Aspects Of Primary Education The Teaching And Learning Of Science Hmi:

The Teaching of Science in Primary Schools Wynne Harlen OBE, Anne Qualter, 2017-08-04 The Teaching of Science in Primary Schools provides essential information for all concerned with primary school education about all aspects of teaching science. It pays particular attention to inquiry based teaching and learning because of the more general educational benefits that follow from using this approach. These benefits are often expressed in terms of developing general scientific literacy and fostering the ability to learn and the motivation to continue learning. This book also aims to help teachers focus on the big or powerful ideas of science rather than teaching a series of unrelated facts. This leads children to an understanding of the nature and limitations of scientific activity. This fully expanded and updated edition explores the compelling reasons for starting science in the primary school. Within school planning in the context of less prescriptive national requirements. The value of having in mind the big ideas of science. The opportunities for children to learn through greater access to the internet and social networking. The expanding sources of materials and guidance now available to teachers on line. Greater attention to school and teacher self evaluation as a means of improving provision for children's learning. The importance for both teachers and learners of reflecting on the process and content of their activities. Other key aspects of teaching such as questioning the importance of discussion and dialogue, the formative and summative roles of assessment and strategies for helping children to develop understanding, skills, positive attitudes and enjoyment of science are preserved. So also is the learner centred approach with an emphasis on children learning to take some responsibility for their activities. This book is essential reading for all primary school teachers and those on primary education courses. **Policy and Practice in**

Primary Education Robin Alexander, 2012-11-12 Detailed accounts of two influential initiatives of the 1990s whose educational and political lessons remain highly relevant: systemic and pedagogic reform in one of Britain's largest cities and the controversial three wise men government enquiry into primary teaching to which it led. Alexander's controversial and widely read report on primary education in Leeds has now been revised as a major study of policy initiatives in primary education and their impact on practice. The book examines an ambitious programme of local reform aimed at improving teaching and learning in the primary schools of one of Britain's largest cities. It addresses important questions about children's needs, the curriculum, classroom practice and school management. When first published, Robin Alexander's report was hailed as seminal and the most important document since Plowden, but it was also quoted and misquoted in support of widely opposed political and media agendas. This new edition retains Part I from the first edition detailing the impact of Leeds LEA's programme for educational reform. However, it also provides a totally new and greatly extended Part II which gives an insider's account of the sequel to the Leeds report: the government's 1992 three wise men report. There is also a new introduction.

Policy and Practice in Primary Education Robin J. Alexander, 1997 This second edition provides an insider's account of the Three Wise Men episode. **Curriculum: Construction and Critique** Prof Alistair Ross, Alistair Ross, 2003-09-02

Although curriculum is central to the schooling process debates about it are rarely well informed Over the past ten years there has been a dearth of books that have informed the debate by examining curriculum in a broader context beyond the National Curriculum Ross in this refreshing re examination of the area opens up a more general debate on how the curriculum is shaped and the compromises made between different ideologies of the nature and purpose of education

Mathematics in the Early Years David Clemson,Wendy Clemson,2006-11-22 The Clemsons clear and readable book takes the reader from debates about how children learn and what children know and can do when they start school through to a discussion of how mathematics can be managed assessed and evaluated in the school and classroom Linking these two parts of the book is a section on the subject of mathematics itself from which the non specialist reader can gain a view of what mathematics is what needs to be thought about in planning and offering a curriculum and the special dilemmas faced in teaching and learning mathematics as a subject A bank of case studies offers an opportunity to see mathematics in action in a variety of classrooms *Primary Education From Plowden To The 1990s* Norman Thomas,2013-08-21 The Plowden Report delivered high ambitions for more equitable treatment of the under fives and intended to allow parents and children more influence Examining how these recommendations have worked in practice this volume considers changes due to the 1988 Act

