Feelings and Emotions Antony S. R. Manstead,Nico Frijda,Agneta Fischer,2004-04-05 Publisher Description

The Archive of Feelings Peter Stamm,2023-12-05 Given a second chance with an old love a coolly detached archivist questions the life he could have had and whether it s not too late to live it A poignant ingeniously constructed new novel from one of Europe s most exciting writers *New York Times Book Review* Forty years ago almost a lifetime he confessed his love to a classmate and close friend Franziska Now living in his late mother s house with the obsolete archive of the newspaper he once worked for he looks back on days spent poring over files and clippings increasingly withdrawn from the world His occasional relationships never amounted to anything and the memory of Franziska who became pop singer Fabienne continues to haunt him as she appears in the media When the two cross paths again the possibility of a different life feels achingly real But should he risk the comfort of his ordered existence for a romance that might never match what he imagined A subtle mesmerizing portrait of late blooming passion *The Archive of Feelings* showcases Peter Stamm at his best

Self and Affect Stefan Lang,Maik Niemeck,2025-01-11 The self self awareness and emotions are central

subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness

Pedophilia, Hebephilia and Sexual Offending against Children Klaus M. Beier, 2021-03-08 This book provides extensive information on pedophilia sexual interest in the prepubescent body age hebephilia sexual interest in the early pubescent body age and sexual offenses against children i e the various forms of child sexual abuse including the use of child sexual abuse images along with the current state of knowledge concerning offender groups The book makes it clear that pedophilia or hebephilia do not inevitably lead to offenses against children that there are those who keep their desires in their fantasies and do not act them out on the behavioral level The World Health Organization classifies pedophilia as a mental disorder It can be safely assumed that many pedophile men in a given community live their lives unrecognized and adamant about hiding their sexual drives from society and from themselves and who are genuinely motivated not to act upon their sexual fantasies The numbers of exactly this particular group of pedophilically inclined non offenders can be increased by preventive therapeutic measures For this purpose two treatment programs have been developed at the Institute of Sexology and Sexual Medicine at the Charit Universit tsmedizin Berlin University Clinic since the initiation of the Prevention Project Dunkelfeld in 2005 First the project involving adult participants Berlin Dissexuality Therapy BEDIT and later another for adolescents BEDIT A who find themselves attracted to children Both program manuals are completely integrated into this work which reflects 15 years of assessment and treatment experience

Researching with Feeling Caroline Clarke, Mike Broussine, Linda Watts, 2014-10-10 Why should researchers be interested in their feelings and emotions as they carry out research Emotion is what it is to exist to be human and is present in every sphere of our lives All activities are infused with emotion even those that are constructed as rational because rationality and emotionality are interpenetrated and entwined because all thinking is tinged with feeling and all feeling is tinged with thinking This book illuminates the emotional processes of doing social and organizational research and the implications of this for the outcomes of research With contributions from leading academics and research practitioners it addresses the significant issue of the sometimes intense emotional experiences involved in doing research and the implications it has for the theory and practice of social research By examining the nature of feelings and emotions it explores how we might understand researchers emotions and experiences and considers the often powerful feelings encountered in a variety of research contexts Topics discussed include power relations psycho social explanations of

researcher emotions paradoxical relations with research participants and the sometimes disturbing data that is gained research supervision the politics of research gender publishing undergoing vivas and presenting at conferences This book will therefore be a valuable companion to researchers and research students from the start of their career onwards

Emotion Online J. Garde-Hansen, K. Gorton, 2013-05-28 Travelling through theories of emotion and affect this book addresses the key ways in which media studies can be brought to bear upon everyday encounters with online cultures and practices The book takes stock of where we are emotionally with regard to the Internet in the context of other screen media

Morality and Language of Totalitarianism Andreas Buller, 2023-09-05 The study asks what totalitarian regimes such as Bolshevism National Socialism and Putinism have in common All of these totalitarian systems sought to destroy the universal principles of human morality by replacing them with group class racial or traditional values The direct result of this substitution of values in history has been class terror the Holocaust and brutal violence against both one's own and other peoples The author argues that crimes against humanity are committed on the basis of group rather than universal morality

