Theological Analyses of the Clinical Encounter

G.P. McKenny,J.R. Sande,2013-04-17 Efforts

to evaluate the clinical encounter in terms of autonomous agents governed by rationally justified moral principles continue to be criticised These essays written by physicians ethicists theologians and philosophers examine various models of the clinical encounter emerging out of these criticisms and explore the prospects they offer for theological and religious discourse

Individual essays focus on the reformulation of covenant models revisions of principles approaches and topics such as power authority narrative rhetoric dialogue and alterity The essays display a range of conclusions about whether theology

articulates generally accessible religious insights or is a tradition specific discipline Hence the volume reflects current

debates in theology while analysing current models of the clinical encounter Students professionals and scholars who find

themselves at the intersection of theology and medicine will welcome these voices in an ongoing conversation *Study of*
