisciplinary set is a fine example of international cooperation with contributors hailing from different parts of Asia as well as North America and Europe. It is a must have for anyone keen on understanding Asia's dynamic and changing scene. **Innovation Networks and the New Asian Regionalism**

Hans-Peter Brunner,2016-02-26 The rise of Asia as well as the future of regional cooperation and integration. RCI the world over will be profoundly influenced by the challenges of slowing productivity growth increasing economic inequalities and systemic vulnerabilities. Such structural reform issues will require RCI policies that complement domestic policy reform. This unique book explains what drives the regional economic integration of nations and their contribution to national knowledge capital. It also lays out how such beneficial integration can generate broad based equitable wealth in Europe and Asia. Unique

in the regional economic integration literature this comprehensive book identifies the set of drivers of integration for productivity growth. Importantly it describes and compares the experiences of the Baltic Sea Region with Asia's use of a set of institutionalized consensual knowledge and decision tools to drive inclusive and productive growth throughout a period dominated by the global economic crisis. Original and enlightening. Innovation Networks and the New Asian Regionalism will be vital reading for academics and researchers interested in regional integration and innovation. Policy makers and practitioners in regional development and economic geography will also find it to be an invaluable resource. The Dragon and the Flying Geese Patrick Avato, 2007-07 Seminar paper from the year 2006 in the subject Economics International Economic Relations grade A Johns Hopkins University School of Advanced International Studies SAIS course Asian Economic Dynamics 31 entries in the bibliography language English abstract For the past 30 years Asian economies have been the world's envy as they have surpassed practically every other region in terms of exports and economic growth. The remarkable development of various Asian countries has drawn millions of people out of poverty and created some of the wealthiest and most competitive economies in the world. Much of this success has been attributed to a distinctly Asian development model that combines high work ethics with an exceptional emphasis on savings and high rates of investment in both infrastructure and human capital. Moreover, the Asian Miracle was also facilitated by the extraordinary complementarity of resources, stages of development and policies of Asian countries. This complementarity made possible a pattern of development known as the Flying Geese model in which capital technologies and know-how trickled down first from Japan to the Tiger economies Taiwan, Korea, Singapore and Hong Kong and then to the Aspirant Tigers of Southeast Asia Thailand, Malaysia, Indonesia and the Philippines, fostering economic development throughout the region. During the 1990s, however, this picture changed abruptly. First, a real estate and equity bubble developed in Japan, the bursting of which dragged Japan into a decade-long economic crisis. Second, China emerged as a major player in the world economy as her strategy of opening up to FDI and redirecting economic activity towards exports began to pay off. In the following paper, I analyze how the spectacular rise of China has affected the patterns of Asian economic dynamics since the early 1990s. In particular, I focus on the question whether the win-win situation of economic complementarity of the past has given way. **Regionalism in the New Asia-Pacific Order** Joseph A. Camilleri, 2003 Regionalism in the Asia Pacific is a complex and rapidly evolving phenomenon. This volume explores the relationship between globalization and regionalization between states, markets and civil society and between US hegemony and Asian aspirations. **Emerging States and Economies** Takashi Shiraishi, Tetsushi Sonobe, 2018-11-27 This open access book asks why and how some of the developing countries have emerged under a set of similar global conditions, what led individual countries to choose the particular paths that led to their emergence and what challenges confront them.