Versions of Primary Education Robin Alexander, 2013-04-15 Getting to the heart of primary education six contrasting studies of teachers teaching learning and classroom discourse all set in a historical frame Contains extended lesson transcripts for re analysis The five studies in this book span the tumultuous period from the mid 1980s to the mid 1990s This was a time when the dominant educational ideas and practices of the previous two decades were being questioned and primary teachers were being catapulted from the Plowden era into the very different ethos of the National Curriculum The first four studies portray the ideas practices and dilemmas of primary teaching at different points during this period They also exemplify different approaches to classroom research though all of them stay close to the interactions between teacher and child which are central to learning They thus raise educational questions which are perennial and fundamental rather than tied to policy or fashion The final study uses a broader brush to provide a historical framework for understanding the particular blend of change and continuity which characterises English primary education as a whole

LITERACY and LEARNING THROUGH TALK Roy Corden, 2000-07-16 This book focuses on the inter relationship between reading writing and speaking and listening Psychologists and educationalists influenced by the work of Vygotsky have emphasised the importance of social interaction in learning and the National Writing Oracy and LINC Projects highlighted the need for quality interactive pupil discourse and effective teacher pupil interaction However although the DfEE claims that the successful teaching of literacy is characterised by good quality oral work speaking and listening is not included in the National Literacy Strategy Framework and the Literacy Training Pack does not address the issue Literacy and Learning through Talk blends theory research and practice to show how an integrated programme of work can be developed to ensure that literacy is taught in a vibrant and stimulating way Strategies for developing successful group work and whole class interactive discourse are examined and effective teaching roles and questioning techniques are explored Transcripts of group discussions and examples of children's work illustrate various points and work plans and practical classroom activities are

described EBOOK: National Curriculum for the Early Years Angela Anning, 1995-10-16 What does the National Curriculum mean to pupils and teachers at Key Stage One How have teachers and children coped with the ongoing changes How has subject teaching altered in infant classrooms In A National Curriculum for the Early Years Angela Anning and her team of contributors set out to examine these issues Infant teachers and their pupils were the guinea pigs for the introduction of the National Curriculum over a five year period Despite many reservations about a subject based curriculum for young children teachers struggled to interpret the National Curriculum Orders into a workable if not manageable curriculum in their classrooms The contributors to this book each experts in a subject discipline have kept in close touch with practising and intending infant teachers as the National Curriculum was operationalized in primary schools They have used their teacher networks as well as research evidence to tap into the strategies used by infant teachers to cope with the planning delivery and assessment of the National Curriculum subjects and the effects of government policy changes on young children s learning Together the contributors provide a timely analysis of subject discipline based education for young children and look ahead to the prospects for those subjects at Key Stage One in the second half of the 1990s This book will be essential reading for anyone involved in the education of young children The Study Of Primary Education Colin Conner, Brenda Lofthouse, 2003-10-04 The four books are intended to be used by students taking BEd or PGCE courses and by teachers in service taking diploma or higher degree courses in primary education The material extracted can be used by tutors as a focus for seminars or as reading to back up lectures and by students as a source for essays or as a starting point for further reading The books are not intended to be read straight through from cover to cover but can be selectively and flexibly used at various stages in the course For convenience the extracts have been organized into a number of sections Volume 1 comprises extracts which examine primary education from historical ideological philosophical sociological and psychological perspectives Volume 2 deals with curriculum studies Volume 3 with school organization and management and Volume 4 with teaching and classroom studies Because of limitations of space primary education has been confined to the education of children aged 5 to 11 though the compilers acknowledge that in doing so they may offend those teachers in nursery or middle schools who regard themselves justifiably as primary practitioners **Science 3-13** Rachel Sparks Linfield, Paul Warwick, 2002-01-04 Which factors have been influential in developing science teaching and learning for the three to thirteen age group in the last twenty years How might these factors have an impact on the future direction of science teaching and learning for this age range into the 21st century How can teachers cope with the changes Science 3 13 explores some of the historical antecedents of the current position of science in the lives of younger children It covers the various influences both from within and outside the teaching profession that have shaped the current science curriculum Current practice is examined and on this basis speculations are made about the future position and direction of this important subject The contributors each cover a particular aspect of science for the 3 13 age range but common themes