The Philosophy of Reflection Hodgson, 1878 Frontiers of Cognitive Therapy Paul M. Salkovskis, 1997-03-15 Bringing together cognitive therapy clinicians researchers and theoreticians this volume integrates the latest findings on the conceptualization and treatment of a range of psychological and psychiatric problems From depression and anxiety to eating disorders hypochondriasis obsessive compulsive disorder panic personality disorders sexual problems social phobia and substance abuse authors discuss the needs of individual patients and structuring effective interventions Factors such as therapist competency the therapeutic relationship and empathy are systematically examined Chapters also consider the specific needs of populations such as children and adolescents and the mentally ill *Feelings* James D. Laird, 2007-01-11 *Feelings* argues for the counter intuitive idea that feelings do not cause behavior but rather follow from behavior and are in fact the way that we know about our own bodily states and behaviors This point of view often associated with William James is called self perception theory Self perception theory can be empirically tested by manipulating bodily states and behaviors in order to see if the corresponding feelings are produced In this volume James D Laird presents hundreds of studies all demonstrating that feelings do indeed follow from behavior Behaviors that have been manipulated include facial expressions of emotion autonomic arousal actions gaze and postures The feelings that have been induced include happiness anger fear romantic love liking disliking hunger and feelings of familiarity These feelings do not feel like knowledge because they are knowledge by acquaintance such as the knowledge we have of how an apple tastes rather than verbal knowledge by description such as the knowledge that apples are red round and edible Many professional theories of human behavior as well as common sense explain actions by an appeal to feelings as causes Laird argues to the contrary that if feelings are information about behaviors that are already ongoing feelings cannot be causes and that the whole mechanistic model of human behavior as caused in this sense seems mistaken He proposes an alternative cybernetic model involving hierarchically

stacked control systems In this model feelings provide feedback to the control systems and in a further elaboration this model suggests that the stack of control systems matches a similar stack of levels of organization of the world An original contribution to the study of the relationship between feelings and behavior the volume will be of interest to social emotional and cognitive psychologists *Scientists Making a Difference* Robert J. Sternberg, Susan T. Fiske, Donald J. Foss, 2016-08-15 This book presents the most important contributions to modern psychological science and explains how the contributions came to be *Feeling Gender* Harriet Bjerrum Nielsen, 2017-02-15 This book is open access under a CC BY 4.0 license This book explores how feelings about gender have changed over three interrelated generations of women and men of different social classes during the twentieth century The author explores the ways in which generational experiences are connected what is continued what triggers gradual or abrupt changes between generations and between women and men within these generations The book explores how new feelings of gender gradually change gender norms from within and how they contribute to the incremental creation of new social practices Nielsen suggests a new way of conducting psychosocial research that focuses on generational psychological patterns of gender identities and gendered subjectivities in times of change from a psychoanalytic perspective Combining generational and longitudinal research the book works with temporality as a theoretical as well as a methodological dimension Theoretically it combines Raymond Williams idea of a structure of feeling with the work of Eric Fromm Hans Loewald Nancy Chodorow and Jessica Benjamin *Feeling Jewish* Devorah Baum, 2017-08-22 In this sparkling debut a young critic offers an original passionate and erudite account of what it means to feel Jewish even when you're not Self hatred Guilt Resentment Paranoia Hysteria Overbearing Mother Love In this witty insightful and poignant book Devorah Baum delves into fiction film memoir and psychoanalysis to present a dazzlingly original exploration of a series of feelings famously associated with modern Jews Reflecting on why Jews have so often been depicted both by others and by themselves as prone to negative feelings she queries how negative these feelings really are And as the pace of globalization leaves countless people feeling more marginalized uprooted and existentially threatened she argues that such Jewish feelings are becoming increasingly common to us all Ranging from Franz Kafka to Philip Roth Sarah Bernhardt to Woody Allen Anne Frank to Nathan Englander *Feeling Jewish* bridges the usual fault lines between left and right insider and outsider Jew and Gentile and even Semite and anti Semite to offer an indispensable guide for our divisive times **The Education of the Feelings** Charles Bray, 1872 *The Southern Review*, 1829 *Core of Self* Kathy Glover Scott, 2015-04-08 Create a stronger in charge and more successful you through this easy to use yet profoundly life changing book With this no nonsense approach you will immediately be able to Maximize your mind's ability Use your emotions to your advantage Expand your intuition and use it with laser like focus in your life Activate your Head Heart and Gut Instinct to work together Start today to live successfully from your solid core of self Be Zen while the world whirls around you Manifest the life that you desire and deserve Live in charge through building your inner power and letting your Spirit soar
