Handbook of Research on Assessment Practices and Pedagogical Models for Immigrant Students Keengwe, Jared, Onchwari, Grace, 2019-06-14 Standardized tests have been selected as a key assessment factor in expanding the academic achievement of the national student population. However, these tests position immigrant students at the risk of academic failure, leading education experts to search for new strategies and teaching models. The *Handbook of Research on Assessment Practices and Pedagogical Models for Immigrant Students* is a critical research publication that focuses on research-based pedagogical practices for teaching immigrant students. Edited by a prominent IGI Global editor, this book examines the latest professional development models and assessment practices of English learners (ELs). Covering essential topics such as second language acquisition (SLA), classroom management, teacher education, refugee resettlement programs, and more, this publication is a valuable resource for academicians, professionals, researchers, administrators, faculty, and classroom teachers, as the social and academic needs of English language learners continue to present a challenge for many schools and teachers.

Innovative Assessment for the 21st Century Valerie J. Shute, Betsy Jane Becker, 2010-09-08 In today's rapidly changing and information-rich world, students are not acquiring adequate knowledge and skills to prepare them for careers in mathematics, science, and technology with the traditional approach to assessment and instruction. New competencies, e.g., information communication and technology skills, are needed to deal successfully with the deluge of data. In order to accomplish this, new educational skills must be acknowledged and assessed. Toward this end, the skills we value and support for a society producing knowledge workers, not simply service workers, must be identified together with methods for their measurement. *Innovative Assessment for the 21st Century* explores the faces of future assessment and asks hard questions such as: What would an assessment that captures all of the above attributes look like? Should it be standardized? What is the role of the professional teacher?
