The Blaming and Shaming of Defenseless Victims in America's Rape Culture Lisa R. Smith, 2022-04-27 Every sixty-eight seconds an American is sexually assaulted, Lisa Smith writes in light of this startling statistic and against the backdrop of the blaming and shaming of countless victims to ask one important question: why does America's rape culture continue to exist? *The Blaming and Shaming of Defenseless Victims in America's Rape Culture* explores the ways collective memory, religion, and sexist beliefs are used to silence survivors and protect the powerful. The author delves into how justice is denied in sexual assault cases: rape kits untested by law enforcement agencies, information suppression through non-disclosure agreements, and denial and inaction by organizations, universities, corporations, and people all contribute to undetected rapists in our society. Despite these discouraging happenings, the MeToo movement proved that legions of survivors of sexual violence can use their voice to fight back. Oral and historical narratives are included to encourage others to share their stories and promote social accountability. Through insightful research and analysis, the author offers a much-needed viewpoint on a vital and timely issue: why and how American society is perpetuating and protecting a dangerous culture of sexual violence and even more importantly, how to fight back.

Knowing Victims Rebecca Stringer, 2014-06-20 *Knowing Victims* explores the theme of victimhood in contemporary feminism and politics. It focuses on popular and scholarly constructions of feminism as victim feminism, an ideology of passive victimhood that denies women's agency and provides the first comprehensive analysis of the debate about this ideology which has unfolded among feminists since the 1980s. The book critically examines a movement away from the language of victimhood across a wide array of discourses and the neoliberal replacement of the concept of structural oppression with the concept of personal responsibility. In derogating the notion of victim, neoliberalism promotes a conception of victimization as subjective rather than social, a state of mind rather than a worldly situation. Drawing upon Nietzsche, Lyotard, rape crisis feminism, and feminist philosophy, Stringer situates feminist politicizations of

rape interpersonal violence economic inequality and welfare reform as key sites of resistance to the victim blaming logic of neoliberalism She suggests that although recent feminist critiques of victim feminism have critically diagnosed the anti victim movement they have not positively defended victim politics Stringer argues that a conception of the victim as an agentic bearer of knowledge and an understanding of resentment as a generative force for social change provides a potent counter to the negative construction of victimhood characteristic of the neoliberal era This accessible and insightful analysis of feminism neoliberalism and the social construction of victimhood will be of great interest to researchers and students in the disciplines of gender and women s studies psychology sociology politics and philosophy Blaming the Victim Richard Allen Measel, Old Dominion University.
