Living the Food-Allergic Life Mark S. Ferrara, 2023-05-29 If you had an allergy so severe that accidentally eating a forbidden food could kill you in minutes how would it change your life and your relationship to food For people with food induced anaphylaxis the severest form of allergic response simply eating in restaurants accepting invitations to dinner going on overnight field trips or traveling through foreign countries means facing one's mortality with every meal In this book Mark S Ferrara weaves history science and psychology to recount the story of his struggles with allergic asthma and a life threatening allergy to nuts and his difficulties living and working in the Far East and Near East to show how the quest for self actualization can lead to an acceptance of transience that borders on the mystical Along the way he guides parents in keeping food allergic children safe at home and at school and offers strategies that adolescents and adults may use to negotiate social spaces involving food He explains how survivors of anaphylaxis can cope with the sometimes irrational fears of food that follow that traumatic experience so they may live happy healthy meaningful lives

Highlights in Asthmology F.B. Michel,J. Bousquet,P. Godard,2012-12-06 F B Michel Asthmology is the neologism I suggested for ideas which were acceptable at the begin the title of a book published in 1981 on ning of the 20th century and in particular bronchial asthma 4 5 to Pasteur s concept of one cause one ill ness many syndromes like high blood Among a certain number of scientific pressure or asthma are the result of the publications on this subject it is one of the overlapping of hereditary factors and ac few suggestions that I have the weakness to quired factors This is one reason why asth feel somewhat proud of In fact this word has had the career I hoped it would and ma is not really an illness in the real sense judging by the frequency with which it is of the word but a clinical and functional respiratory syndrome 1 used in both written and spoken language it did answer a need I had no intention of The innate the terrain transmitted by suggesting one more neologism but it heredity can possibly concern two factors seemed to me that the word asthmology The bronchial hyperreactivity factor BHR had an element of novelty and above all is often present in early childhood and its produced the necessary awareness of the reality is a result of the studies of large need to bring together within a kind of groups of homo and heterozygotic twins *Allergy Frontiers:Epigenetics, Allergens and Risk Factors* Ruby Pawankar,Stephen T. Holgate,Lanny J. Rosenwasser,2008-12-05 When I entered the field of allergy in the early 1970s the standard textbook was a few hundred pages and the specialty was so compact that texts were often authored entirely by a single individual and were never larger than one volume Compare this with Allergy Frontiers Epigenetics Allergens and Risk Factors the present s volume text with well over 150 contributors from throughout the world This book captures the explosive growth of our specialty since the single author textbooks referred to above The unprecedented format of this work lies in its meticulous attention to detail yet comprehensive scope For example great detail is seen in manuscripts dealing with topics such as Exosomes naturally occurring minimal antigen presenting units and Neuropeptide S receptor 1 NPSR1 an asthma susceptibility gene The scope is exemplified by the unique approach to disease entities normally dealt with in a single chapter in most texts For example anaphylaxis a topic usually confined to one chapter in most textbooks is given five chapters in Allergy Frontiers This approach allows the text to employ multiple contributors for a single topic giving the reader the advantage of being introduced to more than one vi point regarding a single disease *Health and the Modern Home* Mark Jackson,2008-02-07 Health and the Modern Home explores shifting and contentious debates about the impact of

the domestic environment on health in the modern period Drawing on recent scholarship contributors expose the socio political context in which the physical and emotional environment of the modern home and family became implicated in the maintenance of health and in the aetiology and pathogenesis of diverse psychological and physical conditions In addition they critically analyze the manner in which the expression and articulation of medical concerns about the domestic environment served to legitimate particular political and ideological positions
