Asiatic Mode Of Production Science And Politics:

The Asiatic Mode of Production Anne M. Bailey, Josep R. Llobera, 2018-10-29 This wide ranging collection of articles first published in 1981 documents the development of the intellectual and political aspects of the concept of the Asiatic Mode of Production a concept central to the Western understanding of non capitalist societies *The Asiatic Mode of Production* Anne M. Bailey, Josep R. Llobera, 2019 China in Later Enlightenment Political Thought Simon Kow, 2025-11-03 China in Later Enlightenment Political Thought examines the ideas of China in the works of mid to late eighteenth century European Enlightenment political thinkers Like its predecessor volume China in Early Enlightenment Political Thought this book is distinctive in providing in depth comparative analyses of works by seminal late Enlightenment thinkers that specifically link their views on China to their political concerns It traces the shifts between metaphysical naturalistic economic technological cultural idealist and materialist accounts and philosophical histories of Chinese politics society and culture It argues that unlike earlier thinkers most of the later Enlightenment authors assessed in this book including Christian Wolff Voltaire François Quesnay Adam Smith contributors to the Encyclopédie Abbé Raynal Denis Diderot and Johann Gottfried Herder developed conceptions of history which increasingly depicted China as unprogressive and even stagnant Even later Enlightenment enthusiasts of China such as Voltaire were deeply ambivalent about the lessons European societies could draw from China when viewed in relation to progressive visions of world history The book also discusses the ways in which later Enlightenment theorists who were critical of aspects of European imperialism especially Diderot and Herder nevertheless regarded China as backward and despotic and concludes with the influence of Enlightenment conceptions of China on the philosophies of G W F Hegel and Karl Marx as well as Mao Zedong's reappropriation of post Enlightenment philosophy of history This book will appeal to scholars and advanced students of Chinese history Chinese philosophy Chinese politics and political philosophy more generally **Politics, Volume 2 - Social Theory** Roberto Mangabeira Unger, 2020-05-05 Social Theory Its Situation and Its Task is an introduction both to Unger's ideas and to the major debates of contemporary social political and economic thought Unger shows how the failures of social science and the criticism of such ambitious deterministic theories as Marxism offer materials for an alternative practice of social understanding This alternative severs once and for all the link between the explanation of social arrangements and the vindication of their necessity Unger argues that the disappointment of so many liberal and socialist hopes coexists with unforeseen opportunities to advance progressive commitments To seize such opportunities however we must rethink many of our basic beliefs about society about what it is and what it can become Social Theory Its Situation and Its Task shows that what at first seems a circumstance of intellectual and political paralysis turns out to be rich in unrecognized transformative possibility The Political Economy of Imperialism Ronald M. Chilcote, 2012-12-06 This book brings together important essays by distinguished scholars who have devoted past attention to the study of imperialism and development It complements an anthology of previously published

essays that brings together important theoretical perspectives around the issues and debates on these themes this volume will be published by Humanity Press forthcoming Both projects relate to a lengthy chapter Theories of Imperialism which will be published in my book Theories of Comparative Political Economy Forthcoming These projects represent a culmination of many years of teaching in both economics and political science During that time I taught two political science courses on development and under development but I was unable to convince my colleagues of the usefulness of a course on imperialism that linked historical issues and debates with the more recent developmental literature When in 1990 I was welcomed into economics my colleagues endorsed a graduate seminar on the political economy of imperialism Thus this volume evolved out of that experience in an effort to encourage new analysis that reflects retrospectively on past contributions as well as the prospects for imperialism and development in the contemporary world

Orientalism and Islam Michael

Curtis,2009-06-08 Through an historical analysis of the theme of Oriental despotism Michael Curtis reveals the complex positive and negative interaction between Europe and the Orient The book also criticizes the misconception that the Orient was the constant victim of Western imperialism and the view that Westerners cannot comment objectively on Eastern and Muslim societies The book views the European concept of Oriental despotism as based not on arbitrary prejudicial observation but rather on perceptions of real processes and behavior in Eastern systems of government Curtis considers how the concept developed and was expressed in the context of Western political thought and intellectual history and of the changing realities in the Middle East and India The book includes discussion of the observations of Western travelers in Muslim countries and analysis of the reflections of seven major thinkers Montesquieu Edmund Burke Tocqueville James and John Stuart Mill Karl Marx and Max Weber

