Black Winged Night Creativity In Nature And Mind:

Off the Main Sequence Tom Easton, 2006-10-01 Tom Easton has served as the monthly book review columnist for Analog Science Fiction for almost three decades having contributed during that span many hundreds of columns and over a million words of penetrating criticism on the best literature that science fiction has to offer His reviews have been celebrated for their wit humor readability knowledge and incisiveness His love of literature particularly fantastic literature is everywhere evident in his essays Easton has ever been willing to cover small presses obscure authors and unusual publications being the only major critic in the field to do so on a regular basis He seems to delight in finding the rare gem among the backwaters of the publishing field A reviewer's job he says is not to judge books for the ages but to tell readers enough about a book to give them some idea of whether they would enjoy it And this he does admirably whether he's discussing the works of the great writers in the field or touching upon the least amongst them This companion volume to Periodic Stars Borgo Wildside collects another 250 of Easton's best reviews from the last fifteen years of The Reference Library No one does it better and no other guide provides such lengthy or discerning commentary on the best SF works of recent times Complete with Introduction and detailed Index

BOOK JACKET Ecomysticism Carl von Essen, 2010-10-19
 Explores the philosophy science and spirituality of nature mysticism and its Green calling Offers a solid bridge between spiritual practice and environmental activism Reveals how we can heal the environment by renewing our connection to it Shows how spiritual encounters in nature are healing the Nature Deficit Disorder of our psyches and bodies Many have been struck by a majestic moment in nature a sole illuminated flower in a shady grove an owl swooping silently across a wooded path or an infinitely starry sky and found themselves in a state of expanded awareness so profound they can feel the interconnectedness of all life These trance like moments of clarity unity and wonder often incite a call to protect and preserve the earth to support Nature as she supports us Termed nature mysticism people from all cultures have described such experiences However the ever increasing urbanization of the world s population is threatening this ancient connection as well as the earth itself In *Ecomysticism* Carl von Essen explores nature mysticism through the recorded experiences of outdoor enthusiasts as well as scientific studies in biology psychology and neuroscience Citing consciousness scholar William James and a variety of well known nature lovers such as Ansel Adams Henry David Thoreau and Ralph Waldo Emerson von Essen shows how the spiritual transcendence from an encounter in nature like other mystical experiences is healing the Nature Deficit Disorder of our psyches and bodies leading to an expansion of our worldview and a clearer understanding of our self and of our natural world Offering a solid bridge between spiritual practice and environmental activism von Essen s spiritual ecology reveals how only through a renewal of humanity s spiritual connection to nature can we effect true environmental healing

Pathways of Chance F. David Peat, 2007 A daring fusion of memoir and leading edge explorations from one of the most interesting and innovative thinkers around today From Liverpool of the Beatles to the Blackfoot Sundance to the medieval Italian village where he now lives *Pathways* is also a highly readable exploration of the latest ideas in science psychology the arts It includes the authors encounters with such figures as Bertrand Russell David Bohm Sir Michael Tippett Sir Roger Penrose and Werner Heisenberg

Gothic Metaphysics Jodey Castricano, 2021-11-15 We live in the time of the Anthropocene which calls for a paradigm shift in our relation to this planet One of the themes of this book is to call attention to the shift This book is a challenge to Literary Gothic and Cultural Studies The case for rethinking approaches to gothic fiction is built on an extended critique of Freudian assumptions and antinomies of the occult associated with mechanism materialism and classical physics a critique informed by Jung and an engaging re evaluation of mystical animist and alchemical modes of thought linked to quantum physics new materialism along with curiously but effectively Derridean deconstruction and cryptonymy Readers will benefit from the depth and breadth of the research in this book that draws upon philosophical anthropological psychoanalytic and scientific thought to engage with a literary genre in a way that changes how we think about Gothic Studies

Teaching for Aesthetic Experience Gene Diaz, Martha McKenna, 2004 The

artist educators in this book invite you to come with them on a journey of discovery into the meaning of teaching for aesthetic experience With learning as their art they create educational encounters with passion and feeling and leave their students with vivid impressions growth and change Each author engages in aesthetic experience from an individual perspective as poet dancer visual artist or musician and each of them engages as an educator who brings art into his or her classroom no matter what the subject Inspired by the words of philosopher Maxine Greene the contributors transform the theoretical into the practical urging students to look to the arts and nature for simple beauty and awaken their minds to new possibilities of creative learning

From Certainty to Uncertainty F. David Peat, 2002-04-24 Early theorists believed that in science lay the promise of certainty Built on a foundation of fact and constructed with objective and trustworthy tools science produced knowledge But science has also shown us that this knowledge will always be fundamentally incomplete and that a true understanding of the world is ultimately beyond our grasp In this thoughtful and compelling book physicist F David Peat examines the basic philosophic difference between the certainty that characterized the thinking of humankind through the nineteenth century and contrasts it with the startling fall of certainty in the twentieth The nineteenth century was marked by a boundless optimism and confidence in the power of progress and technology Science and philosophy were on firm ground Newtonian physics showed that the universe was a gigantic clockwork mechanism that functioned according to rigid laws that its course could be predicted with total confidence far into the future Indeed in 1900 the President of the Royal Society in Britain went so far as to proclaim that everything of importance had already been discovered by science But it was not long before the seeds of a scientific revolution began to take root Quantum Theory and the General Theory of Relativity exploded the clockwork universe proving beyond a shadow of a doubt that our knowledge was at best incomplete and would probably remain that way forever There were places in the universe such as black holes from which no information at all could ever be obtained Chaos Theory also demonstrated our inherent limits to knowing predicting and controlling the world around us and showed the way that chaos can often be found at the heart of natural and social systems Although we may not always recognize it this new world view has had a profound effect not only on science but on art literature philosophy and societal relations The twenty first century now begins with a humble acceptance of uncertainty From Certainty to Uncertainty traces the rise and fall of the deterministic universe and shows the evolving influences that such disparate disciplines now have on one another Drawing on the lessons we can learn from history Peat also speculates on how we will manage our lives into the future

Animal Narratology Joela Jacobs, 2020-12-15 Animal Narratology interrogates what it means to narrate to speak speak for on behalf of and to voice or represent life beyond the human which is in itself as different as insects bears and dogs are from each other and yet more as individual as a single mouse horse or puma The varied contributions to this interdisciplinary Special Issue highlight assumptions about the human perception of attitude toward and responsibility for the animals that are read and written about thus demonstrating that just as the animal does not

well as our environments may enable and allow creativity whereas environments not conducive to creative flow may kill creative potential Also explored are questions of normality beauty and nuance in creativity as well as creative relationships
