Time, Astronomy, and Calendars in the Jewish Tradition Sacha Stern, Charles Burnett, 2013-11-07 The study of time astronomy and calendars has been closely intertwined in the history of Western culture and more particularly Jewish tradition Jewish interest in astronomy was fostered by the Jewish calendar which was based on the courses of the sun and the moon whilst astronomy in turn led to a better understanding of how time should be reckoned Time Astronomy and Calendars in the Jewish Tradition edited by Sacha Stern and Charles Burnett presents a wide selection of original research in this multi disciplinary field ranging from Antiquity to the later Middle Ages Its variety of approaches and sub themes reflects the relevance of astronomy and calendars to many aspects of Jewish and more generally ancient and medieval culture and social history Contributors include Jonathan Ben Dov Reimund Leicht Marina Rustow Francois de Blois Raymond Mercier Philipp Nothaft Josefina Rodriguez Arribas Ilana Wartenberg Israel Sandman Justine Isserles Anne C Kineret Sittig Katharina Keim and Sacha Stern **Countdown Calendars** Susanne Woods, 2011-06-01 Make delightful calendars for Advent or Hanukkah birthdays vacations new babies and other happy events Make every occasion even more special Today s top designers share their ideas and techniques on how to commemorate life s celebratory moments plus a couple to help us with challenges and chores Great for both kids and adults equal parts inspiration and how to this collection of custom crafted countdown calendars is packed with creative ways to say 3 2 1 hooray **Holiday Symbols & Customs, 5th Ed.** James Chambers, 2015-07-01 A guide to the legend and lore behind the traditions rituals foods games animals and other symbols and activities associated with holidays and holy days feasts and fasts and other celebrations **Making Strategies in Spatial Planning** Maria Cerreta, Grazia Concilio, Valeria Monno, 2010-09-11 This provocative collection of essays challenges traditional ideas of strategic s tial planning and opens up new avenues of analysis and research The diversity of contributions here suggests that we need to rethink spatial planning in several f reaching ways Let me suggest several avenues of such rethinking that can have both theoretical and practical consequences First we need to overcome simplistic bifurcations or dichotomies of assessing outcomes and processes separately from one another To lapse into the nostalgia of imagining that outcome analysis can exhaust strategic planners work might appeal to academics content to study what should be but it will doom itself to further irrelevance ignorance of politics and rationalistic technocratic fantasies But to lapse into an optimism that good process is all that strategic planning requires similarly rests upon a ction that no credible planning analyst believes that enough talk will miraculously transcend con ict and produce agreement Neither sing minded approach can work for both avoid dealing with con ict and power and both too easily avoid dealing with the messiness and the practicalities of negotiating out con icting interests and values and doing so in ethically and politically critical ways far from resting content with mere compromise Second we must rethink the sanctity of expertise By considering analyses of planning outcomes as inseparable from planning processes these accounts help us to see expertise and substantive analysis as being on tap ready

to put into use rather than being particularly and technocratically on top

technologies separates Olders and Youngers Today five of these cohorts the youngest Builders Silents Boomers GenX and the oldest Millennials are playing adult roles in a world that recently seemed to be populated by Elders and Parents raising Children It is making everyone grumpy There does not seem to be psychological room for all these players The March 2011 cover of Philadelphia Magazine pictured a generic texting device with the following text Dear Baby Boomers Just die already Well take Philly from here Thanks XOXO Generation X In congregation after congregation Olders are wondering why the Youngers dont seem to be attending worship regularly Yet when they do come the Olders wish they would make their children stop texting and the parents would stop checking their cell phones Youngers are wondering why Olders want to have all these time wasting repetitive meetings and wont use e technologies to avoid them And why arent they being respected Congregational Connections offers a discussion of who these cohorts are and why they act the way they do Its nine chapters cover How We Got Here Six Different Cohort Experiences The Generational Divide Realities for Congregational Life Worship Christian Formation Programs and Space Community is Congregation and The Way Forward Hope The books aim is not only to have readers become aware of the six cohorts and their different attitudes and needs but also to offer insights through Congregational Moments case studies that let readers see how these realities play out in church life and suggest questions for discussion Why is it happening now In her book The Great Emergence Phyllis Tickle offers us a thesis that we are in the middle of the next Reformation These happen every five hundred years and take about 150 years to roll their paradigm shift of technology and worldview through society The last Reformation was fueled by printing technology that promoted widespread literacy and a worldview shift that supported increasing political democracy and social leveling The one that we are living through now is about electronic technology radio phone television computers internet and who knows and an even flatter social environment Those changes by themselves seem sufficient to make the Second Reformation happen Yet added to their pressures is the arrival of six generational cohorts on the worlds playing field Each cohort has its own identity but Olders and Youngers break into two different sides of the game Whats more by the time the Second Reformation finishes rolling through medical advances may add several decades to the average lifespan Perhaps eight nine or even more generational cohorts will be alive together at its end Right now congre

The Connected Home: The Future of Domestic Life Richard Harper,2012-01-11 The title of this new book The Connected Home reflects the move away from the idea that smart homes would alter the lives of those living in them by providing technologies to take over tasks that were previously the responsibility of the householder such as managing entertainment education and even eating Up until around 10 years ago this view was commonplace but time has shown that the technologies to support a smart home have not developed in such a way as to support this premise Instead what people do in their homes has moved the concept of a smart home into that of the connected home The rise of on line games technologies video connections via Skype social networking internet browsing etc are now an integral part of the home environment and have had a significant effect on the home The contributors to this exciting new book consider and discuss the effects and ramifications of the connected home from a variety of viewpoints an examination of the take up of personal computers and the Internet in domestic situations an analysis of the changing intersection of technology and human habits in the connected home the impact of gaming texting e book readers tablets and other devices and their effect on the social conditions of a household the relationship between digital messaging applications and real geography and an overview of how sensing technologies for the smart home might evolve lightweight medical technologies for example The book culminates by addressing unfinished ambitions from the smart home agenda the factors that have prevented their realisation and addresses the need for extending research into the area

Himalayan Nature and Tibetan Buddhist Culture in Arunachal Pradesh, India Kazuharu Mizuno, Lobsang

Tenpa, 2015-06-01 This is the first book to systematically describe the formation and historical changes of the Monpa people's area Monyul through its nature, society, culture, religion, agriculture, and historically deep ties with Bhutan, Tibet, and the Tibetan Buddhist faith. The state of Arunachal Pradesh is located in the northeastern part of India, surrounded by the borders of Assam, Bhutan, and Tibet, China. There has been a long history of conflict over the sovereignty of this area between India and China. Foreigners were prohibited from entering the state until the 1990s, and the area has been veiled in secrecy until recently. Thus, there are not many academically researched works on the region. This book serves as an essential guide for anyone who would like to learn about a unique geographical area of Monpa. *Prairie Farmer*, 1886 **Civil War America, 1850 To 1875** Richard F.