The Origins of Economic Inequality Between Nations Carlos

Ramirez-Faria,2012-07-26 First published in 1991 this text provides an incisive analysis of theories concerning the origins of economic inequality between nations Central to the author's investigation is the concept of underdevelopment and a focus on successive Western systems of conceptualisation of the relationship between the west and the rest of the world The first part of the book concerns the Marx Engels theory of the Asiatic mode of production and the anti Imperialist reaction against Eurocentrism initiated by the theoretical synthesis of J A Hobson This is followed by an examination of the post World War II era particularly the evolution of development studies and the differing versions of dependency theory The author concludes with an analysis of the most recent reactions against economic imperialism and dependency theory and concludes with an assessment of their implications for the further economic development of today's Third World

Marx and Weber on Oriental Societies Lutfi Sunar,2016-05-06 The Orient was central to the work of Marx and Weber both figures building their theories around the question of why modernity appeared to emerge only in the West While Marx's account focused on the accumulation of capital in the West Weber's explanation for this phenomenon centred on Western rationalization Extending recent work comparing the social theories of Marx and Weber this book examines their approaches to Oriental societies

showing how in spite of the differences in their respective theorizations of the historical and political development of the West their work on the form of modern society in the Orient converges each complementing the other Fully conversant with recent scholarly work on Marx and Weber this comprehensive re examination of the points of convergence and departure in their work requires us to re evaluate both their positions in the history of sociology and their relevance to contemporary social questions As such it will appeal to scholars of social and political theory and classical sociology Urban Anthropology in China Gregory Eliyu Guldin,Aidan Southall,2023-07-24 This book is based on the papers that were presented at the First International Urban Anthropology Conference which was opened in Beijing on December 28 1989 It contains twenty two papers and six introductory contributions dealing with the following subjects Comparative Urbanism Socialist and Asian Cities Chinese Urbanization Chinese Urban Ethnicity Chinese Urban Culture and Life Cycle These papers are written by Chinese and non Chinese authors The conference of 1989 1990 marked the beginning of urban anthropology in China Before this the objects of ethnological sociological and anthropological research in China were rural rather than urban Besides the attention of scholars was mostly directed towards the ethnic minorities in China In the late 1970 s however contacts with Western anthropologists helped in redirecting part of Chinese anthropology towards the study of urban conglomerations The congress of 1989 90 marked the acceptance of this new approach in China **Mississippian Political Economy** Jon Muller,2013-11-21 This ambitious work offers a coherent and comprehensive look at the material conditions underlying and stimulating political development in southeastern North America during the Mississippian period After introducing theoretical issues Muller addresses reproduction production distribution and consumption within their social and material contexts Examined through the lens of the production distribution and consumption of prestige and staple goods a profoundly domestic though significantly differentiated Mississippian political economy emerges This study s broad synthetic view ensures that neither environment nor ideology are overemphasized A fine statement of an important theoretical position the volume features considerable graphic and tabular presentation of data **Marxism** Michael Curtis,1997-01-01 Marxism The Inner Dialogues covers a wide range of basic issues and problems arising from what has been said for against and about Marxism This is a rich and systematic collection of writings by the foremost authorities on the subject in the world The book provides the most inclusive and lasting analysis of Marxist thought available Curtis has confronted current problems in Marxist studies in the context of the classic concerns of Western thought **The Theocratic Ideology of the Chronicler** Jonathan ok Dyck,2021-08-30 This volume is a study of the ideology of the Chronicler in the context of the emerging theocratic community of Judah in the Persian period This study breaks new ground in treating the purpose of Chronicles from an explicitly social theoretical perspective The first two chapters examine the relationship between biblical interpretation and ideological criticism moving from the historical critical concept of purpose to the hermeneutical issues of understanding ideological distortion and critique Subsequent chapters are devoted to three ideological critical readings of Chronicles

