Assassination Business A History Of State Sponsored Murder:

A History of Political Murder in Latin America W. John Green, 2015-04-27 This expansive history depicts Latin America's pan regional culture of political murder Unlike typical studies of the region which often focus on the issues or trends of individual countries this work focuses thematically on the nature of political murder itself comparing and contrasting its uses and practices throughout the region W John Green examines the entire system of political murder the methods and justifications the perpetrators employ the victims and the consequences for Latin American societies Green demonstrates that elite and state actors have been responsible for most political murders assassinating the leaders of popular movements and other messengers of change Latin American elites have also often targeted the potential audience for these messages through the region's various dirty wars In spite of regional differences elites across the region have displayed considerable uniformity in justifying their use of murder imagining themselves in a class war with democratic forces While the United States has often been complicit in such violence Green notes that this has not been universally true with US support waxing and waning A detailed appendix exploring political murder country by country provides an additional resource for readers

War Trauma and its Aftermath Laurence Armand French, Lidija Nikolic-Novakovic, 2011-12-16 War trauma has long been associated with post traumatic stress disorder PTSD a term coined in 1980 to explain the post war impact of Vietnam veterans The Gulf and Balkan wars added new dimensions to the traditional PTSD definition due largely to the changing dynamics of these wars With these wars came unprecedented use of reserve and National Guard personnel in U S forces along with the largest contingent of female military personnel to date Rapid deployment sexual assaults and suicides surfaced as paramount untreated problems within coalition force Rapes torture suicides and a high prevalence of untreated civilian victims of the Balkan wars added to the new dimensions of the traumatic stress continuum Suicide bombers and roadside bombings added to the definition of combat stress as military personnel in Iraq and Afghanistan were forced to be constantly vigilant for these attacks regardless of whether they served in combat areas

Drone Nation Geoff Martin, Erin Steuter, 2016-12-22 Drone Nation unveils an unexpected scenario where international drone warfare leads to a state of permanent war through increasing numbers of assassinations of the western world's declared enemies It provides historical context for the rise and acceptance of drone warfare and examines likely future impacts The book discusses the broad political economic forces at play in the United States Topics include US strategic traditions domestic political institutions military industrial complex intra military pressures think tanks media and international law The authors argue that social progress is not necessarily continuous While there was widespread social and economic progress from the 1950s through 1970s in the United States the country is now in a period of economic and political regression The rise of drone warfare and the domestic use of drones is partly to blame This gradual and important change signals a major departure from the traditional embrace of international law military ethics and domestic privacy

The Business of Killing Indians William S. Kiser, 2025-03-18 How colonial conquest was driven by state sponsored profit driven campaigns to murder and mutilate Indian peoples in North America From the mid 1600s through the late 1800s states sponsored scalp bounties and volunteer campaigns to murder and mutilate thousands of Indians throughout North America Since central governments in Amsterdam Paris London Mexico City and Washington DC failed to provide adequate military support and financial resources for colonial

frontier defense administrators in regional capitals such as New York Qu bec City New Orleans Boston Ciudad Chihuahua Austin and Sacramento took matters into their own hands At different times and in almost every part of the continent they paid citizens for killing Indians taking Indians captive scalping or beheading Indians and undertaking other forms of performative violence As militant operatives and civilians alike struggled to prevail over Indigenous forces they considered barbaric and savage they engaged in not just plundering slaving and killing but also dismembering corpses for symbolic purposes and for profit Although these tactics mostly failed in their intent to exterminate populations state sponsorship of indiscriminate violence took a significant demographic toll by flooding frontier zones with murderous units whose campaigns diminished Indigenous power reduced tribal populations and forced weakened survivors away from traditional homelands High wages for volunteer campaigning along with cash bounties for Indian body parts and the ability to take captives and keep valuable plunder promoted a state sponsored profit opportunity for civilians

The Encyclopedia of Public Choice Charles Rowley, Friedrich Schneider, 2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey suf ciently the breadth of the Encyclopedia s contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intell tual specialization gradually replaced broad based scholarship from the m nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a n row positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War

A Post-Exceptionalist Perspective on Early American History Carroll P. Kakel III, 2019-08-16 This book argues that early American history is best understood as the story of a settler colonial supplanting society a society intent on a vast land grab of American Indian space and driven by a logic of elimination and a genocidal imperative to rid the new white settler living space of its existing Indigenous inhabitants Challenging the still strongly held notion of American history as somehow exceptional or unique it locates the history of the United States and its colonial

antecedents as a central part of rather than an exception to the emerging global histories of imperialism colonialism and genocide It also explores early American history in an imperial transnational and global frame showing how the precedent of the North American West and its colonial trope of Indian wars were used by like minded American and European expansionists to inspire and legitimate other imperial colonial adventures from the late nineteenth through the mid twentieth centuries

To Make a Killing Robert Stephens,2024-02-13 One of the wildest most spectacular decades in American history the 1920s were a period of unprecedented growth and mass consumerism In the New Era people drank in speakeasies danced to jazz idolized gangsters and bet their life savings on stocks Born and raised in a small Canadian town Arthur Cutten went to Chicago in 1890 with

ninety dollars to his name Through utter ruthlessness he amassed a fortune trading in grain futures and stocks Cutten was heralded as the modern Midas and his every move was followed by the masses who believed they could get rich quick But everything changed after the crash of 1929 The heroes of prosperity became the villains of the Great Depression Determined to crack down on the banksters the Roosevelt administration launched an all out attack on those it blamed for the collapse and Cutten was at the top of the list A US Senate committee probed how he manipulated stock prices The Grain Futures Administration moved to bar him from trading And the Bureau of Internal Revenue indicted him for income tax evasion But the wily operator won on every count he emerged from the Senate investigation unscathed maintained his grain trading privileges after a victory in the Supreme Court and left almost nothing for the tax collectors upon his death To Make a Killing tells the tale of Cutten s journey to fabulous wealth the forces that propelled him and the fascinating characters in his life
