America's giants of black radicalism has lost none of its prescience or power One of America's most historic political trials is undoubtedly that of Angela Davis Opening with a letter from James Baldwin to Davis and including contributions from numerous radicals such as Black Panthers George Jackson Huey P Newton Bobby Seale and Erica Huggins this book is not only an account of Davis's incarceration and the struggles surrounding it but also perhaps the most comprehensive and thorough analysis of the prison system of the United States Since the book was written the carceral system in the U S has seen unprecedented growth with more of America's black population behind bars than ever before The scathing analysis of the role of prison and the policing of black populations offered by Davis and her comrades in this astonishing volume remains as pertinent today as the day it was first published Featuring contributions from George Jackson Bettina Aptheker Bobby Seale James Baldwin Ruchell Magee Julian Bond Huey P Newton Erika Huggins Fleeta Drumgo John Clutchette and others

Women's Crimes, Criminology, and Corrections Joycelyn M. Pollock, 2014-04-14 Historically women have been an afterthought in criminal justice policymaking and the criminological enterprise The study of criminology has largely been the study of criminal men because women commit less crime than men More recently criminologists have paid increased attention to the population of female offenders partly because of their growing numbers and partly because of the tens of thousands of children affected by having their mothers in prison or on supervised release The recent attention however has not necessarily been a good thing for women who are much more likely to be formally prosecuted and incarcerated today than in decades past This policy shift has come about partly because of misinformed policies implemented to help women and partly because of shifts in theorists' beliefs and public perceptions that women and men are similar in

their criminal motivations and should therefore be treated similarly The controversy surrounding this perception is the focus of this book To better comprehend the challenges facing women in the criminal justice system the author a winner of the Bruce Smith Sr Award from the Academy of Criminal Justice Sciences employs research findings and statistics to describe the prevalence and patterns of women s crimes review criminological theories specifically examining how well they explain female criminality understand female juvenile offenders reviewing crime rates theories relating to female delinquency and detention related issues look inside the women s prison to better understand female prisoners and their world examine classification and programming issues particularly the impact of gender specific programming and explore the problems experienced by women upon release and the related issue of women s recidivism
