and throws fresh light on this very heterogeneous phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law
