National Aeronautics and Space Administration,2005-12-31 These essays in celebration of the Wright brothers first flight 100 years ago grew out of presentations by a group of prominent scholars in 2003 at a conference sponsored by the NASA History Division and held at the Great Lakes Science Center in Cleveland Ohio The volume focuses on the careers of some of the many men and women who helped to realize the dream of flight both through the atmosphere and beyond These accounts are original and compelling because they examine the history of flight through the lens of biography *Flying Fish in the Great White North* Christopher Stuart Taylor,2016-09-15T00:00:00Z Canadians are proud of their multicultural image both at home and abroad But that image isn't grounded in historical facts As recently as the 1960s the Canadian government enforced discriminatory anti Black immigration policies designed to restrict and prohibit the entry of Black Barbadians and Black West Indians The Canadian state capitalized on the public's fear of the Black unknown and racist stereotypes to justify their exclusion In *Flying Fish in the Great White North* Christopher Stuart Taylor utilizes the intersectionality of race gender and class to challenge the perception that Blacks were simply victims of racist and discriminatory Canadian and international immigration policies by emphasizing the agency and educational capital of Black Barbadian emigrants during this period In fact many Barbadians were middle to upper class and were well educated and many particularly women found autonomous agency and challenged the very Canadian immigration policies designed to exclude them **Taking Flight** National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on Education and Training for Civilian Aviation Careers,1997-03-14 The commercial aviation industry is a major part of the U S transportation infrastructure and a key contributor to the nation's economy The industry is facing the effects of a reduced role by the military as a source of high quality trained personnel particularly pilots and mechanics At the same time it is facing the challenges of a changing American workforce This book is a study of the civilian training and education programs needed to satisfy the work force requirements of the commercial aviation industry in the year 2000 and beyond with particular emphasis on issues related to access to aviation careers by women and minorities

viewed as any other business while other experts continue to believe that the sudden switch to deregulation has caused problems especially since many airlines were unprepared for the change Ethical Issues in Aviation focuses on current concerns and trends to reflect the changes that have occurred in this deregulated era The book provides the reader with an overview of the major themes in civil aviation ethics It begins with theoretical frameworks followed by sections on the business side of aviation employee responsibility diversity in aviation ground issues regarding airports air traffic control and security as well as health and the environment The contributors to the volume include both academics doing research in the field as well as professionals who provide accounts of the ethical situations that arise in the workplace *African American Army Officers of World War I* Adam P.
