Of Light Teachings:

The Law of Light Lars Muhl, 2014-10-16 Lars Muhl has had a lifelong burning interest in Jesus not only as an archetype saviour bodhisattva and elder brother but also in relation to the Essenes from the Dead Sea The Law of Light is the result of his many years spent studying Aramaic and the techniques of Yeshua Jesus Yeshua spoke Aramaic Through the Aramaic language his teachings offer not just another interpretation of the New Testament but the unveiling of a secret message that attempts once and for all to settle centuries old conceptions of sin and to once again connect man with the heavenly spiritual source The core of Yeshua's Aramaic message is intimacy freedom selfless awareness unconditional love compassion and forgiveness In all he says there exists a hidden invitation to us to be present in and dedicated to everything with which we engage Five minutes of total devotion is worth more than hours of hectic exertion The aim is to set mankind free and to dismiss everything that is bound up in false notions *Light, a Teaching Module* Janet Leslie Eaton, 1986 *Teaching about God and Spirituality* Roberta Louis Goodman, 2002 A wide array of renowned scholars and practitioners share their ideas for teaching about God from a Jewish perspective in this comprehensive collection This enlightening yet practical resource includes ready to use lessons for preschool through adult and family education as well as background material to enrich the teacher's own sense of God and spirituality Chapters include Writing a Personal Theology by Dr Neil Gillman The Changing Perceptions of God in Judaism by Rabbi Rifat Sonsino The Spiritual Condition of American Jews by Dr David Ariel The Image of God as Teacher by Dr Hanan Alexander Spiritual Mentoring by Dr Carol Ochs Tell Me a Story by Rabbi Sandi Eisenberg Sasso Expository Systematic Teachings of Christ According to Saint Luke Raphael Alade Adeniyi, 2024-05-16 The Expository Systematic Teachings of Jesus Christ According to Saint Luke is more than just a study manual on the teachings of Jesus Christ it is a complete unabridged commentary book It provides information on difficult Bible chapters and verses that preachers pastors teachers and ministers of God find difficult to understand and interpret I have no doubt that your joy as a minister of God would be full when you no longer need to have all kinds of commentary books to find the right interpretations of the chapters and verses of the Book of Luke Praise God *English Teaching and the Moving Image* Andrew Goodwyn, 2004 Written without technical jargon this book will provide a stimulating and useful guide to teachers and student teachers looking to improve their knowledge of the moving image and its place in the English curriculum Teaching Einsteinian Physics in Schools Magdalena Kersting, David Blair, 2021-08-30 In our world today scientists and technologists speak one language of reality Everyone else whether they be prime ministers lawyers or primary school teachers speak an outdated Newtonian language of reality While Newton saw time and space as rigid and absolute Einstein showed that time is relative it depends on height and velocity and that space can stretch and distort The modern Einsteinian perspective represents a significant paradigm shift compared with the Newtonian paradigm that underpins most of the school education today Research has shown that young learners quickly access and accept Einsteinian concepts and the modern language of

reality Students enjoy learning about curved space photons gravitational waves and time dilation often they ask for more A consistent education within the Einsteinian paradigm requires rethinking of science education across the entire school curriculum and this is now attracting attention around the world This book brings together a coherent set of chapters written by leading experts in the field of Einsteinian physics education The book begins by exploring the fundamental concepts of space time light and gravity and how teachers can introduce these topics at an early age A radical change in the curriculum requires new learning instruments and innovative instructional approaches Throughout the book the authors emphasise and discuss evidence based approaches to Einsteinian concepts including computer based tools geometrical methods models and analogies and simplified mathematical treatments Teaching Einsteinian Physics in Schools is designed as a resource for teacher education students primary and secondary science teachers and for anyone interested in a scientifically accurate description of physical reality at a level appropriate for school education

Teaching Primary Science Peter Loxley, Lyn Dawes, Linda Nicholls, Babs Dore, 2014-06-17 Primary Science Promoting positive attitudes to conceptual learning is a full colour core textbook to support inform and inspire anyone training to teach Science at primary level This book is a new kind of text linking subject knowledge and pedagogy in one package rather than treating them as separate entities The text aims to encourage trainee teachers to teach scientific concepts in contexts which will inspire the children to look at the world in new and intriguing ways rather than presenting it as a list of facts and definitions Encouraging critical reflection and offering practical support this book will help trainee teachers to overcome negative attitudes to Science The two part structure of the book first presents insights into the nature of science and science education exploring issues such as the value and purpose of teaching Science in the primary school and the value of scientific enquiry It then moves on to cover subject knowledge relating it to pedagogy
