Julie Karner, 2006 The last century has been an incredible age of space exploration tremendously expanding our knowledge of the universe This amazing book reminds us that such knowledge often comes at a price Space Disaster and Meteorite Alert chronicles both the brave and adventurous space missions throughout history that have ended in disaster as well as an asteroid s journey through the atmosphere to its eventual landing on Earth

SPACE: THE FAILED FRONTIER R. J. Pearson, 2025-08-20 This book is for readers who wonder why the US turned its back on lunar exploration failed for half a century to produce a sustainable crewed space flight program and how we might now finally be able to restart human space exploration Since the end of the Apollo program NASA s human space flight program has had little political support and even less funding It needs to be replaced by an economically self sustaining commercial space program The book s narrative examines the technical and economic challenges in establishing a human settlement in Earth Orbit on the lunar surface and on Mars NASA s failed program to reduce orbital launch costs and use space exploration to increase international cooperation is discussed Methods of establishing an economically self supporting lunar mining colony are examined in detail Three proposed programs for human exploration of Mars are compared Asteroids as a source of terror and possible treasure are examined in the final chapters The book is based on Internet research and analysis augmented by original back of the envelope calculations at key points Off the Hook Too!