emerge such as the influence of government intentions particularly through the development of the National Curriculum The role of research groups and the impact of ICT on the teaching profession as to what is important to teach and how science and science teaching should be viewed within society are shown to be important factors in the mix that contributes to change This book forms part of a series of key texts which focus on a range of topics related to primary education and schooling Each book in the Primary Directions Series will review the past analyse current issues suggest coping strategies for practitioners and speculate on the future **Primary Teachers at Work** Jim Campbell,S. R. St. J. Neill,2002-01-04 The first part of this book charts and analyses the working days of 326 primary school teachers It shows how they spent their working lives the nature of the curriculum they taught and analyses their work into five main categories Teaching Preparation Administration Professional Development and Other Activities The second part comments on the findings by relating them to issues of school management and curriculum manageability and looks at how the idea of conscientiousness among primary school teachers may have lead to their exploitation *The Psychological Assessment of Reading* John Beech,Chris Singleton,2021-12-24 A useful guide to best practice including reviews of the latest and most helpful tests available In Part One contributors discuss the theory of reading assessment including issues such as screening legal aspects memory and visual problems computer based assessment and the dyslexias Part Two contains the review section where experts give comprehensive reviews of named tests **Readings for Reflective Teaching in Schools** Andrew Pollard,2014-02-27 Readings for Reflective Teaching in Schools provides a portable library of over a hundred readings to support teacher education and professional development Extensively updated since earlier editions the book concisely introduces both classic and contemporary research and understanding on teaching and learning The selection reflects current issues and concerns in education and has been designed to support school led teacher education as well as a wide range of school university partnership arrangements Uniquely two types of reading are provided summaries enabling easy access to evidence on key classroom issues including relationships behaviour curriculum planning teaching strategies and assessment processes analyses of deeper forms of understanding about teaching and learning processes to support the development of expertise throughout a teaching career This collection of readings is edited by Andrew Pollard former Director of the UK s Teaching and Learning Research Programme with the advice of primary and secondary specialists from the University of Cambridge Readings for Reflective Teaching in Schools is part of a fully integrated set of resources for primary and secondary education Reflective Teaching in Schools focuses on how to achieve high quality teaching and learning By design it offers both practical support for effective practice and routes towards deeper expertise The website reflectiveteaching.co.uk offers supplementary resources including reflective activities research briefings advice on further reading and additional chapters It also features a glossary links to useful websites and a conceptual framework for deepening expertise This book is one of the Reflective Teaching Series inspiring education through innovation in early years schools further higher and adult education **Coordinating Science**

Routledge is an imprint of Taylor Francis an informa company **EBOOK: FIRST YEARS AT SCHOOL** Angela
Anning, 1997-01-16 Review of 1st edition I found the whole account a model of clarity with a good blend of theory and
practice which many authors would do well to note Ted Wragg TES The First Years at School 2nd Edn is a practical and
reflective discussion of the education of 4 to 8 year olds based on a sympathetic recognition of the complexities of being an
early years teacher Angela Anning begins by reviewing the historical and ideological traditions of British infant and primary
schools tracing how we have reached the position where teachers feel themselves to be torn between child centered and
utilitarian demands in educating young children She then provides a detailed and authoritative critique of recent thinking
about the cognitive social and emotional development of children and explores the complexities of teachers roles She
discusses the organization of the classroom the structuring of learning in the school day and the content of the curriculum
She tackles the implications of the series of changes in the National Curriculum Orders and the national assessment systems
for seven year olds and their impact on pre fives and children with special educational needs The second edition brings the
debate about the post Dearing Key Stage One curriculum and its implications for pre school education bang up to date This
will be vital reading for both student and practising teachers of young children *Developing as a Teacher of Geography*
