Black Political Development:

Black Political Development Reginald Earl Gilliam, 1975 Black Politics Today Theodore J. Davis Jr., 2013-06-17 The late 1980s ushered in a new era of black politics the socioeconomic transition era Coming on the heels of the protest era and politics era the current stage is characterized by the emergence of a new black middle class that came of age after the Civil Rights struggle Although class still isn't a strong factor in the external politics of the black community it is increasingly a wedge issue in the community's internal politics Black politics today is increasingly less about the interest of the larger group and more about the interest of smaller subgroups within the community Theodore J Davis Jr argues that the greatest threat to the social and political cohesiveness of the so called black community may be the rise of a socially and economically privileged group among the ranks of black America This rift has affected blacks ability to organize effectively and influence politics Davis traces the changes in economic status public opinion political power and participation and leadership over three generations of black politics The result is an insightful analysis of black politics today The Politics of Black Empowerment James Jennings, 2000-01-08 The Politics of Black Empowerment uses the experiences of grassroots activists to develop various conceptualizations and explanations of Black political behavior today In analyzing Black politics since the late 1960s James Jennings focuses on both the behavioral aspects such as individual and group characteristics of voting and nonvoting and elections as well as more fundamental philosophical and cultural questions regarding Black politics This study examines how the traditional face of Black politics and electoral activism interacts with a growing progressive face of Black politics While traditional Black political activists seek access or political incorporation another group aims for power sharing The traditional approach is sometimes satisfied with merely replacing white politicians with Blacks but the progressive constituency focuses on fundamentally changing the whole economic and political pie Activists desirous of Black empowerment are pursuing a political and economic orientation that goes beyond programs based on access to American institutional arrangements and attempting to change or alter given political arrangements and social relations between Blacks and whites on the basis of changing the social structure and the distribution of wealth and power Based on interviews with Black and Latino activists in several big cities as well as on a review of the literature and the Black newspapers around the country The Politics of Black Empowerment describes the characteristics of Black empowerment activism in America

Emigration and Political Development Jonathon W. Moses, 2011-09-26 While policy makers international organizations and academics are increasingly aware of the economic effects of emigration the potential political effects remain understudied This book maps the nature of the relationship that links emigration and political development Jonathon W Moses explores the nature of political development arguing that emigration influences political development In particular he introduces a new cross national database of annual emigration rates and analyzes specific cases of international emigration and out migration within countries under varying political and economic contexts How Ideas Shape Urban Political

Development Richardson Dilworth, Timothy P. R. Weaver, 2020-06-12 A collection of international case studies that demonstrate the importance of ideas to urban political development Ideas interests and institutions are the holy trinity of the study of politics Of the three ideas are arguably the hardest with which to grapple and despite a generally broad agreement concerning their fundamental importance the most often neglected Nowhere is this more evident than in the study of urban politics and urban political development The essays in How Ideas Shape Urban Political Development argue that ideas have been the real drivers behind urban political development and offer as evidence national and international examples some unique to specific cities regions and countries and some of global impact Within the United States contributors examine the idea of blight and how it became a powerful metaphor in city planning the identification of racially defined spaces especially black cities and city neighborhoods as specific targets of neoliberal disciplinary practices the paradox of members of Congress who were active supporters of civil rights legislation in the 1950s and 1960s but enjoyed the support of big city political machines that were hardly liberal when it came to questions of race in their home districts and the intersection of national education policy local school politics and the politics of immigration Essays compare the ways in which national urban policies have taken different shapes in countries similar to the United States namely Canada and the United Kingdom The volume also presents case studies of city based political development in Chile China India and Africa areas of the world that have experienced a more recent form of urbanization that feature deep and intimate ties and similarities to urban political development in the Global North but which have occurred on a broader scale Contributors Daniel B. Black Political Mobilization, Leadership, Power and Mass Behavior Minion K. C. Morrison, 1987-01-01 Black Political Mobilization accounts for the political success of black Americans in the South Minion Morrison returns to Mississippi the center of much of the political activism of the 1960s to analyze the remarkable improvement in black electoral participation in the years following passage of the Voting Rights Act of 1965 Mississippi's substantial black population has experienced marked electoral success despite a history of strict racial exclusion The dramatic and widespread nature of mobilization there makes it one of the most illustrative case studies for exploring this period of political change in America Mississippi represents a broader phenomenon of political change that sustains a new leadership class in the Southern region Three rural Mississippi towns serve as the focal point for the study They each have a population of under 2 000 have overwhelming Afro American voting majorities are poor and largely agricultural have been affected by the civil rights movement of the 60s and have elected a black mayor since 1973 The towns are prime examples of the character and process of minority electoral politics and mobilization in the rural South A new class of black leaders is nurtured and installed in office in an environment where a newly and highly mobilized constituency takes advantage of its

majority status in the electorate This book combines good theory with lively interviews and rich case histories to highlight an essentially new variety of participatory democracy in American politics and government

The Supreme Court and American Political Development Ronald Kahn, Ken I. Kersch, 2006-05-15

This innovative volume explores the evolution of constitutional doctrine as elaborated by the Supreme Court Moving beyond the traditional law versus politics perspective the authors draw extensively on recent studies in American Political Development APD to present a much more complex and sophisticated view of the Court as both a legal and political entity The contributors including Pam Brandwein Howard Gillman Mark Graber Ronald Kahn Tom Keck Ken Kersch Wayne Moore Carol Nackenoff Julie Novkov and Mark Tushnet share an appreciation that the process of constitutional development involves a complex interplay between factors internal and external to the Court They underscore the developmental nature of the Court revealing how its decision making and legal authority evolve in response to a variety of influences not only laws and legal precedents but also social and political movements election returns and regime changes advocacy group litigation and the interpretive community of scholars journalists and lawyers Initial chapters reexamine standard approaches to the question of causation in judicial decision making and the relationship between the Court and the

ambient political order Next a selection of historical case studies exemplifies how the Court constructs its own authority as it defines individual rights and the powers of government They show how interpretations of the Reconstruction amendments inform our understanding of racial discrimination explain the undermining of affirmative action after Bakke and consider why Roe v Wade has yet to be overturned They also tell how the Court has collaborated with political coalitions to produce the New Deal Great Society and Reagan Revolution and why Native Americans have different citizenship rights than other Americans These contributions encourage further debate about the nature and processes of constitutional change and invite APD scholars to think about law and the Court in more sophisticated ways

Preuhs, 2013-01-21 Social science research has frequently found conflict between Latinos and African Americans in urban politics and governance as well as in the groups attitudes toward one another Rodney E Hero and Robert R Preuhs analyze whether conflict between these two groups is also found in national politics Based on extensive evidence on the activities of minority advocacy groups in national politics and the behavior of minority members of Congress the authors find the relationship between the groups is characterized mainly by non conflict and a considerable degree of independence The question of why there appears to be little minority intergroup conflict at the national level of government is also addressed This is the first systematic study of Black Latino intergroup relations at the national level of United States politics
