The Projective Cast Robin Evans, 2000-08-25 Robin Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form Anyone reviewing the history of architectural theory Robin Evans observes would have to conclude that architects do not produce geometry but rather consume it In this long awaited book completed shortly before its author's death Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form He shows that geometry does not always play a stolid and dormant role but in fact may be an active agent in the links between thinking and imagination imagination and drawing drawing and building He suggests a theory of architecture that is based on the many transactions between architecture and geometry as evidenced in individual buildings largely in Europe from the fifteenth to the twentieth century From the Henry VII chapel at Westminster Abbey to Le Corbusier's Ronchamp from Raphael's S Eligio and the work of Piero della Francesca and Philibert Delorme to Guarino Guarini and the painters of cubism Evans explores the geometries involved asking whether they are in fact the stable underpinnings of the creative intuitive or rhetorical aspects of architecture In particular he concentrates on the history of architectural projection the geometry of vision that has become an internalized and pervasive pictorial method of construction and that until now has played only a small part in the development of architectural theory Evans describes the ambivalent role that pictures play in architecture and urges resistance to the idea that pictures provide all that architects need suggesting that there is much more within the scope of the architect's vision of a project than what can be drawn He defines the different fields of projective transmission that concern architecture and investigates the ambiguities of projection and the interaction of imagination with projection and its metaphors

Print, Power, and Cultural Hegemony Federico Dal Bo, 2024-09-23 Federico Dal Bo examines the design of early Hebrew books from the late fifteenth and sixteenth centuries focusing not only on the words in these early books but also on how they were arranged on the page He follows in the tradition of scholars such as Christopher de Hamel Marvin J Heller and David Stern who have explored the importance of these Hebrew books in influencing Jewish learning and attracting the interest of Christians The author discusses important prints such as the first

Talmud and rabbinical bibles which marked a shift from being for Jewish readers only to being for both Jews and Christians. The collaboration between Jewish editors and Christian printers changed the way these books looked and the audience for whom they were intended. At first these early prints copied the style of handwritten Hebrew manuscripts. The simple layout could be difficult to read, especially for long books like the Bible or Talmud. But over time, influenced by the humanism of the Italian Renaissance, the layout became more complex. The book also looks at how the layout changed from full page commentaries to a more complicated design in which the main text and commentaries shared the same page. This shift challenged the idea of who was the primary author and emphasized the role of editors. The layout with the main text in the center and the commentaries on the sides created a kind of unwritten rule for how to read religious texts. Dal Bo's study also includes new information about a 1553 trial in which the Talmud was burned. Overall, it explores how the layout of these early Hebrew books shaped cultural power and influenced how people read.

Aspects of the Italian Renaissance, by Rachel Annand Taylor, ... With a Preface by Gilbert Murray Rachel Annand Taylor (Mrs.), Gilbert Murray, 1923. Castiglione's Allegory W.R. Albury, 2016-04-08. Castiglione's *Book of the Courtier* (*Il libro del cortegiano*, 1528) is a dialogue in which the interlocutors attempt to describe the perfect courtier. It was one of the most influential books of the Renaissance. In recent decades, a number of postmodern readings of this work have appeared, emphasizing what is often characterized as the playful indeterminacy of the text and seeking to detect inconsistencies which are interpreted as signs of anxiety or bad faith in its presentation. In contrast to these postmodern readings, the present study conducts an experiment: What understanding does one gain of Castiglione's book if one attempts an early modern reading? The author approaches *The Book of the Courtier* as a text in which some of its most important aspects are intentionally concealed and veiled in allegory.

W R Albury argues that this early modern reading of *The Book of the Courtier* enables us to recover a serious political message which has a great deal of contemporary relevance and which is lost from sight when the work is approached primarily as a courtly etiquette book or as a lament for the lost influence of the aristocracy in an age when autocratic nation states were coming into being or as an impersonal textual field upon which a free play of transformations and deconstructions may be performed
