Martina Pluda, 2019-05-27 What do National Socialism and animal law have in common Indeed when talking about animal welfare and species conservation one cannot overlook the fact that the laws emanated in the Third Reich were amongst the first to regulate these matters in a structured and unified manner For obvious reasons though the topic of animal protection in Nazi Germany has been overshadowed by the human tragedy which occurred in this period of history How could the Nazis have been concerned about animals whilst perpetrating appalling acts against humans It would be easy to dismiss their benevolent disposition toward animals as hypocritical Nevertheless several associations can be made between the German attitudes towards nature the Nazi ideological and behavioural dynamics and the subsequent provisions Undoubtedly the question on the authenticity of the motivations behind the Nazi animal welfare and protection movement is difficult to answer However there are enough references to give some indication as to their true intentions to create a progressive legislative framework or a legal veil for propaganda From German Romanticism to anti-Semitism this book bridges the gap between two seemingly unrelated topics

The Palgrave Handbook of Holocaust Literature and Culture Victoria Aarons, Phyllis Lassner, 2020-01-24 The Palgrave Handbook of Holocaust Literature and Culture reflects current approaches to Holocaust literature that open up future thinking on Holocaust representation The chapters consider diverse generational perspectives survivor writing second and third generation and genres memoirs poetry novels graphic narratives films video testimonies and other forms of literary and cultural expression In turn these perspectives create interactions among generations genres temporalities and cultural contexts The volume also participates in the ongoing project of responding to and talking through moments of rupture and incompleteness that represent an opportunity to contribute to the making of meaning through the continuation of narratives of the past As such the chapters in this volume pose options for reading Holocaust texts offering

openings for further discussion and exploration The inquiring body of interpretive scholarship responding to the Shoah becomes itself a story a narrative that materially extends our inquiry into that history *The Holocaust and the Henmaid's Tale* Karen Davis, 2005 In a thoughtful and thought provoking contribution to the study of animals and the Holocaust Karen Davis makes the case that significant parallels can and must be drawn between the Holocaust and the institutionalized abuse of billions of animals in factory farms Carefully setting forth the conditions that must be met when one instance of oppression is used metaphorically to illuminate another Davis demonstrates the value of such comparisons in exploring the invisibility of the oppressed historical and hidden suffering the idea that some groups were made to serve others through suffering and sacrificial death and other concepts that reveal powerful connections between animal and human experience as well as human traditions and tendencies of which we all should be aware

Animals and War Ryan Hediger, 2012-11-01 *Animals and War* is the first collection of essays to explore its important yet neglected topic Scholars from sociology history anthropology and literary and cultural studies investigate the presence of animals in human wars The essays analyze a wide range of phenomena including the new militarization of bees zoo animals during war war dogs Finish horses in World War II Canadian war literature and the effort to memorialize nonhuman war animals Although animals are often forced to participate in human wars their presence also signals human vulnerability and dependence Several chapters demonstrate that in the frequently horrible circumstances of war powerful sympathies nonetheless flourish between humans and animals *Animals and War* thus exposes the often paradoxical contours of human animal relationships

The Future of Trauma Theory Gert Buelens, Samuel Durrant, Robert Eaglestone, 2013-10-30 This collection analyses the future of trauma theory a major theoretical discourse in contemporary criticism and theory The chapters advance the current state of the field by exploring new areas asking new questions and making new connections Part one History and Culture begins by developing trauma theory in its more familiar post deconstructive mode and explores how these insights might still be productive It goes on via a critique of existing positions to relocate trauma theory in a postcolonial and globalized world theoretically aesthetically and materially and focuses on non Western accounts and understandings of trauma memory and suffering Part two Politics and Subjectivity turns explicitly to politics and subjectivity focussing on the state and the various forms of subjection to which it gives rise and on human rights biopolitics and community Each chapter in different ways advocates a movement beyond the sort of texts and concepts that are the usual focus for trauma criticism and moves this dynamic network of ideas forward With contributions from an international selection of leading critics and thinkers from the US and Europe this volume will be a key critical intervention in one of the most important areas in contemporary literary criticism and theory

The Significance of Children and Animals O. Gene Myers, 2007 Rev ed of *Children and animals* 1998

