Black Gold And Red Lights:

Darkest Truths of Black Gold Robert Palmer Smith, 2007-06 Over forty years ago the British Government warned the Italian Government Don't trust the Russians The author was there Today forty years later Newsweek echoes the same warning to any country that puts its energy sources at the political whim and fancy of Mr Putin And what of the warnings that the United States Government was given over sixty years ago that Mao Ze tung was not the second coming of the Messiah The author was there And he seethed in rage and torment as he tried to sleep on the steel deck of a United States evacuation LST while he heard the Messiah's guns laying siege to Beijing But all good things come to an end even the bad ones and meeting the Queen of England at the Prime Minister's residence The Temple Trees in Ceylon and issuing an invitation to His Royal Highness to play polo more than compensated the author for his first evacuation But the reasons for his second evacuation from Cairo and his family's evacuation from Beirut are not quite as clear as he would like Hearing about them might give the reader some thoughts about the difficulties faced by their fellow citizens who serve them abroad

Corsi, Craig R. Smith, 2021-05-14 It is estimated that Americans consume more than 25 percent of the world's oil but have control over less than 3 percent of its proven supply This extremely unbalanced pattern of consumption makes it possible for foreign governments corrupt political leaders terrorist organizations and oil conglomerates to place the citizens of the United States in a stranglehold of supply and demand There is no greater proof of this than the direct relationship between skyrocketing gas prices and the exploding wealth of those who control the supply of oil In Black Gold Stranglehold Jerome R Corsi and Craig R Smith expose the fraudulent science that has been sold to the American people in order to enslave them the belief that oil is a fossil fuel and a finite resource On the contrary this book presents authoritative research currently known mostly in the scientific community that oil is not a product of decaying dinosaurs and prehistoric forests Rather it is a natural product of the earth The scientific evidence cited by Corsi and Smith suggests that oil is constantly being produced by the earth far below the planet's surface and that it is brought to attainable depths by the centrifugal forces of the earth's rotation In great detail Corsi and Smith explore the international and domestic politics of oil production and consumption This includes the wealth and power of

major oil conglomerates the manipulation of world economies by oil producing states and rogue terrorist regimes and the political agenda of radical environmentalists and conservationists who obstruct the use of oil reserves currently controlled by the U S government The authors offer an understanding of the dangerous situation America faces because its currency is no longer tied to any precious and truly scarce metals such as gold as it was until 1973 This situation could easily lead to the devastation of the U S economy if Middle Eastern countries are able to enact current plans to accept only the Euro or gold backed currencies such as the Gold Dinar instead of the U S dollar as the standard currency for oil Black Gold Stranglehold will dramatically change the debate about oil The significance of its message is sure to cause thoughtful people to reconsider the current dependence of the U S economy on imported oil
