Astonishing Stereoscope:

The Astonishing Stereoscope , **The Astonishing Stereoscope** Jane Langton,1971 When Eddy Hall receives five cards for his stereoscope he and his sister Eleanor can't wait to see what exotic places they reveal maybe Stonehenge or a centuries old European cathedral But instead when they look through the stereoscope Eddy and Eleanor see some very strange things An odd looking rope hangs from the sky down into every picture A marmalade coloured cat that looks suspiciously like Herm the family cat also appears And one picture looks like the front hall of their very own house The images seem to be almost real not just three dimensional illusions All it will take is one little tug on that rope to find out for sure *Unbored* Joshua Glenn,Elizabeth Foy Larsen,2013-07-18 *Unbored* is the book every modern child needs Brilliantly walking the line between cool and constructive it's crammed with activities that are not only fun and doable but that also get kids standing on their own two feet If you're a kid you can Build a tipi or an igloo Learn to knit Take stuff apart and fix it Find out how to be constructively critical Film a stop action movie or edit your own music Do parkour like James Bond Make a little house for a mouse from lollipop sticks Be independent Catch a bus solo or cook yourself lunch Make a fake exhaust for your bike so it sounds like you're revving up a motorcycle Design a board game Go camping or glamping Plan a road trip Get proactive and support the causes you care about Develop your taste and decorate your own room Make a rocket from a coke bottle Play farting games There are gross facts and fascinating stories reports on what stuff is like home schooling working in an office Q As with inspiring grown ups extracts from classic novels lists of useful resources and best ever lists like the top clean rap songs stop motion movies or books about rebellion Just as kids begin to disappear into their screens here is a book that encourages them to use those tech skills to be creative try new things and change the world And it gets parents to join in *Unbored* is fully illustrated easy to use and appealing to young and old girl and boy Parents will be comforted by its anti perfectionist spirit and humour Kids will just think it's brilliant **The Stereoscope and Stereoscopic Photographs** Oliver Wendell Holmes,1899 *The Stereoscopic Picturesque* Bruce Graver,2025-09-01 *The Stereoscopic Picturesque* is an interdisciplinary study of nineteenth century 3D photography and its relation to the picturesque tradition in art literature and tourism The study focuses on the invention of the stereoscope originally a laboratory device for demonstrating the nature of three dimensional vision and the simultaneous invention of photography in order to show how early stereo photographers used the optics of the stereoscope to extend the possibilities of picturesque representation Their images also made virtual travel possible for an international mass audience allowing millions of people to explore places and natural wonders that they would otherwise never have seen Many of these places had deep literary associations Wordsworth's Lake District for instance or Scott's Trossachs and the stereography of these regions constitutes an important yet largely unexplored chapter in the reception history of these authors Many of the photographs were deliberate attempts to encourage the preservation of environmentally sensitive sites something the realism of photography and the 3D presentation of the stereoscope made

especially effective The Stereoscopic Picturesque combines fields of study that have rarely been brought into such close contiguity the history of science art history the history of photography literature and environmentalism The result is an unprecedented look at Victorian popular culture and the way stereo photography shaped their ways of seeing the world
