The Early Literacy Handbook Dominic Wyse, Christine Parker, 2013-03-27 The heart of this book is a new approach to the teaching of language and literacy. Its focus is exemplary classroom practice built on rigorous theory and evidence. The approach combines new theory and dynamic practice in its advocacy for contextualised teaching. This book shows how the teaching of smaller units of language such as sentences, words, letters, and phonemes follows naturally from the context of whole texts. The book offers practical examples, photographs from settings, case studies, and action points to help any practitioner working with young children to develop one of the most crucial life skills: advice on how to build on children's motivation using whole texts, clear guidance on phonics teaching in an appropriate context, and a unique blend of new theory and dynamic practice.

Techniques covered include Graded questioning, The buddy system, The rainbow bridge, Voice exposure. The reader is offered detailed examples of what worked for Amy in a variety of situations, including in school, at breaktimes, in extra-curricular activities, on playdates, and at birthday parties. These examples are followed up with suggestions and ideas of how these experiences could be applied to other children, making it ideal reading for anyone involved in the care of a child with selective mutism.
