Hale hall: with notes on the family of Ireland Blackburne [by C. Blackburne]. Charlotte Blackburne, 1881 *How to Return a Lady's Slipper* Bree Wolf, 2022-03-03 She trusted once It nearly cost her everything Emma hides behind routine behind careful silence behind a life shaped by shadows Once she let someone in and paid the price Now as a governess in London's glittering society she's mastered invisibility Until a certain duke returns with a past of his own and eyes that seem to see too much He's sworn off feelings She's afraid to believe Ash Hugh Ashford to the ton is no ordinary nobleman Years of work for the Crown have taught him to question everything and trust no one Still something about Emma reaches past every guard he's ever built Her quiet grace Her careful distance Her strength that flickers even when fear fights to dim it Together they stand at the edge of something risky and real She's been threatened before He's faced danger more times than he can count But love That's a risk neither knows how to survive Yet not trusting is its own loss It means staying safe but alone As Emma becomes entangled in the investigation that brought Ash home trust soon becomes their only currency And choosing each other may be the most reckless and most necessary move of all Her heart remembers what it cost to believe This time she just might decide it's worth it If you've ever been afraid to trust again and still longed for someone who sees your fear and stays anyway this story is yours

The Thought Reader Craze Barry H. Wiley, 2012-10-06 Beginning in 1870 the hunger for scientific discovery in Great Britain drove prominent scientists philosophers and others to promote the legitimacy of telepathy At the same time mind

reading as a form of entertainment gained increasing popularity as persuasive performers like John Randall Brown W I Bishop and Stuart C Cumberland convinced reporters that they truly could read the thoughts of others The widely publicized sometimes bizarre interactions between scientists and these charlatans ushered in the Thought Reader Craze a period that lasted through about 1910 and saw entertainers make and lose fortunes and scientists make and lose reputations This volume explores this unusual cultural phenomenon showing how it was aided through the years by public scientific pronouncements astonishing performances by the thought readers and the rapidly changing industrial society

Elizabeth Blackburn and the Story of Telomeres Catherine Brady, 2009-02-13 The story of molecular biologist Elizabeth Blackburn and her groundbreaking research on telomeres and what it reveals about the resourceful opportunism that characterizes the best scientific thinking Molecular biologist Elizabeth Blackburn one of Time magazine's 100 Most Influential People in the World in 2007 made headlines in 2004 when she was dismissed from the President's Council on Bioethics after objecting to the council's call for a moratorium on stem cell research and protesting the suppression of relevant scientific evidence in its final report But it is Blackburn's groundbreaking work on telomeric DNA which launched the field of telomere research that will have the more profound and long lasting effect on science and society In this compelling biography Catherine Brady tells the story of Elizabeth Blackburn's life and work and the emergence of a new field of scientific research on the specialized ends of chromosomes and the enzyme telomerase that extends them In the early stages of telomere research telomerase heralded as a potential cure for cancer and diseases related to aging attracted the voracious interest of biotech companies The surrounding hype succeeded in confusing the role of telomerase in extending the life of a cell with a mechanism that might extend the lifespan of an entire organism In Brady's hands Blackburn's story reveals much about the tension between pure and applied science the politicking that makes research science such a competitive field and the resourceful opportunism that characterizes the best scientific thinking Brady describes the science accessibly and compellingly She explores Blackburn's struggle to break down barriers in an elite male dominated profession her role as a mentor to other women scientists many of whom have made their mark in telomere research and the collaborative nature of scientific work This book gives us a vivid portrait of an exceptional woman and a new understanding of the combination of curiosity imaginative speculation and aesthetic delight that powers scientific discovery

spite of his political inexperience and the revelation that he had practiced germ warfare during the Civil War While in office he sought prison reform and the relief of the unbelievable overcrowding at the state penitentiary pardoning hundreds of inmates and drawing bitter criticism from across the Commonwealth Yet his continued efforts to improve prison conditions set Kentucky on the slow road to penal reform His contemporaries labeled Blackburn a philanthropist a mass murderer a good Samaritan and an old loon Nancy Disher Baird portrays him as a man who stood by his convictions whether they required strict enforcement of innovative public health measures or unpopular expenditures on behalf of convicts
