Black History And The Historical Profession 1915 1980:

The debate on black civil rights in America Kevern Verney, 2024-01-16 This book examines the historiography of the African American freedom struggle from the 1890s to the present. It considers how and why the study of African American history developed from being a marginalized subject in American universities and colleges at the start of the twentieth century to become one of the most extensively researched fields in American history today. There is analysis of the changing scholarly interpretations of African American leaders from Booker T. Washington through to Barack Obama. The impact and significance of the leading civil rights organizations are assessed as well as the white segregationists who opposed them and the civil rights policies of presidential administrations from Woodrow Wilson to Donald Trump. The civil rights struggle is also discussed in the context of wider political, social and economic changes in the United States and developments in popular culture. *Black History and the Historical Profession, 1915-80* August Meier, Elliott Rudwick, Elliott M.

Rudwick, 1986. Meier and Rudwick show how black history originally a Jim Crow specialty ignored by nearly the entire historical profession has evolved into one of the liveliest and most active areas of study. A remarkable self-examination of the authors' own profession, this volume blends research in primary and secondary sources with extensive interviews of nearly 200 scholars including the most highly respected names in the field. The "Underclass" Debate Michael B. Katz, 2018-06-05

Do ominous reports of an emerging underclass reveal an unprecedented crisis in American society? Or are social commentators simply rediscovering the tragedy of recurring urban poverty as they seem to do every few decades? Although social scientists and members of the public make frequent assumptions about these questions, they have little information about the crucial differences between past and present. By providing a badly needed historical context, these essays reframe today's underclass debate. Realizing that labels of social pathology echo fruitless distinctions between the deserving and undeserving poor, the contributors focus not on individual and family behavior but on a complex set of processes that have been at work over a long period, degrading the inner cities and inevitably the nation as a whole. How do individuals among the urban poor manage to survive? How have they created a dissident infrapolitics? How have social relations within the urban ghettos changed? What has been the effect of industrial restructuring on poverty? Besides exploring these questions, the contributors discuss the influence of African traditions on the family patterns of African Americans, the origins of institutions that serve the urban poor, the reasons for the crisis in urban education, the achievements and limits of the War on Poverty, and the role of income transfers, earnings, and the contributions of family members in overcoming poverty. The message of the essays is clear: Americans will flourish or fail together. *The Early Black History Movement, Carter G. Woodson, and Lorenzo Johnston Greene* Pero Gaglo Dagbovie, 2007. The men who launched and shaped black studies. This book examines the lives, work, and contributions of two of the most important figures of the early black history movement: Carter G.
