Churches in Early Medieval Ireland Tomás Ó Carragáin, 2010 This is the first book devoted to churches in Ireland dating from the arrival of Christianity in the fifth century to the early stages of the Romanesque around 1100 including those built to house treasures of the golden age of Irish art such as the Book of Kells and the Ardagh chalice Carragáin's comprehensive survey of the surviving examples forms the basis for a far reaching analysis of why these buildings looked as they did and what they meant in the context of early Irish society Carragáin also identifies a clear political and ideological context for the first Romanesque churches in Ireland and shows that to a considerable extent the Irish Romanesque represents the perpetuation of a long established architectural tradition **Tales of the Irish Hedgerows** Tony

Locke, 2017-04-03 Traditional hedgerows are rapidly vanishing from our countryside With their disappearance we lose not only their flora and fauna but also the tales and folklore that have always surrounded them This book records these stories before they disappear from memory With chapters dedicated to specific plants or animals we learn about the folklore of the hedgehog the badger woodmouse thrush wren bumblebee hawthorn foxglove and hazel and many more These are tales of wisdom and magic that help us to gain a greater understanding of the natural world we live in and which encourage us to live in closer harmony with that world **Pilgrimage in Ireland** Peter Harbison, 1995-06-01 The landscape of Ireland is rich

with ancient carved stone crosses tomb shrines Romanesque churches round towers sundials beehive huts Ogham stones and other monuments many of them dating from before the 12th century The purpose and function of these artifacts have often been the subject of much debate Peter Harbison proposes in this book a radical hypothesis that a great many of these relics can be explained in terms of ecclesiastical pilgrimage He has constructed a fascination theory about the palace of pilgrimage in the early Christian period placing it right at the center of communal life The monuments themselves make much better sense if it looked at in this light as having come into existence not through the practices of ascetic monks but because of the activities of pilgrims He begins by searching the historical sources in detail for evidence of early pilgrimage sites By examining their monuments he projects the findings to other locations where pilgrimage has not been documented He goes

on to describe monument types of every kind and to identify pilgrims in sculpture surviving from before AD 1200 The Dingle Peninsula in Kerry proves to be a microcosm of pilgrimage monuments enabling the author to reconstruct a tradition of maritime pilgrimage activity up and down the west coast of Ireland Indeed the famous medieval traveler's tale of the fabulous voyage of the St Brendan the Navigator can now be seen as the literary expression of a longstanding maritime pilgrimage along the Atlantic seaways of Ireland and Scotland reaching Iceland Greenland and even North America The Antiquities of Ireland Edward Ledwich, 1804 *The Rood in Medieval Britain and Ireland, C.800-c.1500* Philippa Turner, Jane Hawkes, 2020 New readings demonstrate the centrality of the rood to the visual material and devotional cultures of the Middle Ages its richness and complexity The rood was central to medieval Christianity and its visual culture Christ's death on the cross was understood as the means by which humankind was able to gain salvation and depictions of the cross and Christ's death upon it were ubiquitous This volume brings together contributions offering a new perspective on the medieval rood understood in its widest sense as any kind of cross within the context of Britain and Ireland over a wide period of time which saw significant political and cultural change In doing so it crosses geographical chronological material and functional boundaries which have traditionally characterised many previous discussions of the medieval rood Acknowledging and exploring the capacity of the rood to be both universal and specific to particular locations and audiences these contributions also tease out the ways in which roods related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional monumental wooden roods in English monasteries Irish friaries and East Anglian parish churches roods that fit in the palm of a hand encased in precious metals those that were painted on walls drawn on the pages of manuscripts and those that appeared in visions dreams and gesture related to one another as well as how they related to their physical and cultural surroundings often functioning in dialogue with other images and the wider devotional topography both material and mental in which they were set The chapters consider roods in a variety of media and contexts the monumental stone crosses of early medieval England twelfth century Ireland and spreading further afield late medieval Galicia the three dimensional

damage as ask and answer the perplexing question why This book traces human reverence for birds from the Stone Age and the New Stone Age through the cultures of Mesopotamia Egypt Peru and Greece and through biblical traditions up to its vestiges in the present Richard Pope takes a hard look at Judaeo Christian and ancient Greek thought to demonstrate how the emergence of anthropocentrism and belittling of nature led to our present day ecological dilemma Striking images of cultural artifacts many little known together with extensive discussion of art music literature and religion illustrate the paradox in our contemporary relationship to the natural world Humanity in moving from its paleolithic origins to modern times has simultaneously distanced itself from and disenchanted nature Suggesting that the replacement of an animistic worldview with a mechanistic one has led humans to deny their animality Flight from Grace calls on readers to appreciate how our past relationship with birds might help transform our current relationship with nature
