ABSTRACT

Introduction: Asthma management is strongly dependent on physician and patient beliefs and perceptions about the disease and its long-term treatment. The APPaRENT 3 study was

conducted to explore factors influencing treatment choice and to understand patients' and physicians' attitudes and perspectives on the use of controller inhalers in regular versus flexible dosing for asthma management.

Methods: This cross-sectional survey of patients with asthma and treating physicians was conducted in seven countries: Indonesia, Malaysia, Philippines, Thailand, Vietnam (patient survey only), Saudi Arabia, and the

Environmental Health Perspectives ,2004-07 *Encyclopedia of Primary Prevention and Health Promotion* Thomas P. Gullotta,Martin Bloom,2003-01-31 Foundational topics such as history ethics and principles of primary prevention as well as specific issues such as consultation political issues and financing The second section addresses such topics as abuse depression eating disorders HIV AIDS injuries and religion and spirituality often dividing such topics into separate entries addressing childhood adolescence and adulthood **Environmental Science and Theology in Dialogue** Russell A. Butkus,Steven A. Kolmes,2011 This work demonstrates how understanding environmental science and theology can provide new resources for sustaining the Earth With sidebars discussion questions and recommended readings the book provides students with a text that nurtures both critical thinking and ethical action Risk Factors for Asthma Among Arab American Immigrants in the Metro Detroit Area Mary Johnson,2005 **Homicide by Pesticides** Anil Agarwal,1997 In the Indian context *Mental Health Needs and Service Utilization of Children with Asthma* Michelle Shasha,1999 Children with asthma are at increased risk for emotional problems The physical consequences of asthma can strongly influence a child s life including social familial academic and other aspects of daily living The increased presence of emotional problems among children with asthma has several health services implications Most obvious is the need for mental health services to this population The presence of emotional or behavioral problems however may also increase their utilization of outpatient emergency and inpatient medical services **The Praeger Handbook of Environmental Health** Robert H. Friis,2012-04-23 Written by internationally acclaimed experts in the United States and abroad this comprehensive set of environmental health articles serves to clarify our impending challenges as well as opportunities for health and wellness Written in an accessible style that is appropriate for general readers as well as professionals in the environmental health field this work provides a comprehensive yet coherent review of the principal environmental challenges that confront our society This four volume work taps a multidisciplinary team of experts from across the nation to present emerging information about how our world is being impacted the effects on health and life and the steps we are taking and should take to correct or avoid the problems The Praeger Handbook of Environmental Health comprises four volumes Foundations of the Field Agents of Disease Water Air and Solid Waste and Current Issues and Emerging Debates Within each volume chapters cover the latest scientific research findings in an objective manner and present practical applications of the information Topics addressed include air and water contaminants PCBs hazardous waste household cleaning products dioxin plastics radiation radon electromagnetic fields and noise and light pollution just to name a few This title stands alone in its comprehensive coverage of environmental health topics *Fresno Asthmatic Children's Environmental Study (FACES)* ,2006 The Citizens' Fifth Report Anil Agarwal,Sunita Narain,Srabani Sen,1999 **The State of India's Environment** ,1999 Bottom Line's Health Breakthroughs, 2006 ,2005 A Decade of Children's Environmental Health Research ,2007 These 10 years of STAR

research studies have shed light on how environmental exposures change from newborn to school age children and on some of the genetic factors that contribute to children's vulnerability. This research has also provided insight on how to assess children's exposures, what biological markers tell us about exposure or effects, and what steps need to be taken to prevent harmful exposures. Some of the major findings of this research include: People metabolize pesticides differently based on their genotype; some faster, others slower. This finding is of particular concern during pregnancy as many babies do not develop the ability to metabolize some pesticides during the first two years of life, putting them at greater risks of health effects. Children living close to major roadways in Southern California have a higher risk of asthma. EPA's ban on two household pesticides, diazinon and chlorpyrifos, resulted in a rapid decrease in exposures in New York City. Children born after the ban were also healthier. Integrated Pest Management (IPM) can be effectively implemented in urban areas to reduce both pesticide and allergen triggers. Community partners play a critical role in informing, implementing, and translating children's environmental health research.

World Resources 1998-99 World Resources Institute, 1998. This is the 8th edition in a series which provides an authoritative assessment of the world's natural resource base. This edition focuses on the relationship between environmental change and human health. Drawing on the latest scientific data, it explores how environmental conditions contribute to death and disease around the world and how that may change in the coming decades. **San Francisco**

Originally published as *Evolutionary Medicine*, this new paperback edition issues a warning to the medical establishment. Lappé decries our indiscriminate use of antibiotics, our disruption of global ecosystems, and our shortsighted approach to the origins and treatment of disease. **Charts Index**

Methods in Community-Based Participatory Research for Health Barbara A. Israel, 2005-07-07. Written by distinguished experts in the field, this book shows how researchers, practitioners, and community partners can work together to establish and maintain equitable partnerships using a Community Based Participatory Research (CBPR) approach to increase knowledge and improve health and well-being of the communities involved. CBPR is a collaborative approach to research that draws on the full range of research designs, including case study, etiologic, longitudinal, experimental, and nonexperimental designs. CBPR data collection and analysis methods involve both quantitative and qualitative approaches. What distinguishes CBPR from other approaches to research is the active engagement of all partners in the process. This book provides a comprehensive and thorough presentation of CBPR study designs, specific data collection and analysis methods, and innovative partnership structures and process methods. This book informs students, practitioners, researchers, and community members about methods and applications needed to conduct CBPR in the widest range of research areas, including social determinants of health, health disparities, health promotion, community interventions, disease management, health services, and environmental health. *Climate Change in Portugal*
