Teaching Malcolm X Theresa Perry, 2014-01-02 The volume brings together a dazzling array of perspectives on Malcolm X to discuss the importance of X as a cultural hero and provide guidelines for teaching Malcolm related material at elementary high school and university levels **Nephrology Forum** J.J. Cohen, J.T. Harrington, J.P. Kassirer, 2012-12-06 A few years ago as the editor of Kidney International I was approached by Drs Cohen Kassirer and Harrington who suggested that a new feature should be included in each monthly issue of the journal They suggested that it should employ a case discussion format such as that used frequently at specialty rounds in teaching hospitals and that the discussion should place

a special emphasis on the relationship between basic science and important problems in clinical nephrology The summary of an actual patient history would first be presented to exemplify a particular clinical problem a seasoned person of proven expertise would be invited to deliver a well documented analysis of the relevant issues and perhaps most ambitiously of all a critical audience would be assembled to challenge the principal discussant in an open ended question and answer period The entire affair would be recorded at the time of the live conference and transcribed subsequently in preparation for publication as a Nephrology Forum I must confess that I was somewhat hesitant at first to endorse their proposal because at the time Kidney International had just begun to establish a solid reputation for the publication of high quality peer reviewed manuscripts dealing with the clinical and laboratory research interests of the international nephrological community

Alternatives to Cartography Jeroen van Craenenbroeck, 2009-12-15 In the 1980s generative grammar recognized that functional material is able to project syntactic structure in conformity with the X-bar format This insight soon led to a considerable increase in the inventory of functional projections The basic idea behind this line of theorizing which goes by the name of cartography is that sentence structure can be represented as a template of linearly ordered positions each with their own syntactic and semantic import In recent years however a number of problems have been raised for this approach For example certain combinations of syntactic elements cannot be linearly ordered In light of such problems a number of alternative accounts have been explored Some of them propose a new often interface related trigger for movement while others seek alternative means of accounting for various word order patterns These alternatives to cartography do not form a homogeneous group nor has there thus far been a forum where these ideas could be compared and confronted with one another This volume fills that gap It offers a varied and in depth view on the position taken by a substantial number of researchers in the field today on what is presumably one of the most hotly debated and controversial issues in present day generative grammar

Used Books William H. Sherman, 2010-11-24 In a recent sale catalog one bookseller apologized for the condition of a sixteenth century volume as rather soiled by use When the book was displayed the next year the exhibition catalogue described it as well and piously used with marginal notations in an Elizabethan hand that bring to life an early and earnest owner and the book's buyer for his part considered it to be enlivened

by the marginal notes and comments For this collector as for an increasing number of cultural historians and historians of the book a marked up copy was more interesting than one in pristine condition William H Sherman recovers a culture that took the phrase mark my words quite literally Books from the first two centuries of printing are full of marginalia and other signs of engagement and use such as customized bindings traces of food and drink penmanship exercises and doodles These marks offer a vast archive of information about the lives of books and their place in the lives of their readers Based on a survey of thousands of early printed books Used Books describes what readers wrote in and around their books and what we can learn from these marks by using the tools of archaeologists as well as historians and literary critics The chapters address the place of book marking in schools and churches the use of the manicule the ubiquitous hand with pointing finger symbol the role played by women in information management the extraordinary commonplace book used for nearly sixty years by Renaissance England s greatest lawyer statesman and the attitudes toward annotated books among collectors and librarians from the Middle Ages to the present This wide ranging learned and often surprising book will make the marks of Renaissance readers more visible and legible to scholars collectors and bibliophiles
