Living in the State of Stuck Marcia Joslyn Scherer,1996 Assistive technology is radically changing the lives of people with disabilities Here Dr Scherer sets the background for this radical transformation and discusses the implications of assistive technology for the lives of those born disabled or who become disabled later in life In the author s words this book shows how paradoxically the more technology became available and the more free from limitations individuals became the more stuck they seemed A severe disability no longer need prevent a person from attaining the same educational personal and career goals as other adults Scherer details assistive devices that enhance the quality of their lives mobility speech and ability to work But while these devices may enhance independence Scherer explains how friends and relatives can better understand the personal issues and needs that arise from living with a disability and needing these devices This is a unique well researched account that will help anyone disabled or not deal with the physical and emotional aspects of adjusting to a life with assistive technology