Zoographies Matthew Calarco, 2008 Calarco California State Univ Fullerton examines the question of the animal in major Continental thinkers like Heidegger Levinas Agamben and Derrida He takes to task the belief that Anglo philosophy

alone boasts of a strong tradition on this issue He admits however that although these post Enlightenment thinkers were committed to examining and refiguring philosophical concepts and human existence most resort to dogmatic anthropocentric concepts specifically the traditional dualism of human animal a type of essentialism For example despite being critical of an ontotheological thesis of animals Heidegger nonetheless writes of an abyssal difference between human and animal life Calarco s basic thesis is that this binary is no longer defensible forever destroyed by the sciences and humanities Most promising is Derrida the only major Continental thinker to date who thoroughly rejects the human animal distinction and envisions the philosophically enormous task of rethinking politics and ethics outside this tradition Derrida begins with humankind s pre philosophical encounter with animals as fellow beings capable of suffering embodied and vulnerable although this last description is problematic as it is arguably a continuation of humans desire to infantilize animals This important analysis is long overdue

Anthropocentrism and Its Discontents Gary Steiner, 2005-11-06 Anthropocentrism and Its Discontents is the first ever comprehensive examination of views of animals in the history of Western philosophy from Homeric Greece to the twentieth century In recent decades increased interest in this area has been accompanied by scholars willingness to conceive of animal experience in terms of human mental capacities consciousness self awareness intention deliberation and in some instances at least limited moral agency This conception has been facilitated by a shift from behavioral to cognitive ethology the science of animal behavior and by attempts to affirm the essential similarities between the psychophysical makeup of human beings and animals Gary Steiner sketches the terms of the current debates about animals and relates these to their historical antecedents focusing on both the dominant anthropocentric voices and those recurring voices that instead assert a fundamental kinship relation between human beings and animals He concludes with a discussion of the problem of

balancing the need to recognize a human indebtedness to animals and the natural world with the need to preserve a sense of the uniqueness and dignity of the human individual

Animals and Animality in Primo Levi's Work Damiano Benvegnù, 2018-06-21 Situated at the intersection of animal studies and literary theory this book explores the remarkable and subtly pervasive web of animal imagery metaphors and concepts in the work of the Jewish Italian writer chemist and Holocaust survivor Primo Levi 1919-1987 Relatively unexamined by scholars the complex and extensive animal imagery Levi employed in his literary works offers new insights into the aesthetical and ethical function of testimony as well as an original perspective on contemporary debates surrounding human animal relationships and posthumanism The three main sections that compose the book mirror Levi's approach to non human animals and animality from an unquestionable bio ethical origin Suffering through an investigation of the relationships between writing technology and animality *Techne* to a creative intellectual project in which literary animals both counterbalance the inevitable suffering of all creatures and suggest a

transformative image of interspecific community Creation **Where the Wild Things Are Now** Rebecca Cassidy, Molly Mullin, 2020-07-12 Domestication has often seemed a matter of the distant past a series of distinct events involving humans and other species that took place long ago Today as genetic manipulation continues to break new barriers in scientific and medical research we appear to be entering an age of biological control Are we also writing a new chapter in the history of domestication Where the Wild Things Are Now explores the relevance of domestication for anthropologists and scholars in related fields who are concerned with understanding ongoing change in processes affecting humans as well as other species From the pet food industry and its critics to salmon farming in Tasmania the protection of endangered species in Vietnam and the pigeon fanciers who influenced Darwin Where the Wild Things Are Now provides an urgently needed re examination of the concept of domestication against the shifting background of relationships between humans animals and plants

Sonck-Rautio, Harri Uusitalo, 2024-09-23 This book explores the human relationship to changing biodiversity by bringing

together multidisciplinary insights into human nature relations from the humanities New animal and plant species arrive and previously existing ones may disappear However the historical and social perspectives of the changes have been understudied so far This book approaches the human relationship with changing biodiversity from three different angles belonging and non belonging emotions and environmental policy The question of belonging and non belonging is crucial when it comes to changing biodiversity The authors ask who decides where species can move and live and when invasive becomes native Similarly emotions have a big role in human nature relations The book shows why we grieve the loss of some species and hate some other species and how our emotions change over time The writers also aim to show how environmental policies or the practice of governing species are affected by societal discussion emotions scientific research and topical concepts as well as how these policies shape biodiversity and our perceptions of different species The authors provide fresh insights into human nature relations and explain why we need multidisciplinary approaches in order to fully understand their complexity
