Black Thunder:

Operation "The Black Thunder" Michail Bairachniy, 2012-09-20 The book is about the fact that in the thirties of the twentieth century there was an expedition to find the message of Hitler's notorious Tibet Shambhala. At the same time Russian intelligence learned of the expedition and sent one of their men Colonel Schwartz. He destroyed the Russian and went into Shambhala. There still unknown to what purpose the ancient people that had survived in Shambhala gave Schwartz coordinates to a secret base of some ancient civilization. Schwartz reported to Hitler and he agreed to send submarines to Antarctica. Schwartz did find a base there and even UFOs. He faced new aircraft and he even flew to the moon. But the inhabitants of Shambhala had an interest; they had long conceived to take possession of some device that could animate the ruined planet. At that time Schwartz tossed the captured Russian who would pilot a flying saucer. The Russian knew of the job and the secret of Shambhala but refused to talk about it to Schwartz. The colonel agreed to fly to another galaxy to understand who and what was using it. And meanwhile there was a building in Antarctica, New Swabia, shelters for the top of the Reich. Schwartz successfully flew to Mars and found there some civilization that lived deep beneath the surface. Then the colonel's group went for the mysterious cargo. Schwartz had many adventures on the way but he was able to deceive the enemy and captured the mysterious cube, the device that the people of Shambhala wanted to get. Schwartz understood that this cube could be a dangerous weapon and decided to hide it so it would not be found by Hitler. Colonel radically changed his attitude and then realized that the war was very bad. Americans learned about the construction of the base and sent their fleet but the colonel did not want to fight the war; it was really bad.

Mythic Black Fiction Jane Campbell, 1989 Campbell examines Black literature as it seeks to reverse and supplant the various dehumanizing myths promulgated by White American culture. Analyzing fourteen literary works written over more than a century, Campbell shows that this fiction permits Black authors to act as revisionist historians offering a transcendent view of the future through an exploration of the past. In searching for rhetorical devices according to Campbell, Black writers often draw on elements of myth that by definition articulate a culture's most profound perceptions and can be used in fiction to awaken readers' deepest urges. In a substantial work of literary history, Jane Campbell undertakes to reassess 14 Afro-American historical novels which encapsulate the realities of various periods: slavery, post-Reconstruction, and the decades leading up to the eighties. This book is worth reading by any student of Afro-American literary history.

Cheryl Clarke *The Black Scholar* It is an important study which will enable us to better understand the full range of Afro-American literature.

Black Planet 2068 Matthew Landon Kilgore LLC., 2025-03-06 Two hundred years since gold was taken from the Black Hills in 1868, Native Americans again find themselves protecting their gold against unscrupulous government officials from the celestial body they call the Black Planet with the help of loyal Americans, pirates, and even Russians. It is a desperate battle that calls upon folklore, superstition, bravery, spaceship battles, love, and luck with many surprises.

Mastalerz,M. V. Glikson,Suzanne D. Golding,2013-03-09 Coalbed gas has been considered a hazard since the early 19th century when the first mine gas explosions occurred in the United States in 1810 and France in 1845 In eastern Australia methane related mine disasters occurred late in the 19th century with hundreds of lives lost in New South Wales and as recently as 1995 in Queensland s Bowen Basin Ventilation and gas drainage technologies are now in practice However coalbed methane recently is becoming more recognized as a potential source of energy rather than emitting this gas to the atmosphere during drainage of gassy mines it can be captured and utilized Both economic and environmental concerns have sparked this impetus to capture coalbed methane The number of methane utilization projects has increased in the United States in recent years as a result to a large extent of development in technology in methane recovery from coal seams Between 1994 and 1997 the number of mines in Alabama Colorado Ohio Pennsylvania Virginia and West Virginia recovering and utilizing methane increased from 10 to 17 The Environmental Protection Agency estimates that close to 49 billion cubic feet of methane was recovered in 1996 meaning that this amount was not released into the atmosphere It is estimated that in the same year total emissions of methane equaled 45.7 Bcf Other coal mines are being investigated at present many of which appear to be promising for the development of cost effective gas recovery **South Powder River Basin Coal**
