Blacks And The Military Studies In Defense Policy:

Blacks and the Military Martin Binkin, Mark J. Eitelberg, 2011-02-01 For much of the nation's history the participation of blacks in the armed forces was approximately in line with their proportion in the total population. This changed during the 1970s by 1980 one of every three Army GIs and one of every five marines were black. The reaction has been mixed. Many Americans look with approval on the growth of black participation in military service since it often affords young blacks educational, social, and financial opportunities that constitute a bridge to a better life not otherwise available to them. But for other Americans the opportunities are outweighed by the disproportionate imposition of the burden of defense on a segment of the population that has not enjoyed a fair share of the benefits that society confers. From this perspective the likelihood that blacks would suffer at least a third and perhaps a half of the combat fatalities in the initial stages of conflict is considered immoral, unethical, or otherwise contrary to the precepts of democratic institutions. Some also worry that military forces with such a high fraction of blacks entail risks to U.S. national security. A socially unrepresentative force, it is argued, may lack the cohesion considered vital to combat effectiveness. Others fear that such a force would be unreliable if it were deployed in situations that would test the allegiance of its minority members. And some have even expressed concern that a large proportion of blacks may raise questions about the status of U.S. fighting forces as judged by the American public, the nation's allies, and its adversaries. The authors of this book examine evidence on both sides of the issue in an effort to bring objective scrutiny to bear on questions that for many years have been loaded with emotion and subjective reaction. They also discuss the implications for the military's racial composition of demographic, economic, and technological trends and the possible effects of returning to some form of conscription.

Fighting on Two Fronts James E. Westheider, 1999-04 In this dramatic history of race relations during the Vietnam War, James E. Westheider illustrates how American soldiers in Vietnam grappled with many of the same racial conflicts that were roiling their homeland thousands of miles away. Over seven years in the making, *Fighting on Two Fronts* draws on interviews with dozens of Vietnam veterans, black and white, and official Pentagon documents to paint the first complete picture of the African American experience in Vietnam.

[Integrating the US Military](#) Douglas Walter Bristol, Heather Marie Stur, 2017-05 *Integrating the US Military* is an edited collection that examines the US Army's role and place in progressive social change through the lens of the military experience of African Americans, women, and gays since World War II. By making this long overdue comparison, the editors argue, this anthology demonstrates how the challenges launched against the racial, gender, and sexual status quo in the years after World War II transformed overarching ideas about power, citizenship, and America's role in the world. This anthology's major contribution is synthesizing recent scholarly work on the history of minorities and women in the US military. It does so by examining connections between GIs and civilian society in the context of ideologies of race, gender, and sexuality. Given the militarization of American society since World War II, revealing the links between these legally

marginalized groups within the Armed Services is historically significant in its own right. At the same time this comparison also sheds new light on a broad range of issues that affected civilian society such as affirmative action, integration, marriage laws and sexual harassment. Integrating the US Military is a book designed for college students, military professionals, policy makers and general readers. Allowing readers to view the history of several civil rights movements within the Armed Forces will prompt them to rethink the way they understand the history of social movements. It will also help them to better understand the relationship between the military and American society. Finally, readers will gain a historical perspective on recent debates about the rights of gays in the military and the implications of deploying women in combat.

Provided by publisher: *Political Warfare in Republican Vietnam* Robert A. Silano, 2024-08-22. This work examines the development of the Republic of Vietnam Armed Forces as a national institution, explores the historical origins of the political warfare system, and assesses that system's nurturing of military morale, popular support, and ways to weaken enemy resolve. North Vietnam in the 1940s and South Vietnam in the 1960s embraced the system of political control over the military that was developed in Soviet Russia after the Bolshevik Revolution and in Republican China in the 1920s, where it influenced both the Nationalist and Communist movements. The book discusses the overall effectiveness of political warfare activities in the Republic of Vietnam's army, the advice and support offered by the U.S. military to the South Vietnamese political warfare establishment, and the consequences of the war's end for the members of the Republic of Vietnam Armed Forces who served in the political warfare system.

History of the U.S. Army Cadet Command Arthur Thomas Coumbe, 2008. Provides a detailed account of the U.S. Army Cadet Command activities between 1996 and 2006, telling of the Army's expectations of the ROTC program and providing an analysis of success and challenges of recruitment within the 20th century and beyond.

Contested Valor Cameron D. McCoy, 2023-11-16. *Contested Valor* is a challenging examination of the use and status of black Marines in United States military service during the Cold War era. These pioneering men experienced contested military integration as well as multiple forms of institutional and social opposition which called their humanity, manhood, and rights to full citizenship into question. Efforts to undermine their service compromised their right to be counted among the elite and sidelined their story to the fringes of Marine Corps and U.S. history. Cameron McCoy describes the factors and pressures leading to the racial turbulence that surfaced in the Marine Corps from the end of World War II through Vietnam and the measures taken by civilian and Marine officials to maintain and restore organizational integrity based on a foundation of white supremacy. He examines the psychological effects of institutionalized racism on African American Marines during the Vietnam era and the emergence of a new generation of black men unwilling to submit to the traditions of a Jim Crow Marine Corps. By exploring the realities American society constructed about black Marines, this work calls attention to the diverse ways in which these men coped within a strict prejudiced organization and found greater purpose as U.S. Marines despite an embattled image. *Contested Valor* weaves the experiences of black Americans in the armed forces into the larger tapestry of the American

racialist past and aptly captures the dilemmas triumphs and pitfalls that the first African American Marines encountered during the contentious eras of World War II Korea and Vietnam McCoy explores the creation of organizational policies designed to minimize their footprint as U S Marines until the social experiment of military integration faded and illustrates the discriminatory practices that further delegitimized their wartime reputation McCoy demonstrates that black Marines absence from the historical record has been compounded by the negligence and oversight of past historians as the Marine Corps reckons with its racist past and its first black Marines Military Enlistment of Hispanic Youth Beth J. The African American Experience in Vietnam James E. Westheider,2008 In this book James E Westheider explores the social and professional paradoxes facing African American soldiers in Vietnam Service in the military started as a demonstration of the merits of integration as blacks competed with whites on a near equal basis for the first time Yet as the war in Vietnam progressed many black recruits felt isolated and threatened in an institution controlled almost totally by whites Consequently many blacks no longer viewed the military as a professional opportunity but an undue burden on the