focusing in succession on the identity of Israel the legitimacy of Jerusalem and the construction of hierarchy Care is taken throughout to define concepts clearly and to highlight the interpretive perspectives employed making this volume particularly useful for those engaged in methodological discussion Feudalism and Non-European Societies T. J. Byres, Harbans Mukhia, 1985 With admirable clarity Mrs Peters sums up what determines competence in spelling and the traditional and new approaches to its teaching Times Literary Supplement **Globalization and the Critique of Political Economy** Lucia Pradella, 2014-11-27 The nature of the contemporary global political economy and the significance of the current crisis are a matter of wide ranging intellectual and political debate which has contributed to a revival of interest in Marx's critique of political economy This book interrogates such a critique within the broader framework of the history of political economy and offers a new appreciation of its contemporary relevance A distinctive feature of this study is its use of the new historical critical edition of the writings of Marx and Engels MEGA2 their partially unpublished notebooks in particular The sheer volume of this material forces a renewed encounter with Marx It demonstrates that the international sphere and non European societies had an increasing importance in his research which developed the scientific elements elaborated by Marx's predecessors This book questions widespread assumptions that the nation state was the starting point for the analysis of development It explores the international foundations of political economy from mercantilism to Adam Smith and David Ricardo and to Hegel and investigates how the understanding of the international political economy informs the interpretations of history to which it gave rise The book then traces the developments of Marx's critique of political economy from the early 1840s to Capital Volume 1 and shows that his deepening understanding of the laws of capitalist uneven and combined development allowed him to recognise the growth of a world working class Marx's work thus offers the necessary categories to develop an alternative to methodological nationalism and Eurocentrism grounded in a critique of political economy This book is essential reading for anyone interested in the development of Marx's thought and in the foundations of International Political Economy **Social Theory** Roberto Mangabeira Unger, 2004-11-17 Volume 2 of Politics a work in constructive social theory Chinese Civilization in the Making, 1766-221 BC Jun Li, 2016-07-27 This book provides a fresh interpretation of how Chinese civilization was created and transformed in the process of its early formation 1766-221 BC It describes the principal features of that civilization which had a profound impact on the later development of Chinese history In particular it discusses in detail the main characteristics of the social and political organizations of that period and argues that contrary to the traditional interpretation economic development in ancient China had its own dynamism **Marx's Capital and Capitalism Today Routledge Library Editions: Political Science Volume 52** Tony Cutler, Barry Hindess, Athar Hussain, Paul Q. Hirst, 2013-10-17 This volume is concerned with the re evaluation and criticism of Capital itself It is in three parts each covering a specific area of Marxist theory The first part contains an investigation into Marx's theory of value and considers the types of questions and modes of analysis to which this theory leads In the second

part the nature and implications of necessary economic laws of tendency in the capitalist mode of production are covered Finally there is an analysis of the role of class structure and economic agents in Marxist theory The Colonizer's Model of the World J. M. Blaut, 2012-07-23 This influential book challenges one of the most pervasive and powerful beliefs of our time that Europe rose to modernity and world dominance due to unique qualities of race environment culture mind or spirit and that progress for the rest of the world resulted from the diffusion of European civilization J M Blaut persuasively argues that this doctrine is not grounded in the facts of history and geography but in the ideology of colonialism Blaut traces the colonizer s model of the world from its 16th century origins to its present form in theories of economic development modernization and new world order *Science and Civilisation in China: Volume 7, The Social Background, Part 2, General Conclusions and Reflections* Joseph Needham, 2004-07-22 It would be difficult to overstate the importance of Joseph Needham s Science and Civilisation in China series For nearly fifty years Needham and his collaborators have revealed the ideals concepts and achievements of China s scientific and technological traditions from the earliest times to about 1800 through this great enterprise During his long working lifetime Needham kept in draft various essays some written with collaborators in which he set out his broad views on the Chinese social and historical context These essays edited by one of his closest collaborators Kenneth Robinson are contained in the present volume A reading of this material makes it possible to reconstruct the assumptions and problematics that underpinned and drove the Needham project throughout the nearly one half century during which he was at the helm The documents gathered here reveal the intellectual foundations of one of the greatest scholarly enterprises of the twentieth century *The Bible and the Politics of Exegesis* Norman Karol Gottwald, David Jobling, Peggy Lynne Day, Gerald T. Sheppard, 1991
