The Social Origins of the Urban South Louis M. Kyriakoudes, 2004-07-21 In the late nineteenth and early twentieth centuries millions of black and white southerners left farms and rural towns to try their fate in the region's cities This transition brought about significant economic social and cultural changes in both urban centers and the countryside Focusing on Nashville and its Middle Tennessee hinterland Louis Kyriakoudes explores the impetus for this migration and illuminates its effects on regional development Kyriakoudes argues that increased rural to urban migration in the late nineteenth century grew out of older seasonal and circular migration patterns long employed by southern farm families These mobility patterns grew more urban oriented and more permanent as rural blacks and whites turned increasingly to urban migration in order to cope with rapid economic and social change The urban economy was particularly welcoming to women offering freedom from the male authority that dominated rural life African Americans did not find the same freedoms however as whites found ways to harness the forces of modernization to deny them access to economic and social opportunity By linking urbanization economic and social change and popular cultural institutions Kyriakoudes lends insight into the development of an urban white working class identity that reinforced racial divisions and laid the demographic and social foundations for today's modern urban South

The Black Migrant Athlete Munene Mwaniki, 2017-09-01 The popularity and globalization of sport have led to an ever increasing migration of black athletes from the global South to the United States and Western Europe While the hegemonic ideology surrounding sport is that it brings diverse people together and ameliorates social divisions sociologists of sport have shown this to be a gross simplification Instead sport and its narratives often reinforce and re create stereotypes and social boundaries especially regarding race and the prowess and the position of the black athlete Because sport is a contested terrain for maintaining and challenging racial norms and boundaries the black athlete has always impacted popular white perceptions of blackness in a global manner The Black Migrant Athlete analyzes the construction of race in Western societies through a study of the black African migrant athlete Munene Franjo Mwaniki presents ten black African migrant athletes as a conceptual starting point to interrogate the nuances of white supremacy and of the migrant and immigrant experience with a global perspective By using celebrity athletes such as Hakeem Olajuwon Dikembe Mutombo and Catherine Ndereba as entry points into a global discourse Mwaniki explores how these athletes are wrapped in social and cultural meanings by

predominately white owned and dominated media organizations Drawing from discourse analysis and cultural studies Mwaniki examines the various power relations via media texts regarding race gender sexuality class and nationality

Outsiders Inside Bronwen Walter,2002-05-03 Notions of diaspora are central to contemporary debates about race ethnicity identity and nationalism Yet the Irish diaspora one of the oldest and largest is often excluded on the grounds of whiteness *Outsiders Inside* explores the themes of displacement and the meanings of home for these women and their descendants Juxtaposing the visibility of Irish women in the United States with their marginalization in Britain Bronwen Walter challenges linear notions of migration and assimilation by demonstrating that two forms of identification can be held simultaneously In an age when the Northern Ireland peace process is rapidly changing global perceptions of Irishness *Outsiders Inside* moves the empirical study of the Irish diaspora out of the ghetto of Irish Studies and into the mainstream challenging theorists and policy makers to pay attention to the issue of white diversity **Black Migrants: White Natives** Daniel Lawrence,1992 **Foundations of Migration Economics** George J. the history of immigration over the past two centuries migration versus government control migrant poverty versus social mobility ethnic identity versus increasing Anglicisation and above all racism versus multiculturalism Providing an important historical context to contemporary debates and taking into account the complexity and variety of individual experiences over time this book demonstrates that no simple approach or theory can summarise the migrant experience in Britain
