Xxxvii Liber Xxxvii Classical Texts:

Printing the Classical Text Howard Jones, 2021-10-18 The first Classical text was printed at Mainz in 1465 By the end of 1500 more than 350 printers in over 70 locations had contributed to the printing of more than 1500 separate editions Almost every Classical Latin author had been printed many in multiple editions and the printing of Greek authors was well under way *Printing the Classical Text* presents a comprehensive survey of this momentous period in the evolution of the Classical text Since the course of Classical printing cannot be viewed separately from the course of printing generally the opening chapter of the book locates Classical printing within the wider context by reviewing some of the cultural intellectual and commercial factors which affected the printing industry as a whole during the first fifty years of its development The two central chapters are devoted respectively to the Latin and Greek editions themselves With respect to Latin editions which represent more than ninety percent of the whole comprehensive chronological listings provide details of the printing history of each of the more than seventy authors represented These are supplemented by a synoptic chart and by a running commentary in which the author identifies observable patterns and highlights the most distinctive features The relatively small number of editions of Greek authors allows the author to accord them individual treatment in which each is examined in the context of its printer's instinctive publishing programme This analysis is preceded by an account of the introduction of Greek studies into Italy where all fifteenth century editions of Greek authors were printed and by a review of the typographical challenges which faced the earliest printers of Greek texts The concluding chapter of the book takes up the controversial question of editorial quality The author examines what the process of editing involved and attempts to assign to the earliest printed Classical editions their appropriate place in the evolution of the authoritative text in light of both the claims which the earliest editors themselves made and the less enthusiastic judgement rendered by modern critics

Struck,2009-02-09 A rich and fascinating account of how symbolism and allegorical reading developed over the course of classical antiquity Literary Imagination Nearly all of us have studied poetry and been taught to look for the symbolic as well as literal meaning of the text Is this the way the ancients saw poetry In Birth of the Symbol Peter Struck explores the ancient Greek literary critics and theorists who invented the idea of the poetic symbol The book notes that Aristotle and his followers did not discuss the use of poetic symbolism Rather a different group of Greek thinkers the allegorists were the first to develop the notion Struck extensively revisits the work of the great allegorists which has been underappreciated He links their interest in symbolism to the importance of divination and magic in ancient times and he demonstrates how important symbolism became when they thought about religion and philosophy They see the whole of great poetic language as deeply figurative he writes with the potential always even in the most mundane details to be freighted with hidden messages Birth of the Symbol offers a new understanding of the role of poetry in the life of ideas in ancient Greece Moreover it demonstrates a connection between the way we understand poetry and the way it was understood by important thinkers in ancient times This book offers a remarkably comprehensive study of ancient symbolic interpretation from the Pre Socratics to the later Neoplatonists and beyond Classical World A challenging yet rewarding journey through a millennium of texts thoughts and interpretations Walter Burkert author of Creation of the Sacred and Greek Religion *Catalogue of Books* Henry George Bohn,1847 *CATALOGUE OF BOOKS* HENRY G.
