Timothy Fitzgerald, 2003-10-16 In recent years there has been an intensifying debate within the religious studies community about the validity of religion as an analytical category In this book Fitzgerald sides with those who argue that the concept of religion itself should be abandoned On the basis of his own research in India and Japan and through a detailed analysis of the use of religion in a wide range of scholarly texts the author maintains that the comparative study of religion is really a form of liberal ecumenical theology By pretending to be a science religion significantly distorts socio cultural analysis He suggests however that religious studies can be re-represented in a way which opens up new and productive theoretical connections with anthropology and cultural and literary studies **Regional, Critical, and Historical Approaches** Peter Antes, Armin W.
